Per line: **N** = normalized Akkadian reconstruction (`|` metrical foot, `||` caesura); **T** = eBL English translation; **L** = lemmas with eBL dictionary glosses; then notes, parallel lines, and the manuscripts' transliterations (ATF). Bibliography keys like [RN117: 889] are resolved in `bibliography.md` (RN117 = George 2003).

10-11

- **N:** […] … šabiṣ | ibrī | inakkud | pagrum
- **T:** ‘[…] *is gripped*, *my friend*, the body *palpitates*.
- **L:** *šabiṣ* ← šapāṣu I “~ to clasp, enfold”; *ibrī* ← ibru I “friend, colleague”; *inakkud* ← nakādu I “to beat, throb Bab., MA”; *pagrum* ← pagru I “pl. *pagrū*, jB also f., NB also *pagrānu* body”
- **Note:** See [RN117: 206–207]: “In his transliteration of the opening lines of the tablet in Essays Pope ([RN163: 31], Foster reads the end of the line as *úr-ba-ri* but without translating. There seem to be too many wedges present to read *{giš*EREN} (so [RN580: 80, fn. 1]) and I have kept to the original reading of Jastrow and Clay. Tournay and Shaffer read *[im-ta]-aq-qu₂-ut* ([RN580: 80, fn. 2]). The trace at the beginning of the line precludes this, but *i#-[m]a-aq-qu₂-ut* is possible. They also sustain the old reading of the following word as *wa-aq-rum* but to my eyes the antepenultimate sign is *pa*, not *wa*. As I understand it, Enkidu is describing his intense physical reaction to whatever terrifying and impossible undertaking (see l. 17) Gilgameš has proposed in the lacuna.”

- **T:** Why do you desire to do this thing?
- **L:** *a[m-mīni]m* ← ammīni I “why?”; *tahših* ← hašāhu I “to need, desire”; *a[nn]iam* ← annû I “OB occas. with nunation this, those”; *ep[ē]šam* ← epēšu I “action, behaviour OB *e. damqum* good behaviour”

- **N:** […] … mimma […] … | mādiš | [t]ahših
- **T:** […] anything […] do you desire so much?
- **L:** *mimma* ← mimma I “and sim. anything, something”; *mādiš* ← mādiš I “greatly, very Bab., OA”; *[t]ahših* ← hašāhu I “to need, desire”
- **Note:** See [RN117: 207–208]: “Tournay and Shaffer’s reading of the beginning of the line as *[ni-še]-mi-im-[ma]*, ‘nous entendons’ ([RN580: 80, fn. 3]), does not convince on orthographic and contextual grounds. Although the idiom *ana mādiš* is not yet found before the Erra Epic (V 25), it is very tempting to read after *mimma* simply *ammādiš* (Foster).”

- **N:** … […] …
- **T:** Let me … […] …
- **Note:** See [RN117: 208]: “The first word was read *lu-uš-šu-ú* by Foster, who left it untranslated, and the whole line as *lu-uš-ta-u₂ [aš-šum e-pi-i]š-tim*, ‘je voudrais m’informer au sujet de l’entreprise’, by Tournay and Shaffer ([RN580: 80, fn. 4]). From *šutawûm* one would expect *lu-uš-ta-wi*, however, and the sign before *tim* is hardly *iš*. Other possibilities are *lu-ús-si*, ‘let me summon’, and *lu-uš-ta-ú*, ‘let me fly away’, but while the next word or words are undeciphered and the syntactic connection with *šipram* in l. 17 uncertain, it is best to speculate no further.”

- **Note:** See [RN117: 208]: “At the beginning Foster restores *[iš-tu i-ru]-bu* (though room is a little short), and Tournay and Shaffer *[i-te-er]-bu*, ‘ils entrèrent’ ([RN580: 81, fn. 10]). However, this is as likely direct speech as narrative, so *[li-ru-b]u-ma*, ‘let them go in’, also comes to mind. The reading *bīt šībūti* is Foster’s. CAD S, p. 10 (s.v. *sābûtu*), offers *bīt [ši]-im-ti*, citing OB Atram-ḫasīs I 249, but, as Foster notes, the sign *bu* is clear. Any reading *sa-[x-b]u-ti* is ruled out on orthographic grounds, *sa* not being a value used by this scribe (see above, fn. 7 of this chapter).”

- **Note:** See [RN117: 209]: “For *bērā* see the study of the construction and writing of metrological units in the distributive by [powell1982adverbian]. As noted by [RN2652: 113], the sign before danna is not IGI-*gunû* (i.e., 10,000) but an abbreviated ligature of *šu-ši*. The SB text has 60-*šu bēr* and would hardly be guilty of a revision downwards. The penultimate word has been read in several different ways: Jastrow and Clay proposed *nu-ma-at*, which Langdon connected *nu-ma-at* with ‘Arabic *nawa*’ ([langdon1929notes: 346]). Thompson read *bat-ba-at* < *battubattu*, though this word is not found outside Assyria. Then Landsberger proposed *til-ma-at*, ‘ist umgeben’ (loc. cit.), which he derived from the root √*lwʾ*, supposing an exceptional metathesis *tilmât* < *litwât*. In support of this decipherment he cited *RI-ma-at* in SB II 293, which he read as *tal-ma-at* (‘Überlieferungsfehler für *tilmât* oder Plural von *talwītu*’). However, now that the SB word is securely deciphered as *rimmat*, after the parallels elsewhere in SB II (223 and 280), and now that Assyrian MS y_2 obv. 13′ supplies another word again (*lamâssu*), the reading *til-ma-at* has lost all foundation and looks very implausible on orthographic and lexical grounds (see already C. Wilcke, RLA IV, p. 533). The way out of the difficulty is to accept that the OB word is not related to its later counterparts and to assume that later editors, to whom *nu-ma-at* was obscure, replaced it and otherwise altered the line –in SB II by interpolating *išemmēma*— to produce a satisfactory meaning. Schott’s original comment that *nu-ma-at* must be a stative governed by *qištum* holds good ([schott1934zu: 108]), and the only possible verb in our present knowledge of Akkadian is *nawûm*. Though often translated as ‘to lie in ruins, to be laid waste’, the sense of this verb seems to be as much to do with a lack of human presence as to do with ruined buildings (cf. the cognate noun *nawûm*, which refers to the uninhabited regions beyond the arable land, the great tracts of largely empty country where sheep were pastured). The absence of human occupation is a conception which suits every occurrence and exactly fits the inaccessible and unvisited Cedar Forest (cf. von Soden, ‘liegt unberührt’: Reclam$^{4\ 5}$). Consequently I take the verb to mean ‘to be(come) a desolation, wilderness'. The stative of the II/1 adjective will be an elative of the simple stem. The fact that we have *nummât* rather than *nuwwât* is no objection in the light of the existence in good OB contexts of comparable attestations of the cognate noun (*MSL* XII, p. 158, OB *Lu* A 263: *na-me-e*; XIII, p. 229, *Kagal* I ii 62: *na-mu-u₂*, late OB). The three couplets that begin with this line are repeated as ll. 195-200.” Attia ([NABU2005-77]) suggested understanding the signs as *NU ma-at*, “c′est plus le Pays, c′est la Forêt.” See [RN2651: 10b]: “Recently Attia (2005) proposed *NU ma-at*, “c′est plus le Pays, c′est la Forêt.” The result is not far from the author’s translation, but epigraphically it is not possible to accept this suggestion. First, nowhere in the OB epic is *lā* written with *NU*. Secondly, the suggested double nominal phrase *lā māt qištum*, though theoretically not impossible, is not convincing. The typical way to construct nominal phrases in the epic is found in iii 110-112, and in iii 132. In addition, *mātum* is a neutral term for any land, not necessarily for a civilized one (which would probably be dadmii). Hence, *lā māt* is “ce n′est pas le pays,” and not with capital “c′est plus le Pays.” Further, the sentence begins with a prepositional phrase that logically leads to what was “for sixty leagues in each

direction …," not to what was not. And finally, the Cedar Forest is not found on the fringes of civilization, near the city of Uruk and Sumer in general, but miles away from the comrades' home. Thus, even if *mātum* could designate "civilization," the heroes have left the civilized world much earlier."

For other examples of the pronominal suffixes attached to **pars/pirs/purs* nouns in this way see [RN999: 214] (but note that *zērāšu*, given there as an OAkk example, is a regular accusative of a noun from a finally weak root in triptotic declension before the suffix). What is restored before *ibrī* depends on how one construes what comes after. The reading adopted here goes back to Schott (*Reclam*²: “ich will ihren Berg ersteigen”). Though the verb *elûm* is very seldom construed with the object climbed in the accusative outside the fixed idiomatic usage of the same phrase, e.g. *šadâšu īli*, meaning a person disappeared-note the construction *ēlû šamā ̓ī* in l. 140 below and the repeated phrase *nīlû šadâ* in the late text (SB VIII 52, X 31 // 128 // 228). But there are other possibilities: (a) emend to *lu-li a-<na> ša-di-ša*, (b) interpret the signs as *lūli aš-šadîša* (so [ebeling1932review: 228]; [LS304: 213]; *AHw*, p. 206; *CAD* E, p. 118), which would be an example, unique in this text, of the apocopated preposition prefixed to the noun, or (c) abandon the possessive suffix and boldly posit a new adverb, *šadîšam*, ‘mountainwards’ (cf. GAG §67g). Scott’s reading and solutions (a) and (b), with their fem. possessive, preclude the restoration of masc. *erēnum* and favour [*ša qištim*]. Solution (c) would make an anticipatory genitive of this sort unlikely and the old staple [*al-kam*] would then recommend itself.”

Though others have thought differently–Tigay reads *i-[din-šu {d*en-lil?]} ([RN809: 283]), Tournay and Shaffer read *it-[ta-al-bi-iš]* ([RN580: 85, fn. 40])–I assume that the OB line ends in the same way. With regard to the first word, von Soden noted ([LS304: 213]) that the value *ḫá* for *HI.A* is not found in Akkadian context but proposed the reading *pu-ul-ḫá-tim* nevertheless; the value has found its way into his syllabary ([AkkSyll: 47]). This strategy is unnecessary, however, for ‘broken’ fem. pl. nouns are an occasional feature of Akkadian (I owe this observation and the following references to W. G. Lambert): OB *i-na um-me-a-tim* (*ummātim*) *um-šum ib-ba-aš-ši*, ‘in summer there will be a heatwave’ (*YOS* X 22, 22); MB *be-el ma-ti-a-ti* (*mātāti*), ‘lord of the lands’ (*BE* I 41+46, 2; Kurigalzu); LB *a-ba-aš-lam i-na gi-ninda$_2$-na-kum u$_2$-ma-an-di-da mi-in-di-a-tam* (*mindāti*), ‘the surveyor measured the dimensions with a twelve-cubit rod’ (*BE* I 84 ii 25-7, cf. 38 *mi-in-di-a-tim*; Nbp). Note also, in this book, a ‘broken’ dual, *bir-ki-a-šú* for *birkāšu* in a LB manuscript (SB I 200, MS n).” For more examples of “broken” fem. pl., see [NABU2004-49] and [RN3043: 206 fn. 2].

The spelling *ta-qum-tam* is meant for *tuqumtam*, as anticipated by [vonsoden1955boehl: 514], and newly confirmed by the Assyrian MS y_1 5′, which has the logogram *GIŠ.LA₂*. A similar syllabic spelling is also known from an OB school textbook from Nippur ([RN1308: 4, 14′]: *{ki-še-eš-bi*|UR×UR|} = *a-šar ta-qum-tim#*); the existence of two examples of this form of the word implies lexical variation of the kind exhibited by the pair *tarbuʾtum* : *turbuʾtum*. The expression *tuqumtam šatûm* is a vividly figurative idiom, literally ‘to weave battle’, that likens the parry and thrust of man-to-man combat to the interlacing of warp and weft on the loom. It occurs in other texts: in an OB legend about Narām-Sîn ([temp_id_8614570978802014: 191, i 1]; also [RN262: 278]): *qa₂-ab-lam iš-ta-tu i-na mu-uh-hi-ša#*, ‘he joined battle against her (*or* it)’; in Bullussa-rabi’s hymn to Gula ([RN775: 122, 111]): *šá-tu-ú a-na-an-tum*, ‘(Ninurta), who joins combat’; and in a late hymn to Ninurta ([RN358: 21, 2a]): *[i]-na qe₂-reb te-še-e a-šar ša₂-ta-at a-nun-tu*, ‘in the midst of havoc, where combat is joined'. The image is elaborated in a bilingual litany which celebrates the goddess Inanna’s role in combat ([RN1719: 200], *Uruammairrabi* XXI 72): *me₃.a gu mu.dun.dun || ina ta-ha-zi qe₂-e a-šat-tu₄*, “in battle I interweave the threads”.”

Here the word occurs in a line that falls between those describing the daggers’ blades and pommels and are qualified as being ‘of the blades’ sides’. The reference can only be to a projecting crossguard that keep the user’s hand from slipping on to the blade (so already Labat: ‘crête de leur garde’). Good examples of blades furnished with such projections are the famous gold daggers from the royal cemetery at Ur. The curved guard projects out from the blade on either side in the manner of two horns or crests (photographs: Woolley, *UE* II, pls. 155, 157).”

It is also found in the late version of this line (SB II 289), though not in Assyrian MS y_2 obv. 9′, which has *ṣeḫrē*]*ta*. According to von Soden the usage, normal in Old Assyrian, is ‘selten archaisch’ in Old Babylonian (GAG §75 c.1). Elsewhere in literary OB one finds, with reference to Šamaš, *na-ši-a-ti* (*YOS* XI 23, 10: divination prayer); the form occurs also in MB: [RN787: 18, 8]: *áš-ba-a-ti*, of Marduk (Nbk I, NA transcript). The doublet *parsāti* : *parsāta* in the stative conjugation exactly matches the masc. 2nd sg. of the accusative independent pronoun, which in Old Babylonian can be *kāti* as well as *kāta*.” See the additional examples of the use of *-āti* for m. sg. stative forms collected by [RN2651: 11a].

Others have translated similarly (Dalley, Hecker), or as if the verb was a simple I/1 present, either as a question (Heidel, Labat, Bottéro, and, restoring *[im-m]a-ti*, [RN580: 95, fn. 98]), a wish (Speiser) or a prediction (Pettinato). The verb is unsuited to a question relating to Gilgameš’s anticipated return--unless it is future perfect, i.e. II/1 transitive and notably lacks the ventive ending that would be expected if it referred to the hero’s homecoming. Apart from the problems raised by *tuttēr*, the first word is also open to doubt: Clay’s copy did not suggest that the broken sign could be *ma* and to my eyes it is more like *ne*. Rather than an interrogative, the broken word might be the object of transitive *tuttēr*.”

- **Note:** See [RN117: 214–215]: “255–6. The couplet is remarkable for the tense of its verbs. In l. 256 there is hardly room to restore *i-[na-ṣa-ar]* and *ušallim* in l. 255 is certainly preterite. Some have ignored the tense, while others have seen an allusion to some otherwise unknown episode in which Enkidu saved a companion earlier in his career. The key, however, is the phenomenon recently discussed by [RN2725]. Mayer observed that in texts such as the Šamaš Hymn and Marduk Prayer No. 2 the preterite tense is found alongside the present and stative in verbs that refer to the typical: ‘Bei Aussagen über typische Situationen, Geschehnisse, Handlungen und Verhaltensweisen finden wir hier nämlich nebeneinander den Stativ, das Präsens-und das Präteritum, letzeres manchmal sogar in Parallelismus mit einem Präsens’ (p. 392). The parallelism he notes is exactly that occurring between *ušezzeb* and *iṣṣur* in the late version of this couplet (SB III 4-5: *ālik maḫri tappâ ušezzeb* / *ša ṭūdu īdû ibiršu iṣṣur*, cf. SB III 218-19). Mayer expected to find the ‘gnomic preterite’ in Akkadian proverbs and everyday expressions but noted just one example. I am inclined to think that this couplet contains two more (Kovacs took the same view of the late equivalent of the couplet). Other apparently proverbial sayings in SB Gilgameš using the ‘gnomic preterite’ are to be found in SB VII 75-6: *ana balṭi* […] *īzibū nasāsa* / [*mī*]*tu*(?) *ana balṭi nissata īzib*; VII 86-7: [*ša ī*]*qbû ul itūr ul i*[*pšiṭ*] / … *iddû ul itūr ul ipšiṭ* X 318 var.: *lullâ mītu ul ikruba* (*karābi*) *ina māti*.” See also [RN602: 408]: “Das gnomische Präteritum wurde auch in *Zahl und Zeit* S. 145-147 § 31 behandelt; dort sind auch weitere Belege aus dem Akkadischen genannt.”

- **Note:** See [RN117: 215]: “266–7. The ‘river of Ḫuwawa’ is otherwise unknown and does not quite ring true as the object of Gilgameš’s strivings: his stated ambitions are to defeat Ḫuwawa by force of arms and to fell the cedars under his protection. One thus has some sympathy for those who prefer *nârum*, ‘to slay’, to *nārum*, ‘river’, but Speiser’s rendering, ‘after the slaying of Ḫuwawa’, mistranslates *ina nârim*, which as an infinitive construction would mean ‘while slaying, by slaying'. As the text stands this would be a curious way of inciting Gilgameš to stand awash in Ḫuwawa’s blood and accordingly I have stayed with ‘river'. But it may be that we are misled by a defective text, for l. 267 *misi šēpīka* is unusually short for a poetic line.” Note, in addition, the absence of trochaic ending in l. 266.

- **Note:** See [RN117: 215]: "Von Soden read *[ki]-ma ta-aš-tan-nu* < *šanānum* I/2, 'so, wie du gekämpfst hat' ([LS304: 215]; cf. Speiser: '[Since] contend thou wilt'), and this decipherment has found its way into his syllabary as a parade example of OB use of the value *tan* ([AkkSyll: 33]; also *AHw*, p. 1162; *CAD* Š/1, p. 369). However, such a reading is very doubtful. First, the traces do not allow *[ki]-ma*. Second, the third sign of the verb is not certainly *tan*. There is no example of the syllabic value *tan* elsewhere in the Pennsylvania and Yale tablets (the only time the syllable is written it is spelled *ta-an*: OB II 204), but when the *KAL* sign is used, on occasion for *eṭlum* (guruš: II 147, 193, III 283), it does not match the sign in question here, which has too many vertical wedges to be read so. Instead it compares favourably with the certain *ták* in l. 188. But there remains a problem of meaning: given that *taštaknu* should be transitive, whether I/1 or I/2, what is its object? With some hesitation I assume that the phrase is an abbreviation of the idiom *ašar pānīka taštaknu*." See also the restoration *[iš-t]u* proposed by [RN2651: 11b]: "[sin]ce you have already been equipped, begin the journey!"
