Child session `session_01UnH1L2q4G2Yookvynrep3i` (`Round5/Run6`), branch `translation-round-5-run-6`; 2026-10-31
09:44–11:14 UTC (range A, one agent at a time) and 2026-11-01 22:02 – ~23:50 UTC (range B, up to three agents).
Coordinator: this session; translators and reviewers as sub-agents (Opus), one translator per text.

Done

The whole selection, 1,130 lines, as projects 4–8 of the Egyptian corpus `חכמה-ובריאה-במצרים/` (not a new corpus:
the tales share its language, its base AED-TEI, its tool and its renderings; BD 125 is the other face of Amenemope's
ethics, and Westcar's wax crocodile was already in the dossier in this corpus's words; a new corpus would have
duplicated the renderings and opened splits for the lead – recorded in `renderings.md` §11 and `corpus.md`).

Project	Text (KEY)	Lines	Base (AED-TEI, CC BY-SA 4.0)	Translator	Independent fidelity review

8--המלח הנטרף/	The Shipwrecked Sailor (SS)	191	pPetersburg 1115	4	1 line

Files per project: `annotated-<KEY>.rtl.md`, `translation--intro-<KEY>.rtl.md`, the generated `translation-<KEY>.rtl.md`
and `translation.rtl.md`, `project.md` (scope, the translator's section, the independent review, the parallels table).
Print stubs `8-...-4/הדפסה/חכמה-ובריאה-במצרים-...`. **pWestcar 2,21–4,7** (27 lines) is the fifth-day dossier's excerpt
WC: copied byte for byte by script and kept identical by `verify WE`; the dossier was not edited.

Set-up (range A): the base texts (`sources/AED-TEI/`, 8 new folders, committed, README table); `egypt_tools.py`:
keys TB WE BD SI SS, the Sinuhe composite (`aed-SI`), the `TALES`-scoped gates (Gen 39, Ex 14, the Decalogue,
Ps 15 / 24, Deut 26:13–14, Deut 8:8, נחש), the BD formula check, the WE ↔ dossier identity check, `build KEY` scoped
to its project (for parallel translators); `renderings.md` §11 (texts, names, key terms, gates, formulas) and §11.6–§11.13
(the translators' merged decisions); the brief's §9; five `project.md` files; `corpus.md`; `build_parallels_index.py`.

Shared files (once, at the end): STATUS (§3 row, §4), the plan row, guidelines §5.2 ("Egyptian tales") and §6.7,
`history.md`, `tools.md`, `sources-registry.md` §4.4t, the corpus's `parallels-index.md` (key findings + 1,182 rows).
No git-ignored source, so no recipe or manifest change; no new host.

Verification

- `egypt_tools.py verify --strict` (all 13 keys): AM 551, MK 9, PT571 4, PT486 3, PT527 4, PT600 7, MT 88, HC 95, **TB**
  185, WE 305, BD 115, SI 334, SS 191 – 0 problems, 0 repeated-line differences;
  translations equal the `>` lines;
  WE's 27 dossier lines identical.
- `egypt_tools.py selftest`: 45 lines (14 new for the tale gates), 0 failures.
- `3-תיק-היום-החמישי/dossier_tools.py verify --strict`: 0 problems.
- `tools/check_bible_quotes.py` on every `.md` of the corpus, its print stubs, the dossier, the guidelines, history and
  STATUS: 0 problems.
- Three review passes per text by its translator, then an independent fidelity reviewer per text (73 lines fixed).
- (`ugarit_tools.py verify` not run: the CUC base is git-ignored and the VM's fetch was cut by a reboot; no Ugaritic
  file was touched.)

Key findings

For the Bible

1. **Gen 39 in the Two Brothers:** the proposal in the ordinary verb of lying (sḏr `שכב`); the refusal rests on kinship
   ("you are like a mother to me", 3,9–3,10), not on the master's trust and God [divergence]; "this great offence"
   (4,1) beside `הָרָעָה הַגְּדֹלָה הַזֹּאת` without "sin against God"; no garment in her hand – she stages a beaten body
   and demands his death; and at the end the wife, not the youth, is punished (8,8).
2. **Gen 2:18, 22:** the gods pity the lonely Bata and Khnum is told to "build" (qd = `בנה`) him a wife (9,6–9,7).

3. **Westcar and Exodus:** the lector priest = חַרְטֹם (the loanword) with the wax crocodile (Ex 7:8–12, the dossier's
finding); the lake folded half on half to recover a pendant (Ex 14:21–22 [divergence]); Djedi's 110 years (Gen 50:26);
the magician's refusal to test death on a man, "the noble flock of the god" (8,16–8,17; Gen 9:6, Ps 100:3);
midwife goddesses at royal births (Ex 1:15–21 [divergence]).
4. **BD 125 and the entrance liturgies:** "I have not transgressed" (thj ↔ Deut 26:13 לֹא עָבַרְתִּי); bread to the
hungry and clothes to the naked (Ezek 18:7, Isa 58:7, Job 31:19); "the perceiver of hearts, the searcher of bellies"
(Jer 17:10); a liturgy of questions at the gate (Ps 24:3–6, 118:19–20); the Decalogue's deeds in ordinary verbs.
5. **Sinuhe and Deut 8:7–9:** tꜣ pw nfr = אֶרֶץ טוֹבָה, with figs, grapes, wine, honey, barley, emmer – and without
wheat, pomegranate or "milk and honey"; the flight from the king of Egypt and marriage to the nomad chief's daughter
(Ex 2:15–21); the duel (1 Sam 17); burial at home with the Joseph pattern reversed (Egypt is the homeland).
6. **The Shipwrecked Sailor:** Jonah's storm and lone survivor, a great creature that carries the man home unharmed;
fire from heaven and "I alone escaped" (Job 1:16).
7. **Egyptian loanwords in their own contexts:** 17 פַּרְעֹה times in TB (the king, and the palace), חַרְטֹם, יְאֹר,
שֵׁשׁ (Gen 41:42), קוֹף, חוֹתָם (SS 165, 1 Kgs 10:22); a Semitic loan in Late Egyptian: y~mꜥ ים.

For the ancient mind

- A heart kept outside the body, on a cedar's flower; a life passing through bull, trees, splinter, son and king (TB).
- Magic as knowledge and measure, rewarded by the king; a magician who will not experiment on a human being (WE).
- The judgement of the dead as knowledge of names; the misdeeds separated from the person, not forgiven; the ethic of
the quiet man (BD).
- Panic before decision ("my body fled before my heart decided"), the god's plan and the king's grace never reconciled,
burial abroad as a second death (SI).
- Consolation by storytelling three layers deep, a lonely god who lost his kin to a falling star, and a master who refuses
to be consoled (SS).

Decisions taken (minor, by me; recorded in renderings.md §11–§11.13)

- The corpus: projects 4–8 in חכמה-ובריאה-במצרים/ (reason above); the folder name kept.
- The Sinuhe composite R 1–23 + B 1–311 (R 24 = B 1); BD on pNu with pJuja and pMaiherperi as witnesses.
- Collisions settled: ḫr-jr = והנה (AM's ḫr-rʾ-ʿ keeps ובכן); grg כזב / ʿḏꜣ שקר; Herakleopolis = חֶנֶס in BD (the
  Cow's form; BD 18, 29 changed); ḫꜣs.t ארץ־נכר (מדבר where it is desert); bꜣq עצי־השמן (not זית).
- Kept by text, recorded for the lead: wsr (WE) / AM's ḥmw both משוט; qd.w (BD חשבון המידות) / AM's dbḥ מִדָּה;
  dmj עיירה in Sl / עיר in AM and TB; jdr / jꜣw.t both עדר; ʿfd.t / pds both ארגז.
- Gates widened (never the Hebrew bent): whole-word exemptions (, משקוף , מרוח(ה) , לברוח שמחה), לשבת with ḥmsj, the
  זבת prefix class, ענבים (jꜣ~jr), זית (bq), קוף (gwf), עור "skin" (jnm), the ba trap on bꜣ,t, משחת.
- The Shipwrecked Sailor taken from the BD translator and given to a fourth translator, to run three texts at once.

Questions for the user

None blocks anything; each line carries the chosen reading with the alternative in its note. Optional:

Where	Question	Now
Sl B29, B182, B219	Qedem (קֶדֶם, Gen 25:6, 29:1) or Qatna (the TLA's reading)?	Qedem, the alternative noted
Sl B83	bꜣq: olive (זית, Deut 8:8) or moringa (the TLA)?	עצי־השמן (neutral)
Sl B291	"dressed" (TLA) or "shaved" (the usual reading; Gen 41:14)?	TLA
TB 4,6	pd~jrʾ: "bandage" (TLA) or a Semitic loan *pdr* "suet" (פֶּדֶר, Lev 1:8)?	תחבושת?
WE 1,20	wn.t: דְּבִיר (1 Kgs 6, the temple word) or a neutral "inner shrine"?	דביר
SS 129	"through wisdom" (the base's lemma) or "through prayer" (the usual reading)?	the base, marked ?

Problems and skipped items

- **Nothing skipped.** One planned stop: range A ended at 11:29 UTC on 2026-10-31; the run committed, pushed and sent
  `RUN PAUSED` at 11:14 (TB done, WE 1,1–7,26), and was resumed by the parent at range B's start (22:02 UTC). No quota
  warning at any gate (`allowed` throughout).
- The VM rebooted while paused; nothing was lost (all pushed). The background `sources_sync.py fetch` was cut by the
  reboot (38 work-tier items missing; none needed here).
- Translators' slips caught: one read the TLA's German for one line before drafting it (recorded at TB 9,3); the
  Westcar translator spread the dossier's `ר֯` convention over the whole file (removed by the reviewer from 25 lines).

Cross-corpus splits left for the lead

- **A pending dossier revision:** WC / WE **2,22** brackets parts of words (`[א]`, `שלי[ח]`, `ל[ש]ח`, `וליד`, `ס[תמ]ח`) against
  the corpus rule; proposed: `זהב־לבן; **אוליד**? … [שלח] שליח [...]. [ואז] [תפס] [תמסח]ו֯ר֯` (a **`לתיק:`** bullet in WE 2,22).
  The dossier's 9 lines in WE also keep its `ר֯` convention, unlike the rest of the corpus: decide one notation for both.
- The kept splits listed under "Decisions" (`ארגז`, `עדר`, `עיירה` / `עיר`, `מידה`, `משוט`).
- y~mʿ `ים` [cognate] in TB beside the Ugaritic Yam `יָם` (a name there): the same word, a note in both.
- `נָחָשׁ` for ḥfꜣw in SS/HC beside the dossier's serpents (consistent with the dossier rule).
