Questions for the user 7

Problems and skipped items 8

Cross-corpus splits left for the lead 9

Child session `session_01WwyCYbZBq6CfPR8CtRishj` (`Round4/Run4`), 2026-10-24, 01:12 – about 22:20 UTC (with a quota
pause of about 12 hours, below). Coordinator: this session. The two poems were translated by **two sub-sessions**
(guidelines §5.1a), one after the other, each with its own strictly sequential sub-agent chain; their reports are
`run-4--sub-1.md` (the Theogony) and `run-4--sub-2.md` (the Works and Days) – the details below are summarized from
them. Model: Opus 5.5 throughout (setup, translators, reviewers); nothing ran on a cheaper model.

Done

A new corpus, `הסיודוס/` – the folder's first Archaic Greek corpus. The coordinator set it up before the first line
(commit 8990302):

- **Base text:** Evelyn-White 1914 (Loeb; public domain), as the Perseus `canonical-greekLit` TEI (markup CC BY-SA,
  committed) – the Works and Days added beside the dossier's Theogony file. **Lemma and morphology:** the Perseus AGDT 2.1
  treebank of both poems (CC BY-SA 3.0, committed). Both fetched through `raw.githubusercontent.com`.

- **The LXX layer:** the Septuagint (Rahlfs 1935, Greek Wikisource; git-ignored, licence unclear) widened from four
  books to fifteen: Genesis, Exodus, Leviticus, Deuteronomy, Judges (A text), 4 Kingdoms, Isaiah, Ezekiel, Jonah, Amos,
  Micah, Zechariah, Job, Proverbs, and Psalms 73, 88, 103, 148. Recipes are in `fetch-recipes.tsv` and the items in
  `MANIFEST.json`. **LSJ** per word through Logeion.
- **Tools:**
  - `tools/perseus2md.py` (TEI + treebank → line data; every treebank word aligned to its line, 0 unaligned in either poem);
  - `tools/lxx_verses.py` (`grep` / `show` / `books`);
  - `הסיודוס/hesiod_tools.py` (data / fill / lemma / lexmap / lsj / lxx / verify / build / grep / gates / selftest);
  - `build_parallels_index.py`.
  - The verifier adds two checks to the earlier corpora's: **required renderings** (where the Greek has the LXX's
    word for a Genesis word, the Hebrew must have the Bible's word) and **a names check driven by the renderings table**
    (with first-occurrence vocalization).
- **Reference files:**
  - `renderings.md`: the base's marks; the hexameter-line conventions; Greek in the apparatus; a transcription table;
    about 160 names; the speaking names translated (§3.2); the grammar mapping (aorist, imperfect, perfect, optative,
    middle, the command infinitive → infinitive absolute); about 80 key terms; **§6 the LXX layer table**; §7 the
    reserved and gated words; §8 the formulas; §9 the repeated lines; §10 the self-test;
  - `translator-brief--greek.md` (the ★ rules);
  - `corpus.md` and `parallels-index.md`.

Project	Text	Lines	By
1-תולדות-האלים/	The Theogony (TH): 1–1022 and Galen's 929a–t, in Evelyn-White's order	1,042	Sub1: two translators (parts 1–2, 3–5), three reviewers
2-מעשים-וימים/	The Works and Days (WD): 1–828 and the papyrus 169a–d (310 is not in the base)	831	Sub2: two translators (parts 1–2, 3–5), three reviewers
(the Ugaritic corpus's 3--תיק-היום-החמישי/)	the fifth-day dossier's 23 Hesiod lines, aligned with the Theogony's Hebrew	–	Sub1

- **Files per project:** annotated-<KEY>.rtl.md, translation--intro-<KEY>.rtl.md, the generated translation-<KEY>.rtl.md and translation.rtl.md, and project.md.
- **Print stubs:** 1-תולדות-האלים/הסיודוס/הדפסה.rtl.md and 2-מעשים-וימים.rtl.md.
- **After the sub-sessions, by me:** TH 238 now quotes the LXX's κῆτος for דָּג גָּדוֹל, לִוְיָתָן and Jonah's fish, since
  the books were restored; the manifest items were fixed (below).

Shared files, updated once at the end (this commit and 0dce981):

- STATUS.md: the §3 row and §4 run 4;
- the plan row;
- guidelines §5.1 (the quota pause), §5.2 (four lessons) and §6.7 (the Hesiod corpus; Greek traps);
- history.md (the H2 account and a changelog line), sources-registry.md §4.4u, tools.md;
- fetch-recipes.tsv and MANIFEST.json: new items only.
- domains.txt needed nothing new (raw GitHub, el.wikisource and anastrophe were already listed).
- The user's own quota rule (§5.1a, the child-prompt template, the changelog) was written by sub 2 at the user's
  request (commit 53fa0ee).

Verification (final state)

- hesiod_tools.py verify TH WD --strict: TH 1,042/1,042, WD 831/831 – **0 problems, 0 repeated-line differences**. The
  lines shared across the poems are identical: WD 54, 71, 72, 149 = TH 559, 572, 573, 152; WD 124–125 = 254–255. The
  translation files equal the > lines.
- hesiod_tools.py selftest: 29 lines, 0 failures.
- 3-תיק-היום-החמישי/dossier_tools.py verify --strict: 0 problems.

- `tools/check_bible_quotes.py` gave **0 problems** on:
  - every `.md` of `הסיודוס/`, the dossier and the print stubs;
  - `translation-guidelines.md`, `STATUS.md`, `history.md`, `sources-registry.md`, `tools.md`.
- `build_parallels_index.py`: 585 rows (TH 226, WD 359). The key findings of both poems are at the top of
  `parallels-index.md`.
- Three review passes per poem (fidelity, consistency, Hebrew), each by a fresh reviewer, logged in the `project.md`
  files:
  - TH: 5 + 28 + 52 lines changed;
  - WD: 11 + 47 + 102 lines changed.

Key findings

For the Bible. Archaic Greece had no contact with Israel, so every contact here is one of three things: a shared
motif, an inherited Near Eastern tradition, or a Greek word that the Septuagint also uses.

1. **Gen 1 in the Septuagint's own words, and one popular equation corrected.**
   - Hesiod's ἐξ ἀρχῆς is the LXX's ἐν ἀρχῇ.
   - Χάος γένετ᾽ has the LXX's ἐγένετο for `וַיְהִי`.
   - Night bears Aither and Day (Th. 124) in the νύξ and ἡμέρα of Gen 1:5 LXX: darkness before light, by birth in Hesiod
     and by naming in Genesis.
   - **χάος is never the LXX's word for `תֹּהוּ`.** It renders `גַּיְא` (Mic 1:6, Zech 14:4); Gen 1:2 has ἀόρατος καὶ
     ἀκατασκεύαστος.
   - Keto (Th. 238) is named from κῆτος, the LXX's word for Gen 1:21's `תַּנִּינִם`, and also for Leviathan, Rahab and
     Jonah's fish. κῆτος itself never occurs in Hesiod.

2. **Gen 2–3, from the other side.**
   - **The first woman, not the man, is moulded from earth**, with the LXX's verb of וַיִּיצֶר: συμπλάσσω in Th. 571,
     πλάσσω in WD 61 and 70.
   - The gods "keep livelihood hidden" (WD 42), against Gen 3:17 LXX, "cursed is the earth in your *works*" (ἔργοις, the
     poem's title word).
   - **The sweat the gods set before excellence (WD 289) is the LXX's ἱδρώς of בְּזֵעַת אַפֶּיךָ.** It is the same word,
     valued the other way: a condition of prosperity, not a curse.
   - Ploughing "naked" (WD 391) has Gen 2:25's γυμνός.
   - The serpent guards the golden apples with φυλάσσω, the verb of the cherubim in Gen 3:24 (Th. 335).
   - καλὸν κακόν, "a beautiful evil" (Th. 585), stands against the LXX's καλόν for טוֹב.
   - The jar keeps Hope inside. The misogyny of Th. 590–612 goes far beyond Gen 3:16.
3. **Gen 6:1–4.**
   - The Hundred-Handers are οὐκ ὀνομαστοί (Th. 148): the LXX's word for אַנְשֵׁי הַשֵּׁם, negated.
   - Γίγαντες (Th. 185) is the LXX's word for הַנְּפִלִים. It is kept as a name in the line, with the link in the note.
   - "The divine race of heroes, called demigods, the former generation" (WD 159–160): γενεή is the LXX's דּוֹר
     (Gen 6:9).
   - The races are "made" with ποιέω, the LXX's verb for בָּרָא in Gen 1:27.
   - The Theogony's last catalogue reverses Gen 6:2: goddesses lie with mortal men.
4. **Mekone (Th. 535–557).** The gods get the fat and bones, men the meat. This is the same division as the חֵלֶב
   given to God (Gen 4:4, Lev 3), valued the other way round. βωμός is the word the LXX avoids for Israel's altar.
5. **The succession myth** (Kumarbi, Enūma eliš).
   - Kingship comes after the victory (Th. 881–885), as at Ugarit and in Exod 15:18.
   - ὄφις and δράκων stand together, as in Isa 27:1 LXX.
   - The earth melts like tin in the furnace (Ezek 22:20–22).
6. **Law and wisdom.**
   - The just and the unjust city (WD 225–247) are compared with Lev 26 and Deut 28 LXX.
   - "A whole city pays for one bad man" (WD 240) is set against Gen 18:26.
   - The "gift-eating kings" are discussed with the LXX's δῶρα = שֹׁחַד (Deut 16:19).
   - The neighbour near is better than kin (WD 345): Prov 27:10 LXX, with the same ἐγγύς.
   - "A house, a woman, a plough-ox" (WD 405) comes in the order of the Hebrew Decalogue's last commandment.

7. **The calendar and purity.**
    - The farmer's year runs by the stars, כִּימָה and כְּסִיל (= the LXX's Πλειάς and Ὡρίων, Job 38:31), within
      Gen 8:22.
    - The washing and sexual taboos (WD 724–759) ↔ Exod 30:19–20, Lev 15:16–18, Deut 23:13–15.
    - **"The first, the fourth and the seventh, a holy day" (WD 770) ↔ Gen 2:3**: a day of the lunar month, neither a week
      nor a rest. The LXX's ἡγίασεν never uses ἱερός (a deliberate avoidance).
    - The bird omens are what Lev 19:26 and Deut 18:10 forbid, in the LXX's own οἰωνίζομαι.

For the ancient mind

- **A world begun by birth, with no maker.** Earth is mother and planner. Order is won by three generations of violence
  and ends in a king who distributes honours, kept by the oath of Styx.
- **The first Greek "I".**
    - Hesiod is called by the Muses, who "know how to tell lies like the truth".
    - He is a farmer quarrelling with his brother over an inheritance, a son of an emigrant from Kyme, a man who sailed
      once (to Euboea, for a tripod) and tells it against himself.
    - He corrects his own Theogony: there are two Strifes, and the good one is competition.
- **A village economy.** Envy, debt and loans returned "the same and more"; the neighbour as the safety net; ἀρετή as
  prosperity; shame as the mark of poverty.
- **Justice with a body.** She is dragged and weeps, then sits by Zeus and accuses men. The poet doubts whether it pays to
  be just (WD 270–273).
- **The oral craft.** Ring composition, catalogues of speaking names, the poet's etymologies inside the verse; the races
  as a decline to the iron present.
- **The sky as the farmer's clock**, and bad timing as a moral failure.
- **Purity as the gods' nearness**, at night, in the sun, at the hearth and in rivers, with no temple law. The month is a
  map of fate: "one day a stepmother, another a mother".

Decisions taken (minor, by me and the sub-sessions; recorded in `הסיודוס/renderings.md` §11–§13)

- **The corpus design.** Two projects, one per poem.
  - The base's marks become line tags: `{חשודה}` for Evelyn-White's brackets, `{גלנוס}` for 929a–t, `{פפירוס}` for WD 169a–d.
  - WD 310 (missing in the base) is described at 309 and 311 and never supplied.
- **Names.**
  - **Speaking cosmic names and abstractions are translated as names, without the article** (`שָׁמַיִם`, `אֶרֶץ`, `פַּעַר`, `מִשְׁפָּט`, `מָדוֹן`, `יוֹם`, `לַיְלָה`, `יָם` …), as West and Most do.
  - Olympians and Titans take their familiar Hebrew form; the rest follow a fixed transcription table.
  - The fifth-day dossier was revised to match: `אֶרֶץ` → `גַּאְיָה`, γείνομαι `הוֹלִיד`, γένος `גֶּזַע`, ζάθεος `מְקֻדָּשׁ`, φρένες `לֵבָב`.
- **The LXX identities are required renderings** (πλάσσω `יָצַר`, ἐργάζομαι `עָבַד`, φυλάσσω `שָׁמַר`, ἱδρώς `זֵעָה`, γυμνός `עָרֹם`, ἀρχή `רֵאשִׁית` …).
- **The Bible words of the famous comparisons are gated to their LXX Greek**, which keeps them out of the lines: `תַּנִּין`, `מִין`, `שֹׂחַד`, `גִּבֹּרִים`, `נְפִלִים`, `תֹּהוּ`, `תְּהוֹם`. The apparatus shows them instead.
- **Collisions and splits:**
  - θάλασσα and πόντος share `יָם` (a recorded split);
  - Αἰθίοψ is `כּוּשׁ`, since the plural `כּוּשִׁים` is a slur;
  - "never" is written `אַף פַּעַם` (`עוֹלָם` is gated);
  - παλαίω moved to `הִתְגּוֹשֵׁשׁ`, leaving `נָאֲבַק` to μάρναμαι.
- **The command infinitive** → the Hebrew infinitive absolute (`עָרֹם זָרוֹעַ`, `עָבוֹד`).
- **Formulas:** F1–F34, fixed by their first copies and checked by script.
- **Tool fixes, by the sub-sessions:** licences widened, never the Hebrew bent; the table parser handles `\|`; REQUIRED rows added (ἄμωμος, ἁμαρτάνω). The infinitive absolute is accepted where a required row expects the finite verb (γείνομαι).

Questions for the user

None blocks anything; each choice is made and reversible.

1. **The speaking names translated as names** (`מָדוֹן`, `לַיְלָה`, `שָׁמַיִם`, `אֶרֶץ` …; renderings §3.2, §12.1) –
   or transcribe every name, as the Hebrew translations do? The names check is driven by the table, so a switch is one
   table edit and a script pass.
2. **The infinitive absolute as the command form** (`קָצוֹר`, `שָׁרוֹף`, `עָבוֹד`) – biblical and rare in Modern Hebrew: keep it?
3. **Words with a misleading Modern sense:** αἰδώς `בּוּשָׁה` (it is reverence too); τιμαί `זְכֻיּוֹת` ("rights");
   εὐδαίμων `בַּר־מַזָּל` in a calendar of lucky days. Keep them?
4. **Folder-wide spelling:** `אשה` or `אישה` (the folder writes `אשה`); the plene of qamaṣ qaṭan (`קורבנות` / `קרבנות`).
5. **Lines some editors athetize that the base does not bracket** (WD 1–10, 406) are translated without `{חשודה}`: fine?

Problems and skipped items

- **Nothing skipped.** All 1,042 + 831 lines of the base are translated. WD 310 is not in the Perseus text and was not
  supplied from memory.
- **A quota pause.** At 05:47 UTC, after the Theogony, sub 2 found `rate_limit_info` = `allowed_warning` (`seven_day`,
  resetting 2026-10-26) before its first translator, and stopped; I confirmed the stop. At about 17:48 UTC the user set
  the Saturday–Monday exception directly in sub 2's session. I verified it in that session's transcript, and the run
  resumed and finished the same day. Recorded in guidelines §5.1.
- **`sources_sync.py fetch --only LXX` restored only four books.** `fetch` reads the manifest, not the recipe file, and
  the new rows had no manifest items. Both subs fetched the books by hand. Fixed: the 14 items were added to the manifest
  (without a cloud `snapshot`, which would drop the absent sources), and the lesson is in §5.2.
- **Remembered verses.** The translators found four remembered Bible "verses" that do not exist, by printing before
  quoting. All were removed.
- **Treebank slips** (γενέτης for γένετ', πλψιάς, βοή for βοῶν, …) are noted in the entries. Two had silently disabled a
  name check until they were added to the table.

- **LXX books still not in the folder:** Qohelet, Samuel, Kings 1–3, Daniel, Jeremiah and most Psalms. They are
  described in words, never quoted.
- **Not checked against West's text line by line:** the base is Evelyn-White's. West's readings are noted where the
  translators knew them; a check against a modern edition (©) is not possible from open sources.

Cross-corpus splits left for the lead

- **`כּוּשׁ` for Αἰθίοψ.** The other corpora's Kush (Egyptian, Akkadian) should avoid the plural `כּוּשִׁים` the same way.
- **The cross-language rule applied to Greek words with their own LXX identity:**
  - `אַגָּן` for κρατήρ (WD 744; Exod 24:6 LXX), which the everyday-voices corpus lists as a Song-of-Songs trap;
  - `אוֹת` for σῆμα (TH 500), the Mesopotamian corpora's cognate of *ittu*;
  - `נָשָׁר` for ἀετός (= Etana's *erû*);
  - `דֶּבֶר` for λοιμός;
  - `קָלוֹן` stayed with the Ugaritic *qlt*, and WD αἶσχος took `כְּלִמָּה`.
  - Confirm, or move them.
- **Tool ideas from the review passes**, for any corpus:
  - homograph traps that fire by the line's lemmas (`קרב`, `ערב`, `עז`, `רעם`, `חלב`, `אנוש` …);
  - the names check extended to `##` headings;
  - REQUIRED rows that accept the plural of a fixed noun;
  - a `lexmap` that strips prefixes and suffixes, with a seam report between two translators;
  - a check by grammatical class (an imperfect or a -σκ- form rendered without `היה`).
- **The fifth-day dossier** now carries the Hesiod corpus's Hebrew. Its `parallels-index` has no TH rows, so nothing
  further changes there.
