Source: https://seal.huji.ac.il/node/1562 (SEAL – Sources of Early Akkadian Literature, ed. M. P. Streck & N. Wasserman). Retrieved 2026-10-16. Clean extraction of `_raw/node-1562.html`.

Conventions: line numbers exactly as in SEAL (manuscript siglum + column + line; primes = line count from first preserved line). `<sup>…</sup>` = determinatives/superscript signs; subscript digits in sigla rendered as Unicode (C_0). Italics (Akkadian vs. Sumerogram distinction) are NOT preserved here – see the raw HTML. Under each line, `lemmas:` lists SEAL's lemmatisation (lemma + gloss) for that line.
