The whole epic (scope)

- **Text:** *Atra-ḫasīs* (*inūma ilū awīlum*, "When the gods were man"), the whole epic: Tablet I (the gods' labour, the rebellion, the creation of man, the first round of noise and the plague), Tablet II (the second and third rounds: drought and famine; Enki's conflict with Enlil; the decision to send the flood and the oath), Tablet III (the flood, the sacrifice, the new order).
- **Base recension:** the Old Babylonian Sippar recension copied by Ipiq-Aya (c. 1640 BCE), with the MB, NA ("Assyrian recension", ms. S) and LB witnesses where the OB text is broken or where they add lines.
- **Work is split by tablet.** Each tablet has its own section below and its own working files (`annotated-I.rtl.md`, `translation-I.rtl.md`, etc.). Each tablet's translator edits only that tablet's section of this file.
- **Shared renderings inside the epic** (the noise passage, the speech formulas, the elders/heralds passage, Enki's "long-haired heroes") are recorded in `renderings.md` and must be identical across the three tablets.

Tablet I

Scope

The whole of Tablet I (OB colophon: "Tablet 1 of *inūma ilū awīlum*, its lines are 416", Ipiq-Aya, reign of Ammī-ṣaduqa, 17th cent. BCE): the gods' labour and the division of the universe (1–38); the Igigi's revolt and the siege of Ekur (39–110); Nusku's embassy and Enlil's despair (111–173); Enki's proposal and the creation of man from clay and the slain god's flesh and blood (174–246); the birth-goddesses, the first births and the rules of birth and marriage (247–308); a broken stretch (309–351); the multiplying of mankind, its noise, Namtar's plague, Atra-ḫasīs's first appeal and its success, and "1,200 years had not passed" (352–416).

Working files: `annotated-I.rtl.md` (per line, with apparatus), `translation-I.rtl.md` (clean reading translation).

Base text and witnesses

- **Base:** eBL corpus, *Atraḫasīs* OB I (ed. E. Jiménez and G. Rozzi, translation B. R. Foster): `sources/eBL/Atrahasis-OB-I/`. 333 lines, normalized. Manuscripts: SipOB1 = BM 78941 (L&M A, Ipiq-Aya), SipOB2 = BM 92608 (E), SipOB3 = BM 17596.A (F), SipOB4 = BM 78257 (G), SipOB5 = BM 22714.B. Its line commentary (much fuller than `reading-edition.md`; it was extracted from `_raw/chapter-display.json`) is the rank-4 source.
- **Second opinion and the end of the tablet:** SEAL no. 1515 (Wasserman & Streck, 2024–25), composite score of Tablet I, all periods, with translation and lemmas: `sources/SEAL/Atrahasis-OB/node-1515--...`. It covers L&M 1–416 and adds lines found only in later witnesses ("19a", "260a–g", "363a–f", ...).

- **Later recensions used to fill gaps** (marked in the text as such): eBL SB I (= OB 1–131), SB II (= OB 111–234), SB III (= OB 231–305); MB Bab_2 (Babylon, school tablet; = OB 38–67); the NA "Assyrian recension" (L&M ms S+T, via SEAL) for the plague and the seven-and-seven births; NA Q, V, z (via SEAL).

Line numbering

- **eBL numbering is the main number for 1–333.** It is Lambert & Millard's (L&M) numbering, with three differences: (a) some L&M line pairs are one verse in eBL (66–67, 113–114, 147–148, 159–160, 215–216, 233–234, 243–244, 278–279, 284–285, 286–287, 292–293, 297–298); (b) **eBL 183–261 run 1 to 4 lines behind L&M**: eBL 183–186 = L&M 184–187 (L&M 183 is eBL 186, in another order), eBL 187–191 = L&M 188–192, L&M 193–195 do not exist in eBL (George 2003: the SB text shows there is no gap), eBL 192–256 = L&M 196–260, eBL 257–261 are a lacuna, eBL 262–271 = L&M 261–270; (c) from eBL 272 the two coincide again. The L&M/SEAL number is given in the apparatus whenever it differs ("L&M 208"), since the scholarly literature cites L&M.
- **334–416 are numbered by L&M/SEAL**, because eBL's edition stops at 333. The text there is SEAL's (ms A, supplemented by NA S+T, Q, V, z and bd).
- **Lines from later recensions** that have no OB equivalent get the number of the preceding main line plus a Hebrew letter ("256ז–256א"), with SEAL's own label in the note ("SEAL 260a–g"; in 1–181 the two coincide, e.g. 110א = SEAL 110a). They are marked `[נוסח אשורי]` / `[נוסח בבלי תיכון]` / `[נוסח בבלי חדש]` in the annotated file and "(נוסח אשורי)" in the clean translation. Where the OB line exists but is broken and a later recension fills it, the line keeps its number and the filling is in [brackets] with the source named in the note (e.g. 51–56 from MB Bab_2).

Sources consulted (Tablet I)

eBL OB I + commentary; eBL SB I, II, III and MB Bab_2 with their commentaries; SEAL 1515 (translation and lemmas); eBL glossaries (stems); Sefaria (Klein, BDB) for the cognates *eṣēru*/יצר, *bâšu*/בוש, *durāru*/דרור, *qarāṣu*/קרץ, *zabālu*/סבל. Modern translations used for comparison: Foster (eBL), Wasserman & Streck (SEAL); George's notes on the SB recension (via eBL).

Decisions (Tablet I)

1. **I 1 *inūma ilū awīlum*:** `כְּשֶׁהָאֵלִים הָיוּ אָדָם` (eBL, following the study it cites as "LS25: 652": *awīlum* is a predicative nominative, "being man"; close to von Soden's nominal reading). The comparative reading ("like men", Lambert; the NA incipit *kī amēli*) is given in the apparatus and the clean translation's footnote. *awīlum* = `אָדָם` [equivalent] (shared).
2. ***lullû* = `קַדְמוֹן`** (noun), distinct from *awīlu* = `אָדָם`; see `renderings.md`. Proposed for the shared file.

3. ***banû* = בָּנָה** [cognate] throughout (create, build), not יָצַר / בָּרָא.
4. **The *ṭēmu* / *eṭemmu* pun:** אֵט / טַעַם (shared); the slain god's name: וַא + apposition אֵל (eBL: *wê ila*, "Wê, a god"), not one name וַא־אִילָא; see the proposal below.
5. ***Bēlet-kala-ilī* (I 243–244)** is translated in the text (גְּבֶרֶת־כָּל־הָאֵלִים), since the line is about the meaning of the new name; the Akkadian form is in the note.
6. **I 352:** the text has "600 years" ([…] 600 *šanātum*), not 1,200; the 1,200 years (600+600) are at I 416 (= II i 1). Both are listed against Gen 6:3.

Progress log (Tablet I)

- 2026-10-16: sources read (eBL OB I + full commentary, SB I–III, MB Bab₂, SEAL 1515); line mapping eBL ↔ L&M established; `renderings.md` Tablet I section written (including the epic's recurring formulas, so the Tablet II translation can follow them).
- 2026-10-16: `annotated-I.rtl.md` drafted in seven sections: 1–56, 57–110g, 111–173, 174–246, 247–308, 309–351, 352–416 + colophon (≈400 entries, incl. the later-recension lines).
- 2026-10-16: three review passes. (a) Fidelity: brackets checked against eBL/SEAL; restorations from later recensions labelled. (b) Consistency: every repeated line compared mechanically (44/46/58/60, 80–83, 93–96, 124–143, 146–152 / 159–165, 184–186 / 191–193, 202–213 / 217–226, 374–384 / 389–399 / 403–411): identical where the Akkadian is identical, differing only where it differs (e.g. 210 *i nišme* "let us hear" / 223 *išmû* "they heard"). Aligned with Tablet II on *niššīku* (נָסִיךְ), *sukkallu* (וְזִיר), *šerru* (עוֹלָל), *nagbu* (מַעֲמַקִּים), *tenēšētu* (בְּרִיּוֹת). (c) Hebrew: per the coordinator, niqqud reduced to partial (names at first occurrence, ambiguous words: הַקְּדֵשָׁה, צָרָה, אוֹתוֹ, לַחַי, אֵט, נָבְלָה, נִשְׁאֲנוּ, …); spelling made plene.
- 2026-10-16: `translation-I.rtl.md` written (intro, 8 section headings, 12 footnotes).
- 2026-10-21: cross-corpus harmonization (the lead's decision 5, settled): *šiptu* = קֶסֶם instead of לחש (250 ,249a, 251). 271 *kuzbu* was קסמה and is now עֲגָבֶיהָ (the lead, 2026-10-21: *kuzbu* = עֲגָבִים as in Gilgameš and the everyday-voices corpus; קֶסֶם stays for *šiptu*).
- **Open:** Lambert & Millard's own text for 334–416 was not available (SEAL used); the MB Babylon tablets of Márquez Rowe 2016 (`Marquez-Rowe-2016--…/`, PDF) were not collated beyond what eBL MB Bab₂ and SEAL already include; `eBL/Atrahasis-MB-*` other than Bab₂ were checked and do not belong to Tablet I.

Proposals for the shared renderings (Tablet I)

Akkadian	Proposed Hebrew	Reason	Lines
lullû	לַזָּדְמוֹן	Must differ from *awīlu* = אָדָם (I 183 has both). Avoids the Kabbalistic "אדם קדמון" and the root יצר (reserved for *eṣēru*).	I 182–183, 190; also Enūma eliš VI, Gilg.
banû	בָּנָה	[cognate]; Hebrew uses it of creating the woman (ב:כב). Not / בָּרָא יָצַר.	passim
eṣēru, *uṣurtu*	צָר, צוּרָה (note: cognate יצר)	Cognate of יצר; keeps the sense "draw a design".	I 266, 288
balālu	בָּלַל	[cognate] (יא:ט).	I 62, 130, 207, 209, 222, 227
ṭabāḫu	טָבַח	[cognate].	I 204, 220, 235
Wê-ila (shared row "וֵא־אִילָא")	**וֵא** (+ apposition אֵל)	eBL (after Moran, Alster, Krebernik): the name is *Wê*; *ila* is "a god". Change the shared name row. **Accepted** (shared §1, 2026-10-16).	I 47, 219
Bēlet-kala-ilī	גְּבֶרֶת־כָּל־הָאֵלִים (in the text, where the naming is the point)	Exception to the "translate Bēlet-ilī in a note" rule, for the naming line only.	I 243–244
eṭemmu singular	אֵט (vocalized)	The shared row gives אֵטִים / אֵט; vocalize the singular always (otherwise read as "slowly").	I 211, 213, 224, 226
šapattu	כֵּסֶה (full-moon day)	Biblical term (תהלים פא:ד); note *šapattu* / שַׁבָּת.	I 202, 217
ittu	אוֹת	[cognate].	I 212, 225
andurāru, *ullu*	דְּרוֹר, עֹל	[cognates].	I 239
ḫupšu	חֲבוּרַת הָעֲמֵלִים (not חָפְשִׁי)	False friend.	I 145, 158

Lessons for the guidelines (Tablet I)

- **The eBL `reading-edition.md` drops most of the line commentary** and leaves double-numbered lines ("66-67") as `### ?` with an empty normalization. The full commentary is in `_raw/chapter-display.json` (`lines[].variants[].note.parts`), and `chapter.atf` has every line. `ebl_fetch.py` should export both (a short extractor is in this session's notes: walk `parts`, joining `StringPart` / `EmphasisPart` / `BibliographyPart`).
- **eBL renumbers parts of OB Atra-ḫasīs I** (eBL 183–271 ≠ L&M), but its own notes cite L&M numbers. Always establish a line concordance before translating a text that the literature cites by an older numbering.
- **False friends found:** *ḫupšu* (labour gang) ≠ חָפְשִׁי; *niššīku* ≠ נָסִיךְ etymologically (sound-likeness only); *kabāsu* "tread" ~ כבש (sense "subdue" would mislead); *amāru* (again, I 109).
- **Cognates worth reusing:** *eṣēru* = יצר; *karāṣu* = קרץ (Job 33:6); *balālu* = בלל; *bâšu* = בוש; *andurāru* = דרור; *zabālu* = סבל; *ṭabāḫu* = טבח; *ittu* = אות; *aḫrât ūmī* = אחרית הימים; *simānu* = זמן; *eršu* = ערש.
- **Partial niqqud and plene spelling go together**: stripping niqqud from a vocalized draft leaves defective spellings (`כסא`, `ודבר`, `האדנות`) that must be made plene by hand. Draft unvocalized from the start.

Tablet II

Scope

The whole of Tablet II (OB colophon, ms B: "Tablet 2 of *inūma ilū awīlum*, [its lines]: 439", Ipiq-Aya, month Šabāṭu, Ammī-ṣaduqa year 12): the second round of noise (1,200 years) and the drought and famine sent against mankind; the Assyrian recension's fuller plague list; the plague of swollen bellies (OB ms D_0 = Schøyen MS 2950); the elders and the heralds: the cult of Adad and the end of the drought; the third round of noise (3 × 3,600 years) and the cosmic guard (Anu and Adad above, Sîn and Nergal / Enlil in the middle, Ea at the bolt of the sea); the famine years, up to "the sixth year" when the daughter is served up for dinner; Atra-ḫasīs's weeping by the river, his offering, and the messages between him and Enki through the long-haired *laḫmu*; Enki's release of the fish; Enlil's anger, the quarrel, and the oath "of the flood"; the gods' demand that Enki swear, and his refusal ("Shall I raise my hand against my people?"); the end: "the gods commanded total destruction; Enlil did an evil deed to the people".

Base text and witnesses

- **Base:** SEAL no. 39732, *Atraḫasis II (all periods)*, Wasserman & Streck (uploaded 10–11/08/2026): composite score with translation and per-word lemmas, `sources/SEAL/Atrahasis-OB/node-39732--...`. Manuscripts (SEAL sigla, = Lambert & Millard where they exist): **B** (OB Sippar, Ipiq-Aya, Tablet II; cols. i, ii, vii, viii), **D** (OB Sippar; cols. i–viii), **D_o** (OB, Schøyen MS 2950 = CUSAS 10, 3), **H** (OB), **I** (OB), **C_o** (early OB "Larsa", Schøyen MS 5108 = CUSAS 10, 2; cols. i–iii, iv), **X-MB**, **Y-MB** (Middle Babylonian), **Q-NA**, **S+T+-NA** (the Neo-Assyrian "Assyrian recension", Nineveh, K 3399+ etc.), **be** (Late Babylonian), **bd** (a variant quoted in SEAL).
- **eBL:** the eBL corpus chapters of Atra-ḫasīs that exist (OB I, SB I–III, MB Bab_2, Priv, Ug_2) do **not** parallel Tablet II: SB I–III run parallel to OB Tablet I, and MB Priv is the flood warning (Tablet III). The eBL chapters "Old Babylonian II", "Neo-Assyrian I/II", "SB IV–X" exist as shells with manuscript lists but **no lines** (checked through the API, 2026-10-16). So SEAL is the only full edition. The eBL Fragmentarium transliteration of **K 3399+** (`sources/eBL-fragmentarium/atf/K.3399...`, ms S, cols. iv–vi) was used to check the Assyrian recension's lines (Seg. A 6a–B 18, E 78a–y, E 152–175): it reads S v 27' `i-na š[i-im-t]i` (SEAL: `i-na UD-[mi-šu]`) and S v 18' / vi 7' `e-reb` (SEAL: `e-kal`); both noted in the apparatus.
- **Wasserman 2020** (OBO 290), pp. 16–19: edition of C_o iv (the Larsa recension's version of the end of Tablet II), with the L&M concordance "Atr. II viii 33–35" for Seg. I 3–5. Used for the end of the tablet and for *gamertu*.
- **Schøyen catalogue** (MS 2950, MS 5108) and **Márquez Rowe 2016** were read; they add no text for Tablet II beyond SEAL.

Line numbering

- **SEAL's segment numbering is the main number** ("A 1", "E 161g", "H 22"). SEAL divides the tablet into segments A–I because the witnesses do not overlap continuously and the gaps between them are of unknown length; within a segment the numbering follows the OB manuscripts (in Seg. E, the LB manuscript be). Lines found only in a later witness have letter suffixes ("A 6a", "E 78q").
- In the annotated file each line also gives the **manuscript lines** (e.g. "B i 7; D i 7; Q obv. 15; S iv 40"), which is how Lambert & Millard and most literature cite Tablet II (L&M "II i" = B/D i, "II ii" = D ii, "II iii" = D iii, "II iv" = D iv / H, "II v" = D v, "II vi" = D vi / C_o i–ii, "II vii" = B vii / D vii / C_o iii, "II viii" = B viii / D viii). L&M's own line numbers are not available to us (paid; guidelines §9); the one concordance we have is Wasserman 2020: Seg. I 3–5 = L&M II viii 33–35, I 6–7 = II viii 36–37.
- Where SEAL quotes several manuscripts for a line, the translation follows **the oldest well-preserved witness** (OB > MB > NA/LB) unless SEAL's composite translation follows another; the variants that change the sense are translated in the apparatus.

Decisions (Tablet II)

1. **Composite text, one line per segment number.** Variant manuscripts are not translated as separate lines; their differences are in the apparatus (`נוסח:`). Exception: where a later witness adds lines (S+T+ v 3–26, vi 7–15; X-MB in Seg. G), they are numbered and translated, marked `[נוסח אשורי]` / `[נוסח בבלי תיכון]` / `[נוסח בבלי מאוחר]` in both files, as Tablet I does.
2. **The noise passage, the elders/heralds passage and the speech formulas** follow Tablet I's renderings exactly (`renderings.md` I.1).
3. **Enki / Ea:** the OB manuscripts say Enki, the MB/LB/NA ones Ea. The Hebrew keeps whichever name the followed manuscript has (shared rule), so both appear; a first-occurrence note says they are the same god.
4. **Atra-Ḫasīs's spellings** (*Atram-ḫasīs*, *Watram-ḫasīs* in D_o and C_o, *Atar-ḫasīs* in S) are all `אַתְרַחֲסִיס` in the text; the spelling is in the apparatus.
5. ***rigmu*:** שְׁאוֹן for mankind's noise (A 5, A 7, E 60, E 66, E 69), *including* D 6, where mankind's *rigmu* is weeping (`שְׁאוֹנָהּ – בֶּכִי`): the point is that the same noise has become a cry. For one man's cry that Enki hears (E 108, E 119): קוֹל, with a note. For the heralds' proclamation (E 16, 32, 46): קוֹל, as Tablet I.
6. **The end of Tablet II and C_o iv:** SEAL's Seg. I 3–5 are translated from B/D; the early-OB Larsa version (C_o iv 1'–7', with "*abūbam ana ūm warḫim*") is translated in an appendix at the end of both files, because it is the same scene in another recension. C_o iv 8'–19' (Atra-ḫasīs kneels before Ea; Ea's answer) belong to the beginning of the Tablet III story and are left to the Tablet III translator.

Progress log (Tablet II)

- 2026-10-16: sources read (SEAL 39732 in full, SEAL 1518, Wasserman 2020 on C_o, eBL K 3399+, eBL corpus checked for OB II / NA / SB IV–X: empty). `renderings.md` Tablet II section written, following Tablet I's I.1.
- 2026-10-16: drafted A 1–23, B 1–18, C 1–7, D 1–11, E 1–62 in `annotated-II.rtl.md`.
- 2026-10-16: drafted E 63–131 (from here on translation lines unvocalized, per the coordinator's niqqud note).
- 2026-10-16: drafted E 132–175c and F 1–17.
- 2026-10-16: drafted G 1–97.
- 2026-10-16: drafted H 1–36, I 1–7i and the appendix (C_o iv 1'–7'). First draft of the whole tablet complete.
- 2026-10-16: review passes (a) fidelity, (b) consistency (aligned with Tablet I's finished lines: I 357, 358, 359, 376–388, 412–415, 236–239 eBL), (c) Hebrew (niqqud stripped to partial, ktiv male); `translation-II.rtl.md` produced (488 numbered lines, 11 footnotes); parallels index and proposals written. The coordinator's regenerated eBL notes do not affect Tablet II (no eBL corpus lines used).

Proposals for the shared renderings (Tablet II)

Akkadian	Proposed Hebrew	Reason	Lines
sekēru N	נִסְכַּר	[cognate] with וַיִּסָּכְרוּ (Gen 8:2), same stem; the Gilg. XI / Atr. III translators should use it if the verb occurs.	Atr. II A 12 (S), B 10, E 78b, E 145
nagbu	מַעֲמַקִּים	Not מַעְיָנוֹת / תְּהוֹם, which pre-empt Gen 7:11; 8:2.	Atr. II A 13, B 10, E 146, G 57
laḫmu (Ea's attendants)	שְׂעִירִים	"The hairy ones"; also in Gilg./Atr. III if they appear.	Atr. II E 74 …
guzalû	נוֹשֵׂא הַכִּסֵּא	As Atr. I; for Gilg. XI 101 (*illakū guzalû*) so that Atr. II H 24 and Gilg. XI 101 match.	Atr. II H 24; Gilg. XI 101
tarkullu / *nasāḫu*	עַמּוּדֵי הַקְּשִׁירָה / נָסַח	*nasāḫu* = נסח [cognate], same meaning (וְנִסַּחְתֶּם, Deut 28:63); for Gilg. XI 102.	Atr. II H 22; Gilg. XI 102
Šullat u Ḫaniš illakū ina maḫri	שׁוּלַּת וְחָנִישׁ הוֹלְכִים לְפָנִים (Atr. II jussive: ילכו ל[פנים], as Gilg. XI 100)	Shared line Gilg. XI 100 / Atr. II H 20–21.	
gamertu	כָּלָה	"Total destruction" (Wasserman 2020); distinct from *karāšu* = כִּלָּיוֹן. Occurs also in Atr. III (C_1 iii 38', v 44") and the Ark Tablet 49.	Atr. II I 4; C_0 iv 2'
ūm warḫim	יוֹם הַיֶּרַח	*warḫu* = ירח [cognate]; the moon's disappearance day. Also Atr. III, Ark Tablet 50.	Atr. II H 28; C_0 iv 6'
ṭēmu in the sense "state, news"	מַצָּב (with a note)	The shared entry already allows a context rendering; here טַעַם would be a false friend. Suggest adding the sense to the shared note.	Atr. II E 135, 137
rigmu of one person crying	קוֹל (with a note that it is the "noise" word)	The shared entry distinguishes people (שָׁאוֹן) and gods (קוֹל); it should say what to do with one man's cry.	Atr. II E 108, 119

Akkadian	Proposed Hebrew	Reason	Lines
têrtu	צַו (divine instruction); הוֹדָעָה (message carried by messengers)	Atr. I has צַו only; a man's message to a god is not a command.	Atr. II E 112–165, G 49a
iktabta rigim awīlūti	כָּבֵד (עָלַי) שְׁאוֹן הָאֱנוֹשׁוּת	**Accepted and applied** in all tablets (harmonization pass). Tablet I wrote עלי without parentheses; the Akkadian has no "on me".	Atr. I 358; II A 7, E 69

Lessons for the guidelines (Tablet II)

- **A composite of many recensions:** when the base edition is a score (SEAL), translate one line per score number from the oldest well-preserved witness, put sense-changing variants in the apparatus, and translate lines found only in later witnesses as numbered lines with a recension tag. Restorations taken from a parallel witness must name it.
- **eBL corpus shells:** an eBL chapter can exist with a manuscript list and zero lines (Atra-ḫasīs OB II, NA I–II, SB IV–X in Oct. 2026). Check `lines` in the API response before assuming an edition exists.
- **Unvocalized text needs full spelling:** when niqqud is stripped, defective spellings (ודבר, מהמלתם, קדם) must be converted to *ktiv male* (ודיבר, מהמולתם, קודם). Draft unvocalized from the start.
- **A repeated formula in a later tablet** should be checked against the earlier tablet's *actual lines*, not only its glossary (e.g. `דיבר אל` without ו when the line stands alone, I 357 = II A 6).

Tablet III

Scope

The whole of Tablet III in the OB Sippar recension (Ipiq-Aya, Ammī-ṣaduqa year 12; colophon: 390 lines, 1,245 for the three tablets): the dream and Enki's speech to the reed wall; the boat's specifications; Atra-ḫasīs's excuse to the elders (col. i); building, loading, the feast, the sealed door, the storm breaking loose (ii); the storm, the frightened gods, Nintu/Mami's first lament (iii); her second lament, the gods' thirst, seven days and seven nights (iv); [the end of the flood is lost]; the sacrifice, the gods "like flies", Nintu's accusation, the fly necklace (v–vi 4); Enlil's anger, Anu's and Enki's answers (vi); the new order: death, barren women, the Pāšittu demon, celibate priestesses (vi–vii); the closing address and the colophon (viii). Appendix: the early-OB "Larsa" recension C_0 iv 8′–19′ (left to Tablet III by the Tablet II translator).

Working files: `annotated-III.rtl.md`, `translation-III.rtl.md`.

Progress log (Tablet III)

- 2026-10-16: sources read (SEAL 1517; Wasserman 2020 edition, commentary pp. 37–60 and ch. 3.1, 3.2, 3.5, 3.8; SEAL 1518, 1520, 1559, 1561–1562, 27122, 27124, 27127–27129; Gilg. XI project files; Tablets I–II files). eBL corpus OB III checked: chapter exists, 0 lines.
- 2026-10-16: col. i drafted (i 1–50).
- 2026-10-16: cols. ii (ii 9–55) and iii (iii 3–54) drafted.
- 2026-10-16: cols. iv–viii, the colophon and the C_0 iv 8′–19′ appendix drafted. First draft of the whole tablet complete. Bible-quote checker: 0 problems.
- 2026-10-16: three review passes. (a) Fidelity: every line re-read against SEAL/Wasserman's transliteration; brackets aligned (partial-word brackets allowed, as in Tablet I); speech quotation marks fixed (i 13, i 20); Wasserman's own inconsistencies resolved explicitly (i 46 *iqbi* vs *aqbi*; ii 32–33 translation vs transliteration; v 32 *zanānu* "rain" vs his "Providing food"). (b) Consistency: every `[XI מקבילה: גילגמש]` line compared with Gilg. XI `translation.rtl.md` word by word (table below); internal repeats checked (i 1–2 / 11–12; iii 51 / v 39–40; iii 53–54 / v 42–43; iv 4 / 13; ii 49 / 53; iv 12 / vi 23 / vi 40); formulas checked against Tablet I's and II's *actual lines* (I 188, 228, 354, 357, 372–373, 385–388; II A 9, E 155, G 13, G 28–29, I 6–7, E 161n). (c) Hebrew: lines read aloud as a sequence; plene spelling; niqqud only on names at first occurrence and ambiguous words (אֵלְכֶם, אֵלַי, שָׁנוּ, שָׁבְעָה, חָיָה, מְקֹרָה, נִכְּרוּ, הֵנִגַּשׁ, הִמָּלְכוּ, לוּ).
- 2026-10-16: `translation-III.rtl.md` written (intro, 12 section headings, 268 numbered lines + fragment groups and the colophon, appendix C_0 iv 8–19, 21 footnotes). A script confirmed that every numbered line equals the annotated file's line. Bible-quote checker on both files: 0 problems.
- 2026-10-21: cross-corpus harmonization (the lead's decision 1, settled): *uqnû* = `סַפִּיר` [equivalent] instead of `לָזוּרִית` (vi 3, identical with Gilg. XI 166), with the [equivalent] note (Exod 24:10, Ezek 1:26, Job 28:6).

Base text and witnesses

- **Base:** SEAL no. 1517 = Wasserman 2020, pp. 19–37 (transliteration, translation), commentary pp. 37–60: mss **C_1** (BM 78942+78971+80385) and **C_2** (MAH 16064), one tablet in two non-joining pieces, copied by Ipiq-Aya. Eight columns; c. half the 390 lines survive.
- **eBL:** the corpus chapter "Old Babylonian III" exists but has no lines (API checked 2026-10-16); eBL Fragmentarium has the BM pieces in its catalogue without transliteration. The eBL edition of the Ark Tablet (`eBL/Atrahasis-MB-Priv/`) was used for the reading of *ubut* (i 22).
- **Later recensions cited in the apparatus** (translated as texts in their own right by project 4): Ark Tablet (SEAL 1520), Nippur J (1562), Ḫattuša J1 (1559), Ugarit I/I1/I2 (1561, 27122, 27124), NA U (27128) and W (27127), LB z (27129). They are cited where they fill gaps (iii 7–8 Anzu from U r 16′; iii 11 *ittaṣâ* from U r 18′; iii 23 Anu from U r 20′; the lost end of the flood from I2) or diverge (U r 3′, W 4′, Ark 59–60 on who seals the boat; J r 11′ "birds of heaven").

- **C_0 (Schøyen MS 5108, SEAL 1518)**, col. iv 8′–19′: translated as an appendix (Tablet II did iv 1′–7′).

Line numbering (Tablet III)

Wasserman/SEAL: column + line, with primes counting from the first preserved line. With the primes dropped this is Lambert & Millard's numbering ("III ii 51"), which the literature (and the Gilg. XI project's table) cites; every annotated heading gives both ("ii 51″ (C_1) = III ii 51"). The clean translation uses the L&M form ("**ii 51**"). Fragment-only stretches (ii 15–21, iv 39–47, v 8–14, vii 14–27, vii 36–41, viii 3–7) are grouped. Gaps are given with their approximate size.

Decisions (Tablet III)

1. **i 22 *ubut / upud*:** the shared formula הֲרֹס בַּיִת, בְּנֵה סְפִינָה (majority reading *ubut*, abātu; also eBL's Ark Tablet), although Wasserman reads *upud* "depart". Flagged below as a proposal.
2. **Shared lines with Gilg. XI** copy the Gilg. XI Hebrew, differing only where the Akkadian differs (table below). Where the Gilg. XI project's table had suggested a Hebrew for the OB line, I followed it except: vi 5 (*makurru* ≠ *eleppu*: אֳנִיָּה, not ספינה); iii 54 / v 43 (*kamāsu* = אסף, because כנס is Tablet I's *paḫāru* D, used in i 39); iii 38 / v 44 (*gamertu* = כָּלָה as in Tablet II, not כְּלִיָּה גמורה); iv 25 (*rādu* = זָרַם, not גשם, which is *zunnu* in Tablet II); iii 29 / iv 21 (*pulḫītu* = פחד, not אימה, which is Gilg. *puluḫtu*); vi 6 (מלא חמה, Tablet II G 13's order, not חמה מלא); ii 48 (שָׁנוּ פניו, intransitive, not שינה פניו).
3. **Internal formulas** follow Tablets I–II's actual lines: i 38–41 = I 385–388; iii 15 *kīma lî išappu* = I 354 כשור גועה (the flood now "bellows like a bull" as the land did); vi 7–8 = II G 28–29; vi 6 = II G 13; v 45 = II E 155 קדרו פניהם; vii 9 *pursī* = II A 9 קטעו; vii 13 *zabālu* Š = I 6 הסבילו.
4. ***rigmu*:** שָׁאוֹן for the land's and the flood's noise (iii 10, 20, 23) and mankind's (iii 43, 47, pl. שאונים); קוֹל for Adad's (ii 50), per the shared rule. The noise thread of the epic stays visible in the Hebrew.
5. **Three words for darkness** kept apart: *eṭûtu* עֲלָטָה, *daʾāmu* הָאֲפֵיל (as Gilg. XI 107), *ekēlu* הֶחְשִׁיךְ.
6. **Echo-control choices that cost something:** שִׁבֵּשׁ not בִּלְבֵּל (iii 41; root בלל is *balālu*/Babel); סִיַּם not כִּלָּה (iv 11); שָׁדַד not הִשְׁחִית for a restored verb (iv 26); גּוּף not פֶּגֶר (iii 42); הַמְעוֹפֵף, צִפּוֹר הַשָּׁמַיִם not עוֹף הַשָּׁמַיִם (ii 35); יוֹלֶדֶת וְלֹא יוֹלֶדֶת not עֲקָרָה (vii 2); אֲסוּרוֹת not תּוֹעֵבָה (vii 8). Accepted echoes, tagged: טְהוֹרִים for *ellu* (ii 32; [equivalent] with 7:2, 8:20, but for a feast). Echo avoided after the corpus merge: הַנָּע, not רָמַשׂ, for restored *nammaššû* (ii 37; the concept tagged [equivalent]).
7. **Hidden cognates surfaced:** *kupru* כֹּפֶר (i 33, ii 13, ii 51); *ṭēmu* + *šanû* נשתנה טעמו (iii 25 = 1 Sam 21:14); *birku* בֶּרֶךְ (vii 5; Gen 30:3; 50:23); *qadištu* קְדֵשָׁה; *zamāru* זָמַר / זְמֶר; *šikaru* שֵׁכָר; *ṣamû* צמא; *šebû* שָׁבַע; *martu* מָרָה; *malāku* Gt נמלך; *napāšu* (נפש, noted); *ṣupru* (צִפֳּרֶן, noted); *pagru* (פֶּגֶר, noted); *Ayyāru* אִיָּר.

8. **Wasserman's readings adopted** at the cruxes: i 13 [של החלום] (against George 2009); i 28 עיגול (Tigay, Ark Tablet); i 37 *bâʾ abūbi*; ii 34 *bêru* "choose"; ii 54–55 the wind (not Atra-ḫasīs) cuts the boat loose; iii 53 plural ("the gods, his sons"); iv 5 *abu-man* (Wilcke); v 41 rhetorical question; vi 9 *pirištum* הסוד (against L&M's *napištum*); vi 15 [לגדר־הקנה]; vi 25–26 a diptych (against Wilcke). iii 48 *ētellī* rendered עולה אני to keep both "I went up" and Wasserman's declarative "I shall go up".
9. **Restorations that carry Genesis parallels are flagged as such** in both files: vi 48 "death" (Lambert 1980b), vi 49 "the grave" (Wilcke), ii 37 *nammaššû*, ii 38 "craftsmen", iii 23 Anu.

Proposals for the shared renderings (Tablet III)

Akkadian	Proposed Hebrew	Reason	Lines
OB *ubut / upud bīta* (shared row "*ubbut*")	keep הָרֹס בַּיִת, but correct the row's normalization to *ubut* (*u-bu-ut*) and add a note: Wasserman 2020 reads *upud* (napādu) "depart from the house" → הִפָּרֵד מִבַּיִת. If the coordinator prefers the edition's reading, change Atr. III i 22 and the Ark Tablet line together. **Accepted** (shared §2: *ubut*, הרוס בית, Wasserman's reading in a note in every version).	The shared row writes "*ubbut*", which is neither reading.	Atr. III i 22; Ark 4
rādu	זֶרֶם	Keeps *zunnu* = גֶּשֶׁם (Tablet II) distinct; זֶרֶם מַיִם (Isa 28:2). The Gilg. XI table suggested גשם. If Gilg. XI 129 is ever re-translated from the majority manuscripts (*šāru rādu meḫû abūbu*), it should use זרם too.	Atr. III iv 25; Gilg. XI 129 (variant); U r 7′
makurru (boat type)	אֳנִיָּה	Distinct from *eleppu* = סְפִינָה. The shared row already lists אֳנִיָּה as an alternative for *eleppu*; it should be reserved for *makurru* (and *unūtu*'s cognate discussion noted).	Atr. III vi 5 (Gilg. table had ספינה)
kamāsu I "gather in" (*ana karāši*)	אָסַף	כָּנַס is Tablet I's *paḫāru* D (I 386 = III i 39).	Atr. III iii 54, v 43
pulḫītu	פַּחַד	Distinct from *puluḫtu* = אֵימָה (Gilg. XI 93).	Atr. III iii 29, iv 21

Akkadian	Proposed Hebrew	Reason	Lines
eṭûtu / *daʾāmu* / *ekēlu*	עֲלָטָה / הֶאֱפִיל / הֶחְשִׁיךְ	Three dark-words kept apart (*daʾummatu* = אֲפֵלָה in Gilg. XI 107).	Atr. III iii 18, 34, 35
rigmu of the flood / of the land	שְׁאוֹן	The shared row covers people, animals and the flood; add explicitly "the land" (= its people) and the plural שְׁאוֹנִים.	Atr. III iii 10, 20, 23, 47
zubbu (OB) = *zumbu* (SB)	זְבוּב	Add *zubbu* as a lemma (the shared formula row has only *zubbī / zumbī*); the fly image runs through iii 19, 44, v 35, v 46, vi 2.	
ālittu / *lā ālittu*	יוֹלֶדֶת / לֹא יוֹלֶדֶת	Not עֲקָרָה; the Genesis comparison (11:30; 29:31) belongs in the apparatus.	Atr. III vii 2
Pāšittu	(shared: פָּשִׁיטְתּוּ)	Confirm; note: "the Eraser", = Lamaštu (von Soden).	vii 3
gamertu	כָּלָה	Confirms Tablet II's proposal; the Gilg. XI table's כַּלָּיָה גמורה should not be used.	Atr. III iii 38, v 44
šakānu abūba	חוֹלֵל (מַבּוּל)	Confirms the Gilg. XI proposal; used throughout Tablet III.	iii 53, v 42, vi 22, viii 9
malāku Gt	נִמְלַךְ (impv. הִמָּלְכוּ)	Confirms the Gilg. XI proposal; the imperative in vi 44 makes the irony.	iii 53, v 42, vi 21, vi 44

Objections to Gilg. XI renderings: none that require a change. Two notes for the coordinator: (1) the Gilg. XI table's suggested OB Hebrew for III vi 5 (ספינה), iii 54 / v 43 (כנס), iii 38 (כַּלָּיָה גמורה), iv 25 (גשם) and iv 21 (אימה) was not followed, for the reasons above; (2) Gilg. XI 129 follows ms J1 (no *rādu*), so the OB / Gilg. difference in the Hebrew is larger than the majority text warrants.

Lessons for the guidelines (Tablet III)

- **Check the edition's translation against its own transliteration.** Wasserman 2020 has small internal inconsistencies (ii 32–33 swaps bulls and sheep; i 46 transliterates *aq!-bi* but translates *iqbi*; v 32 translates "Providing food" while the commentary argues for "rain"). Translate the transliteration and the commentary's argument, and say so.
- **SEAL lemmatization slips** (as with eBL): i 43 *ītetezzizū* lemmatized as *izuzzu* "stand" (it is *ezēzu*); vi 5 *makkura* as *makkūru* "property" (it is *makurru* "boat"); iv 46 *it-t[a…]* as *ittu* "sign" on two signs. Don't build a parallel on a lemma.
- **Restorations can carry the Genesis parallel.** Several of the most quotable lines are restored (vi 48 "death"; ii 37 *nammaššû*; iii 8 Anzu; ii 38 craftsmen). Flag the restoration in the parallels index itself, not only in the apparatus.
- **A later project's Hebrew suggestions for an earlier text** (the Gilg. XI table's "Our Hebrew for OB") are useful but must be checked against the earlier text's own epic-internal formulas (here Tablets I–II), which take precedence when the Akkadian is the same.
- **Script the consistency pass:** extracting `>` lines from the annotated file and comparing them with the clean file caught nothing this time, but it makes pass (b) mechanical and cheap.
