Session session_01GDJfWqYSNWx6TPjkiieXRq (child of session_01WwyCYbZBq6CfPR8CtRishj), 2026-10-24: set-up
05:44–05:47 UTC, a quota pause, then 17:48–about 22:10 UTC.

Done

- **The whole Works and Days (KEY WD): all 831 lines of the base** (1–828 and 169a–d). WD 310 is not in the base: the
  entries for 309 and 311 describe it in words, and it is not supplied. The base's order is kept (168, 170–173, 169,
  169a–d, 174; 360, 363, 361–362; 767, 769, 768). {חשודה} is at 76, 79, 93, 99 and 124–125; {פפירוס} at 169a–d, with
  [ ] for Evelyn-White's restorations. It is a first draft: three review passes are done, but the user has not
  reviewed it yet.
- **Translators** (Opus sub-agents, strictly one at a time; each saved every section and ran fill and verify):
  - translator 1 did part 1 (1–105) and part 2 (106–285), resumed after the merge;
  - translator 2 (fresh) did part 3 (286–413), part 4 (414–617) and part 5 (618–828), resumed after each merge.
  - After each part I merged its proposals into renderings.md §11.8–§11.12, settled the collisions, ran selftest,
    verify WD and verify TH --strict, and committed and pushed.

- **Review passes**, each a fresh Opus agent over the whole poem, one at a time, each logged in `project.md`:
  - (a) fidelity – 11 lines changed (tenses in general statements, two habitual imperfects, an aorist read as a state,
    a participle made a main verb, three additions put in `( )` or removed);
  - (b) consistency – 47 lines changed, no Theogony line (§11.13);
  - (c) Hebrew – 102 lines, 8 headings and the intro (§11.14).
- **Files** in `הסיודוס/2-מעשים-וימים/`: `annotated-WD.rtl.md`; `translation--intro-WD.rtl.md`; `translation-WD.rtl.md`
  and `translation.rtl.md` (generated); `project.md` (five translator sections, three review sections, a status, the
  parallels table: 359 rows).
- **Other files edited:** the corpus `renderings.md` (§3.1 rows: Οἰδιπόδης, Ἑλένη, Κύμη ★, the treebank spelling
  πλψιάς; §3.2: Ὕβρις; §5: the gold-race example; §11.8–§11.14); `hesiod_tools.py` (one REQUIRED row widened, below);
  `parallels-index.md` (rebuilt: 584 rows, and the WD's key findings under the Theogony's); the print stub
  `הדפסה/הסיודוס/2-מעשים-וימים.rtl.md`.
- **At the user's request** (a direct message in this session): the new quota rule – on Saturday, Sunday and Monday (UTC
  date) a `seven_day` `allowed_warning` is ignored; a `five_hour` warning or `rejected` still stops – written into
  `translation-guidelines.md` §5.1a, `reports/child-prompt-template.md` and a `history.md` changelog line (53fa0eec).
  These are shared files a child does not normally edit: the user asked for it.
- **Commits on `main`:** the rule 53fa0eec; drafting d7c98650, a6bfcd83, 1a3138cc, c958cf2c, 049de2ac, 876048d3; passes
  a0315f05, ce7c77c5, ddcc176a; intro and build 9141b535; finish 59e0ea65; this report.

Verification

- `python3 -I -B הסיודוס/hesiod_tools.py verify WD --strict`: 831/831 entries, **0 problems, 0 repeated-line
  differences** (WD 54, 71, 72 = TH 559, 572, 573; WD 149 = TH 152; WD 124–125 = 254–255; the formulas F1, F5, F6, F13,
  F16, F20, F23, F25, F26, F27, F28, F30).
- `verify TH --strict`: 1,042/1,042, 0 problems, 0 differences (no Theogony line was changed).
- `selftest`: 29 lines, 0 failures (the WD test lines 42, 289, 397, 770 included).
- `build WD` and `build TH`: done; the translations equal the `>` lines.

- `python3 -I tools/check_bible_quotes.py` on every file I touched – the WD annotated file, intro, both translations,
  `project.md`; `renderings.md`; `parallels-index.md`; the Theogony's files; the print stubs; `translation-guidelines.md`,
  `reports/child-prompt-template.md`, `history.md`: **0 problems**.
- `python3 -I -B הסיודוס/build_parallels_index.py`: 584 rows (TH 225, WD 359).
- The LXX: all 15 books listed by `lxx_verses.py books`; `show proverbs 27:10`, `show job 9:9`, `show job 38:31` printed.
  Every LXX verse quoted in the WD was printed first; the translators caught four Bible "verses" written from memory
  (at 491, 595, a Judges 11:40 line and a phrase read as Gen 3:2) by printing before quoting.

Key findings

For the Bible (no contact between Archaic Greece and Israel: a motif, an inherited tradition, or the LXX's Greek)

- **Gen 2–3, from the other side.** Pandora is moulded from earth with πλάσσω (61, 70), the LXX's verb of `וַיִּיצֶר` –
  the woman moulded, not the man. The gods "keep livelihood hidden" (42), and the LXX of Gen 3:17 reads "cursed is the
  earth in your *works*" (ἔργοις), the poem's title word. **The sweat the gods set before excellence (289) is the LXX's
  ἱδρώς of `בְּזֵעַת אַפֶּיךָ`**: the same word, valued the other way – a condition of prosperity, not a curse. Ploughing
  "naked" (391) has the LXX's γυμνός of Gen 2:25. The jar (πίθος, not a box) keeps Hope inside.
- **Gen 6:4.** "The divine race of heroes, who are called demigods, the former generation" (159–160): γενεή is the
  LXX's `דּוֹר` (Gen 6:9); `גִּבֹּרִים` has no Greek counterpart here (the LXX's γίγαντες), so it stays in the note. The
  races are "made" with ποιέω, the LXX's verb for `בָּרָא` in Gen 1:27.
- **Lev 26 / Deut 28.** The just and the unjust city (225–247) compared with the LXX of both chapters; "a whole city pays
  for one bad man" (240) ↔ Num 16:22, Josh 22:20, against Gen 18:26; Zeus' watchers (252–255) ↔ Zech 1:10–11, Job 1:7;
  265–266 ↔ Prov 26:27, Ps 7:16–17; the "gift-eating kings" (39, 221, 264) with the LXX's δῶρα = `שֹׁחַד` in the notes.

- **Wisdom.** The good Strife (20–26) ↔ Qoh 4:4–6 (envy of the neighbour: vanity there, good here); the drones and the
  idle (302–306) ↔ Prov 6:6–8 (the bee is only in the LXX's plus 6:8a), 19:15 and 13:4 (ἀέργός); the neighbour near
  better than kin (345) is Prov 27:10 LXX with the same ἐγγύς; measure (350) ↔ Deut 25:14 μέτρον; "a house, a woman, a
  plough-ox" (405) in the order of the Hebrew Decalogue's last commandment (the LXX reorders it).
- **The farmer's year.** Gen 8:22 LXX frames it; כִּימָה and כְּסִיל = the LXX's Πλειάς and Ὠρίων in Job 38:31 (Job
  9:9 LXX does not map one to one; Amos 5:8 LXX has no stars); the crane (448) ↔ Jer 8:7; the ox's and the slave's rest
  (608) ↔ Exod 23:12 LXX ἀναψύχω; a dozen matches with the Sumerian Farmer's Instructions (a shared motif).
- **Purity and the Days.** "The nights belong to the blessed ones" (730) ↔ Deut 23:13–15 (the god in the camp); washing
  before approaching the gods (724–725, 739–740) ↔ Exod 30:19–20; seed and intercourse (733–736) ↔ Lev 15:16–18, 12:2
  LXX; **"the first, the fourth and the seventh, a holy day" (770) ↔ Gen 2:3**: a day of the lunar month, neither a week
  nor a rest, and the LXX's ἡγίασεν never uses ἱερός (kind c); the bird-omens of 801 and 828 are what Lev 19:26 and
  Deut 18:10 forbid in the LXX's own words (οἰωνίζομαι).

For the ancient mind

- The first Greek "I": a farmer who quarrels with his brother over an inheritance, whose father emigrated from Kyme, who
  sailed once (to Euboea, winning a tripod for the Muses) and tells it against himself.
- The poet corrects his own Theogony: there are two Strifes, and the good one is competition ("potter envies potter").
- A village economy of envy, debt, loans returned "the same and more", the neighbour as the safety net, the only son
  who keeps the plot undivided; ἀρετή as prosperity as much as virtue; shame as the mark of poverty.
- Justice as a goddess with a body: dragged, weeping, sitting by Zeus and accusing men; a city's fate tied to its judges;
  and the poet's doubt whether it pays to be just (270–273).
- The races as a decline to Hesiod's own iron present, broken only by the heroes; the dead races become guardians.

- The sky as the farmer's clock (risings and settings, birds, plants; no dates); the Boeotian winter sorting every
  creature into its shelter; bad timing as a moral failure.
- Purity as the gods' presence at night, in the sun, at the hearth and in rivers, without a temple law; the month as a
  map of fate ("one day a stepmother, another a mother", 825).

Decisions taken (minor, by me; recorded in renderings.md §11.8–§11.14 and project.md)

- **Grammar, first fixings:** the gnomic aorist and gnomic present → participle; the infinitive used as an imperative →
  the Hebrew infinitive absolute, vocalized and (pass c) plene (עָרֹם זָרוֹעַ , עֲבוֹד); with μή אַל + infinitive
  absolute; dependent infinitives stay plain.
- **Words:** Ἔρις מָדוֹן for both Strifes (pl. מְדָנִים); δωροφάγος אוֹכְלֵי־מַתָּנוֹת; κλῆρος אֲחֻזָּה; ὀλλυμι נִסְפָּה / סָפָה; πίθος כַּד; κεραμεύς קַדָּר (the root יצר stays πλάσσω's); χρύσεος γένος זָהוֹב גֶּזַע; ὕβρις /
  Ὕβρις זָדוֹן; λοιμός דֶּבֶר; ὀνειδος חֶרְפָּה and so αἶσχος כְּלִמָּה (WD 211 changed); λυπέω הֶעֱצִיב (the עצב gate
  is λυπ-'s: λύπη is the LXX's עִצָּבוֹן); εὖτε כַּאֲשֶׁר; ἴλαος מִתְרַצֶּה; ἐξοχος נִבְחָר.
- **Collisions settled:** παλαίω (413) is the LXX's verb of וַיֵּאָבֵק (Gen 32:25), but נֶאֱבַק is μάρναμαι's in four
  lines of both poems (μάχομαι is נִלְחַם): μάρναμαι kept it, and παλαίω became הִתְגּוֹשֵׁשׁ, with the LXX identity in
  the note. ἑλυμα (the plough-stock, 430, 436) became קוֹרָה, since סַדָּן is the Theogony's anvil (ἀκμων); then δόρυ
  לוּחַ (pass b). μυθέομαι הִשְׁמִיעַ, σθένος חוֹסֶן, ἐπιλαμβάνω בָּלַם moved off the Theogony's words.
- **Names:** Οἰδιπόδης אֶדִיפּוּס, Ἑλένη הֶלָנָה, Κύμη (כִּימָה ≠) ★ קִימָה, and the §2.3 transcriptions of
  project.md (Lenaion, Thrace, Euboea, Aulis, Chalkis, Amphidamas …).
- **Tool fix** (hesiod_tools.py): the REQUIRED row of γείνομαι now accepts the infinitive absolute הולד (WD 793,
  changed from the future תּוֹלִיד to הוֹלֵד). No gate was bent; the gate escapes used (היתר [שער]) have real reasons:
  259 לְחָרֵף 718 ,(ישב) בשבתה (ὀνειδίζω), 733 שְׁכֹבַת זֶרַע (γονή).
- The intro, written by me and polished by pass (c).

Questions for the user

None blocks anything; all are optional.

1. The cruxes, translated by the most defensible reading and marked `?`: 314 (δαίμονι δ' οἷος
   ἐήσθα), 562, 590; also
   148 (ἄπλαστοι / ἅπλατος), 602 ἄοικον, 617 πλειών, 651 (the voyage as a joke), 714, 756, 768.
2. Lines athetized by some editors are translated without `{חשודה}` because the base does not
   bracket them: the proem
   1–10 (Pausanias 9.31.4), 406.
3. The infinitive absolute as the command form (`קָצוֹר` , `שָׁרוֹף` , `עָבוֹד`) is biblical and rare in Modern
   Hebrew:
   keep it?
4. εὐδαίμων τε καὶ ὀλβιος (826) `שְׁבַע־טוֹבָה ... בַּר־מַזָּל` – the translator kept `מזל` for a calendar of
   lucky days.
5. From the Theogony's report, still open: `אישה` / `אשה` folder-wide; `בּוּשָׁה` (αἰδώς) reads
   "shame"; and here the
   plene spelling of qamaṣ qaṭan (`קורבנות` / `קרבנות`), and `ענקים` (necklaces / giants, 73–74).

Problems and skipped items

- **A quota pause.** At 05:47 UTC, before any translator, `rate_limit_info.status` was
  `allowed_warning` (`seven_day`,
  resets 2026-10-26 07:00 UTC). I stopped, told the parent, and scheduled a wake-up. At
  about 17:48 UTC the user set the
  new rule (above); it was Saturday, so I cancelled the wake-up and went on. The status stayed
  `seven_day`
  `allowed_warning` at every later check; no `five_hour` warning and no `rejected`.
- **The LXX restore:** `sources_sync.py fetch --only LXX` fetched only the four old books (the 11
  recipe rows added in
  Round 4 run 4 were not restored by it); I curled them by their rows in `fetch-recipes.tsv`. Job
  came back as a
  Wikimedia 429 error page at first and was re-fetched. For the parent: fix `sources_sync`'s `--
  only` (or the rows'
  registration in the manifest).
- **My own slip:** my first drafting commit (`git commit -- <dir>`) did not include the new, untracked
  `annotated-WD.rtl.md`; the cloud's stop hook caught it and it was added in a6bfcd83. Since
  then every commit ran
  `git add` first.

- **Treebank slips** (noted in the entries): βοῶν as βοή (46), κατακείω (31), πλψιάς (383, which silently disabled the
  Pleiades name check until the table row was added), ώ́φελλον as όφέλλω (174), νυ as νῦν, γονή as γονεύς, empty lemmas.
- **Not in the LXX tool:** Qohelet, 1 Samuel, Daniel, Jeremiah, Habakkuk, Esther, and most Psalms – described in words.
- No line skipped.

Cross-corpus splits left for the lead

- **The tool (`hesiod_tools.py`), proposals from the passes:** homograph traps that fire by the line's lemmas (`אנוש`,
  `נאות`, `אם`, `מרעה`, `קרב`, `ערב`, `עז`, `רעם`, `יגיע`, `חלב`); the names check should also cover `##` headings
  (unvocalized `קימה` / `כסיל` / `כימה` there passed); REQUIRED rows should accept the plural of a fixed noun (`זדונות`,
  146) and infinitives absolute in general; a `lexmap` that strips prefixes and suffixes, with a reverse map and a
  two-translator seam report; the parser cuts a gloss that contains `;`.
- `דֶּבֶר` for λοιμός (WD 243) is a biblical word; `אַגָּן` for κρατήρ (WD 744) rests on Exod 24:6 LXX – the
  everyday-voices corpus lists `אַגָּן` as a Song-of-Songs trap there (§6.7): by the cross-language rule it is allowed here
  as a Greek word with its own LXX identity.
- `קָלוֹן` stayed with the Ugaritic corpus's *qlt*; WD αἶσχος took `כְּלִמָּה`.
- **For the guidelines (§5.2), from the run:** `git commit -- <path>` skips untracked files (`git add` first); a
  translator who prints every verse first still finds remembered verses that do not exist (four here); a gate's word can
  be the natural plural of a fixed noun, so REQUIRED rows should allow it; a treebank lemma slip can silently disable a
  name check (add the slip to the names row).
