Per line: **N** = normalized Akkadian reconstruction (`|` metrical foot, `||` caesura); **T** = eBL English translation; **L** = lemmas with eBL dictionary glosses; then notes, parallel lines, and the manuscripts' transliterations (ATF). Bibliography keys like [RN117: 889] are resolved in `bibliography.md` (RN117 = George 2003).

- **Note:** [RN3205: 280] suggests that the beginning of the line should be read *lūman lā* instead of *lū mannu*, thus introducing a conditional clause. The commentary on this line, equating *lūman* with *inanna* (courtesy of E. Jiménez), confirms this interpretation. The same equation is also found in a commentary on Neo-Babylonian grammatical texts (*lu-man : i-na-an-na*; see [RN2103: 79 l. 16] and [RN3048ff: l. 16]).
