For the Works and Days 7

Session `session_01HrjtT1k7UC3kPSm8NJJkYa` (child of `session_01WwyCYbZBq6CfPR8CtRishj`), 2026-10-24, about 01:45–05:45 UTC.

Done

- **The whole Theogony (KEY `TH`): all 1,042 lines of the base** (1–1022 and Galen's 929a–t), in the base's order
  (212, 214, 213; 425, 427, 426; 429, 434, 430–433), with `{חשודה}` at the 16 bracketed lines and `{גלנוס}` at 929a–t.
  It is a first draft: three review passes are done, but the user has not reviewed it yet.
- **Translators** (Opus sub-agents, strictly one at a time, each told to save every section and run `fill` + `verify`):
  - translator 1 did part 1 (1–115, the proem) and part 2 (116–336), resumed after the merge;
  - translator 2 (fresh, because the first one's context had grown) did part 3 (337–616), part 4 (617–885) and
    part 5 (886–1022 + 929a–t), resumed after each merge.
  - After each part I merged its proposals into `renderings.md` §11.1–§11.5, fixed the tool's gates, ran `selftest` and
    `verify`, and committed and pushed.

- **Review passes**, each a fresh Opus agent over the whole poem, one at a time:
  - (a) fidelity – 5 lines changed;
  - (b) consistency – 28 lines changed (§11.6);
  - (c) Hebrew – 52 lines changed (§11.7).
  - Each pass is logged in `project.md`.
- **Files** in `הסיודוס/1-תולדות-האלים/`:
  - `annotated-TH.rtl.md` (6,470 lines);
  - `translation--intro-TH.rtl.md`;
  - `translation-TH.rtl.md` and `translation.rtl.md` (generated);
  - `project.md` (five translator sections, three review sections, a status line, the parallels table: 225 rows).
- **Other files edited:**
  - corpus `renderings.md`: §3, §5, §8 (F12, F16, F18 revised; F30–F34 added; the pipes escaped), §11.1–§11.7, the new **§13**;
  - `hesiod_tools.py` (gate and parser fixes, below);
  - `parallels-index.md` (the table, by the script, plus the Theogony's key findings at the top);
  - the print stub `הסיודוס/1-תולדות-האלים/הדפסה.rtl.md`;
  - the fifth-day dossier's `annotated-TH.rtl.md`, `translation--intro-TH.rtl.md`, `translation.rtl.md` (rebuilt) and `project.md`.
- **Commits on `main`:**
  - drafting: 5667138, 457a18f, e42c76d, 06098c8, 5ac68a0;
  - review passes: ab333ed, a4aa559, 4e600c9;
  - intro and build: f2360d4;
  - dossier and parallels index: 2b1f346;
  - §13 and key findings: 40a430e;
  - this report.

Verification

- `python3 -I -B הסיודוס/hesiod_tools.py verify TH --strict`: 1,042/1,042 entries, **0 problems, 0 repeated-line differences**. Every repeated line of renderings §9 inside the Theogony is identical.
- `hesiod_tools.py selftest`: 29 lines, 0 failures.
- `hesiod_tools.py build TH`: 1,042 translation lines, equal to the `>` lines.
- `python3 -I tools/check_bible_quotes.py` on the annotated file, the intro, both translations, `project.md`, `renderings.md`, `parallels-index.md`, and the dossier's three TH files: **0 problems** on all of them.
- `python3 -I -B הסיודוס/build_parallels_index.py`: 225 rows.

- `מיתוסים-אוגריתיים/3-תיק-היום-החמישי/dossier_tools.py verify --strict`: 0 problems. `build` done. No dossier gate
  blocked a corpus rendering.
- The LXX was restored with `sources_sync.py fetch --only LXX`, and `lxx_verses.py show genesis 1:21` printed the verse.

Key findings

For the Bible (Archaic Greece had no contact with Israel: every contact is a motif, an inherited Near Eastern
tradition, or the Septuagint's Greek)

- **Gen 1 through the LXX's own words.**
  - ἐξ ἀρχῆς (45, 115) is the LXX's ἐν ἀρχῇ.
  - Χάος γένετ’ (116) shares the LXX's ἐγένετο of `וַיְהִי`. But the LXX's χάος is its word for `גַּיְא`, never for
    `תֹּהוּ`: this corrects a popular equation.
  - Night bears Aither and Day (124) in the very words νύξ and ἡμέρα of Gen 1:5 LXX: darkness before light, by birth in
    Hesiod and by naming in Genesis.
  - Keto (238) is named from κῆτος, the LXX's word for the `תַּנִּינִם` of Gen 1:21.
- **Gen 2–3.**
  - The first woman is moulded from earth with συμπλάσσω, the LXX's verb of (571) `וַיִּיצֶר`. In Genesis it is the man
    who is moulded, and the woman is built from him.
  - καλὸν κακόν (585) stands against the LXX's καλόν for `טוֹב`.
  - "The race of women" (590) stands against "male and female he created them". The misogyny of 590–612 goes far beyond
    Gen 3:16, and also beyond Proverbs and Qohelet.
  - The serpent guards the golden apples with φυλάσσω (335), the LXX's verb for the cherubim of Gen 3:24.
  - Metis advises Zeus "good and evil" (900; 1 Kgs 3:9).
- **Gen 6:1–4.**
  - The Hundred-Handers are οὐκ ὀνομαστοί (148), the LXX's word for `אַנְשֵׁי הַשֵּׁם`, negated.
  - γίγαντες (185) is the LXX's word for `הַנְּפִלִים`. It is kept as a name in the line, with the link in the note.
  - The closing catalogue (963–1022) reverses Gen 6:2: goddesses with mortal men, and "children like gods".

- **Mekone (535–557).** Fat and bones for the gods, meat for men. This is the same division as the חֵלֶב given to God
  (Gen 4:4, Lev 3, 7:23–25), valued the other way round. βωμός is the word the LXX avoids for Israel's altar.
- **The succession myth** (154–210, 453–506, 886–900): the Kumarbi cycle and Enūma eliš.
  - Kingship comes after victory (881–885), as at Ugarit (KTU 1.2 IV 32) and in Exod 15:18. In Enūma eliš it comes
    before the battle.
  - ὄφις and δράκων stand together (322, 825), as in the LXX's Isa 27:1.
  - The land melts like tin in the furnace (862–866 ↔ Ezek 22:20–22).
  - Mount Kasios / Ṣapānu belongs to the later tradition, not to Hesiod: the notes say so and cite the Ugaritic corpus.
- **Also:**
  - Hesiod is called while shepherding at the god's mountain (23 ↔ Exod 3:1, LXX ἦν ποιμαίνων).
  - Eosphoros is Dawn's son (381 ↔ Isa 14:12, the LXX's ὁ ἑωσφόρος).
  - The stone is set up "as a sign" (498–500 ↔ Gen 28:18); βαίτυλος probably comes from בֵּית אֵל.
  - The king with a divine gift on his lips (80–93 ↔ Prov 16:10, 1 Kgs 3:28).
  - θεράπων Μουσάων (100) is the LXX's θεράπων for Moses (Exod 14:31).

For the ancient mind

- **A world begun by birth, with no maker.** Earth is both mother and planner. Order is won by three generations of
  violence and ends in a king who distributes honours: τιμαί as a charter of privileges, kept by the oath of Styx.
- **The poet.** The first Greek poet to name himself (22). His Muses "know how to tell lies like the truth" (27–28).
  Memory bears Forgetting (55, 98–103): song as consolation.
- **The oral craft.** Ring composition (the proem's Muses return at 1021–1022), the catalogues of speaking names (the
  Nereids, the Oceanids, the nine Muses), and the poet's etymologies inside the verse (Titans, Aphrodite, the Cyclopes).
  There is also an obscene pun at 200 (φιλομμηδής for φιλομμειδής).
- **Local water religion.** Three thousand river sons and spring daughters; boys' hair is vowed to the river.
- **Hekate.** She is invoked at every sacrifice and gives or takes back "as she wills": favour, not covenant.
- **Mekone** founds both sacrifice and mortality: men get the meat and die, the gods get the smoke.

- **The peasant household's arithmetic** behind the "race of women": mouths, heirs and old-age care, with the drone image
  reversing the sexes.

Decisions taken (minor, by me; all recorded in `renderings.md` §11 and §13)

- **Formulas.**
  - F16 revised to `שוכני / שוכנות הארמונות האולימפיים` (Ὀλύμπια is an adjective).
  - F18 revised to `הקיימים תמיד`.
  - F12, F23 and F31 widened.
  - New: F30 `עקום־התחבולות`, F31 `קטל המחריד`, F32 `בערוצי ההר`, F33 `דמויי־אלים`, F34 `הנהדרת באלות`.
- **Words.**
  - κλέος = `תְּהִלָּה` (ὄνομα keeps `שֵׁם`: the LXX's bridge to `אַנְשֵׁי הַשֵּׁם` is ὀνομαστοί).
  - θεῖος / θεσπέσιος = `אֱלוֹהִי`, always vocalized, with its own gate and trap.
  - ἠγάθεος = `מְקֻדָּשׁ` (as ζάθεος).
  - μάχη = `מַאֲבָק` (πόλεμος `מִלְחָמָה`).
  - χαίρετε = `שָׁלוֹם לָכֶם / לָכֶן`.
  - φθείρω = `אִבֵּד`.
  - οὐλόμενος = `מַמְאִיר`. The draft's `מבלה` reads "having a good time".
  - the voice words split: φωνή `קוֹל`, αὐδή `נִיב`, ὅσσα `צְלִיל`, ὄψ `נָעִימָה`.
  - τιμή `כָּבוֹד` / τιμαί `זְכֻיּוֹת`.
- **Names.**
  - The Meliai = `נִימְפוֹת הַמֵּילָה` (not `אֵלָה`, which is the terebinth and also reads "goddess").
  - Κήρ = `קֶר`.
  - Αἰθίοψ = (`מֶלֶךְ כּוּשׁ`) `כּוּשׁ`, not the plural `כּוּשִׁים`, which is a slur in Modern Hebrew.
  - Plene table strings for Κράτος `עוֹז`, Νίκη `נִיצָחוֹן`, Ἀμφιγυήεις `צוֹלֵעַ־הָרַגְלַיִם`.
  - New names translated or transcribed by the rules of §2.3 / §3.2 (about 150, listed in `project.md`).
- **Tool fixes** (`hesiod_tools.py`; I widened licences and never bent the Hebrew):
  - `_table()` now reads `\|` as a pipe inside a cell. Five formula rows had split the table, so their Hebrew was read
    from the wrong column.
  - Gates widened: `טוב` + ὀλβιος, `ערם` + δόλος, the root `קדש` + ἠγάθεος, `דור` + φαίδιμος.
  - `אלוהי` moved out of the `אֱלֹהִים` gate into its own gate (θεῖος) and a trap.
  - REQUIRED rows added: ἀμωμος `תָּמִים`, ἁμαρτάνω `חָטָא`.
  - `שבתם` added to the `שבת` gate.

- **The dossier.** Its 23 Hesiod lines now carry the corpus's Hebrew. It keeps its own first-occurrence vocalization and
  its final full stop. The reasons are in its `project.md`.

Questions for the user

None blocks anything. These are optional:

1. **Translated speaking names** (`מָדוֹן`, `לַיְלָה`, `שָׁמַיִם`, `אֶרֶץ` … as names, renderings §3.2/§12.1) are a method
   choice the parent made, reversible by script. Translated names keep the Greek gender (`לַיְלָה` `הַשְׁחוֹרָה`).
2. αἰδώς = `בּוּשָׁה` reads as "shame" in Modern Hebrew (at TH 92 it is reverence). τιμαί = `זְכֻיּוֹת` has the Modern sense
   "rights". Keep them?
3. The Charites' names are kept as names (Aglaia, Euphrosyne, Thalia), not translated. δαίμων is transcribed `דַּיְמוֹן`.
4. `אשה` or `אישה`: the folder writes `אשה` everywhere (161 lines against 24). This is a folder-wide spelling question.

Problems and skipped items

- **No line skipped. No quota stop**: the status was `allowed` before every heavy sub-agent.
- **Corrected by the reviewers:**
  - pass (a): an iterative and an imperfect rendered without `היה`, a participle made a main verb, and an added "returned";
  - pass (b): μάχη split across the two translators, and `תָּמִים` used for "a full year" (it belongs to ἁμωμος);
  - pass (c): 28 ambiguous unvocalized words, and one prophetic (836) `והיה ביום ההוא`.
- **The LXX tool has only Genesis, Exodus, Isaiah and 4 Kingdoms.** The LXX of Job, Psalms, Proverbs, Judges,
  Ezekiel and Jonah is described in the notes, never quoted. In particular, renderings §6's note on the range of κῆτος
  (Job 3:8, 9:13, 26:12; Jonah 2:1) is not quoted at TH 238. Restoring the other LXX books (for the parent:
  `sources-registry.md`, `fetch-recipes`) would let a later pass quote them.
- **Treebank slips found:** γενέτης for γένετ’ (116), Αἰονίδης (993), Εὐνουμίη (902), ἀμφιγύεις. Two of them silently
  disabled a name check (handled by hand and in the table).
- **Not done, by scope:** the Works and Days (sub 2).

Cross-corpus splits left for the lead

- **כּוּשׁ for Αἰθίοψ.** The other corpora's Kush and Ethiopians (Egyptian, Akkadian) should avoid the plural כּוּשִׁים
  in the same way.
- **מַמְאִיר** (ουλόμενος) is a biblical word. No other corpus uses it (grep --all).
- **אוֹת for σῆμα** (TH 500) shares the word with the cognate *ittu* / *ĝiškim* אוֹת of the Mesopotamian corpora: a
  Greek word by sense, not a cognate. This is allowed by the cross-language rule (guidelines §5.2).
- **נָשֶׁר for αἰετός** (TH 523) is the same Hebrew as Etana's *erû*, which is right ([equivalent] in both).
- **The Ugaritic corpus's parallels-index.md** has no TH rows, so nothing there needed regenerating. The dossier's
  translation.rtl.md was rebuilt by dossier_tools.py build.
- **For the guidelines (§5.2), from the translators' lessons:**
  - "never" is not לָעוֹלָם in a corpus that gates עוֹלָם;
  - a formula regex must not contain . or an unescaped | (| splits the table);
  - a names table that strips its own niqqud needs plene strings (גייס / גיס);
  - a reverse lexmap check (one Hebrew word → several lemmas) catches collisions that the forward check misses;
  - a verify check by grammatical class (imperfects and -σκ- forms without היה) would catch pass (a)'s slips.

For the Works and Days

הסיודוס/renderings.md **§13** has everything the WD translators need:

- the four shared lines with their exact Hebrew (WD 149 = TH 152, WD 54 = TH 559, WD 71–72 = TH 572–573) and the
  near-repeats (WD 50, 52, 53, 57, 70);
- every formula as now fixed;
- the Prometheus and Pandora vocabulary of TH 507–616;
- the names and translated names the WD meets (both Erides מָדוֹן, Δίκη, Ὅρκος, the Horai, δαίμων, the heroes);
- the rulings ("never" = אַף פַּעַם, κλέος, φθείρω / ὀλλυμι, θεῖος …);
- the gate homographs to know before drafting.

The translators' own lists are in תולדות-האלים-1/project.md under "For the Works and Days".
