Binding for every text of the corpus (guidelines §6.6). Set by the coordinator of Round 4 run 3 on 2026-10-23,
before the first line, from the base texts themselves (AED-TEI) and the earlier corpora's

precedents; translators
propose changes in their `project.md` ("Proposals"), and the coordinator merges them into §10 (numbered by translator).
Checked by `egypt_tools.py verify` (§5–§7) and `egypt_tools.py selftest` (§9).

The ruling principle (guidelines §6.4), restated for a non-Semitic language: Egyptian is not Semitic, so **cognates are
rare**. The real lexical contacts with Hebrew are **loanwords** (Egyptian words that entered Hebrew: יְאֹר, תֵּבָה,
קֹסֶת, קֹסֶם, שִׁטָּה, חוֹתָם, טַבַּעַת, פַּרְעֹה, חַרְטֹם, שֵׁשׁ, אֵיפָה, אָחוּ, סוּף), a few shared Afroasiatic roots, and **calques and borrowed sayings** (Amenemope ↔ Proverbs 22:17–24:22). So: (1) choose the Hebrew by meaning,
as if the Bible did not exist; (2) a loanword is used **only** for its Egyptian source word, and tagged [cognate];
(3) the vocabulary of the Bible passages we compare (Gen 1–2, 6–9; Prov 22–24; Lev 19; Deut 19, 25, 27) is reserved
(§5), so that the apparatus, not the translation, shows the parallels.

The other witnesses (`egypt_tools.py data KEY --wit`): five fragmentary Amenemope copies (tablets and ostraca, 21st
dynasty – **older** than the papyrus: their variants go in the apparatus); Merikare pMoscow 4658 and pCarlsberg VI;
the Heavenly Cow on Tutankhamun's first shrine (the oldest copy, c. 1325 BCE) and in Ramesses VI's tomb (KV 9).

Amenemope's `/`: where the TLA analysed one written word **or a stretch of several words** in two ways, AED puts a
`<gap/>` between the two analyses; the corpus tool prints it as `/` (no text is lost there). Translate the stretch once
(the other analysis in the פירוק). Until 2026-10-23 the tool caught only a gap between two similar single words, and printed
the multi-word ones as `[...]` (§10.6). The real losses are only the line-end gaps of 27.17, 27.18 and 28.1.

2. The transliteration convention (the Hebrew apparatus)

2.1 The base text's marks (AED / Leiden)

`[x]` lost, restored by the editor · `(x)` not written (a defective writing), supplied · `⟨x⟩` omitted by the scribe,
supplied · `{x}` written by the scribe, superfluous · `⸢x⸣` damaged · `x?` reading uncertain · `[...]` lost · `,` and `.`
inside a word: the TLA's segmentation (`ḥꜣ,t` "front", `.pl` plural, `.du` dual, `.t` feminine) · `=f` suffix pronoun ·
`i̯` a weak radical not written · `t̯` a feminine `t` before a suffix · `~` a group-writing (syllabic) spelling of a
foreign or Late word. The Hebrew follows the brackets: `[ ]` in the source = `[ ]` in the Hebrew; `( )` / `⟨ ⟩` of the
source are **not** carried into the Hebrew (the word is read whole); `{ }` is left out of the Hebrew; the damage mark
`⸢ ⸣` is **not** carried into the Hebrew either (the word is read as written; a reading in doubt takes `?`) – in every
file, the fifth-day dossier's WC excerpt included (the lead, 2026-11-02, §11.14). Partial restorations: a restored
sign, ending or suffix → no bracket; the body of the word written → no bracket; a word half or mostly restored → the
whole Hebrew word in `[ ]`; a wholly restored article `pꜣ` before a written noun → `[ה]`.

2.2 Egyptian words and names in Hebrew letters

For names (and for an Egyptian word quoted in a Hebrew note): `ꜣ` → א · `j`, `y` → י (word-initial `j` → א) · `ꜥ` → ע ·
`w` → ו · `b` → ב · `p` → פ · `f` → פ · `m` → מ · `n` → נ · `r` → ר · `h` → ה · `ḥ` → ח · `ḫ` → ח · `ḫ` → ח · `ḫ` → ח · `z`, `s` → ס
·
`š` → שׁ · `q` → ק · `k` → כ · `g` → ג · `t` → ת · `ṯ` → צ׳ · `d` → ד · `ḏ` → ג׳. Vowels: the conventional Egyptological

ones (the script writes none), or the Greek / Coptic form where it is the familiar one. **Familiar names keep their**
familiar Hebrew form (§3: `חורוס` , `אִיסִיס` , `אוֹסִירִיס`). In running notes write the transliteration in Latin
letters in backticks (`` `snk n mw` ``), as the dossier did.

3a. Grammar mapping (Egyptian → Hebrew)

Draft from the form, not from the German. The TLA's morphology (`data`) names the form; check it.

Middle Egyptian (Merikare, the Cow, the Pyramid Texts; Amenemope's archaizing passages):

- sḏm.n=f (past / perfect) → Hebrew past (עָשָׂה). In a relative form ("which he made") → אֲשֶׁר עָשָׂה.
- sḏm=f (the "aorist" / prospective / circumstantial – the TLA labels it suffixConjugation) → by context:
  general present (זוֹרֵחַ הוּא), future or wish (יְהִי ,יִחְיֶה), purpose after a main clause (כְּדֵי שֶׁ… or a bare
  future: עָשָׂה רוּחַ – יִחְיוּ). Say in the parse which reading you chose.
- sḏm.jn=f, ḥḥ.n sḏm.n=f, wn.jn=f ḥr sḏm (narrative "then") → וְאָז / אָז + past; **no vav-consecutive**.
- the stative ("old perfective", TLA pseudoParticiple) → adjective, participle or nominal clause, keeping its
  resultative force (זָקֵן ,שׁוֹכֵב הוּא; "his bones are silver" עַצְמוֹתָיו כֶּסֶף).
- jw=f ḥr sḏm / sw ḥr sḏm (progressive) → participle (וְהוּא שׁוֹמֵעַ).
- participles → אֲשֶׁר / הַ… …; the passive sḏm.tw=f → passive or impersonal (עָשׂוּ ,נַעֲשָׂה).
- n sḏm.t=f "he has **not yet** heard" / "before he heard" → טֶרֶם (§6.5: the Pyramid Texts' "not yet").
- n sḏm=f "he did not hear / cannot hear" and n sḏm.n=f "he cannot hear / has not heard": parse them; never guess.
- nn + infinitive / noun → אֵין; jmj=k sḏm / m sḏm (prohibitive) → אַל + future.
- the non-verbal sentences (X pw, "it is X"; jnk X "I am X") → nominal sentences (צָלְמָיו הֵם ,אֲנִי X).
- jn X sḏm (cleft: "it is X who hears") → X הוּא הַשּׁוֹמֵעַ.

Late Egyptian (Amenemope's main idiom; the Cow's later forms):

- m-jrj sḏm (the negative imperative) → אַל + future (6.2§ ,אַל תָּזִיז); the conjunctive mtw=k sḏm that follows
  continues the mood: after m-jrj it is **also prohibited** → וְאַל + future, or וְ… when the sense is "and so";
  after an imperative → וְ + imperative / future.
- the First Present sw ḥr sḏm, tw=k ḥr sḏm → participle (הוּא מְדַבֵּר); with a stative → adjective.
- the Third Future jw=f r sḏm → future; the negative future bn sḏm=f → לֹא + future.
- the negative aorist bw jrj=f sḏm "he does not (ever) hear" → לֹא יִשְׁמַע לְעוֹלָם / אֵינֶנּוּ שׁוֹמֵעַ?? – no
  לֹא יִשְׁמַע לְעֵת מִן הָעִתִּים / אֵין הוּא שׁוֹמֵעַ :(5§) עוֹלָם; habitual ḫr sḏm=f → וַהֲרֵי / וְאָז + present.
- the "second tense" j:jrj=k sḏm (emphasizing an adverb) → render the emphasis on the adverb (בְּזְהִירוּת עֲשֵׂה) or
  a plain imperative where Amenemope uses it as an exhortation (j:jrj=k sjꜥ "beware" הִזָּהֵר).
- jr X (topicalization "as for X") → הִנֵּה X (§10.1.6; אֲשֶׁר לְ־X only where it reads well); the circumstantial jw → וְ / כְּשֶׁ… … / a participle.
- the definite article pꜣ, tꜣ, nꜣ → הַ־; the possessive article pꜣy=f → the suffix (בֵּיתוֹ).
- the Late Egyptian ḥr before a verb (written or not, (ḥr)) is the First Present: participle.

Particles and connectives (fixed): ptr "look" → רְאֵה; ḥr-r-ḫ → וּבְכֵן; jst → וַהֲרֵי; m-ḏr "when" → כַּאֲשֶׁר; r-ḏd (quoting) → לֵאמֹר; ḏd=f "he says" → אוֹמֵר הוּא; j (vocative) → הוֹ; mj "like" → כְּ, mj "come!" → בּוֹא.

5. Reserved and gated Hebrew (checked by `egypt_tools.py verify`; the code's RESERVED list is authoritative)

5.1 Never in an Egyptian line (the Bible's own words; the apparatus compares them)

אֱלֹהִים, the root מבוּל, שְׁאוֹל, רָקִיעַ, בֹּהוּ, תֹּהוּ, תְּהוֹם, לִוְיָתָן, תַּנִּין, ברא, the root שבת, נְשָׁמָה, the roots נחם and עצב, מָחָה (Gen 6:7), the noun תּוֹרָה, אֲדָמָה, יָצַר, the roots נסג / סוג (הִסִּיג), שִׁחַד, עוֹלָם, בְּרִית, מִשְׁפָּט, צַדִּיק / צֶדֶק, זָרַת, גֵּר (fqꜣ = שָׂכָר), יָתוֹם.

5.2 Only for their source word (licensed by the line's transliteration or TLA lemma ids)

רוּחַ (ḫꜣw) · צֶלֶם (snn, twt, tjt) · דְּמוּת (twt, tjt) · טוֹב (nfr) · גְּבוּל (tꜣš/tšj) · אַלְמָנָה (ḫꜣr.t) · אֵיפָה (jp.t) · פֶּלֶס (jws) · מֹאזְנַיִם (mḫꜣ.t) · עָוֶר (kꜣmn) · פִּסֵּחַ (qbqb) · מוּסָר (sbꜣ.yt) · שְׁלֹשִׁים (the number 30) · הַחַם (šmm) · the fool words נָבָל / אֱוִיל / כְּסִיל (wḫꜣ, ḫm) · the loanwords of §4.2 (תֵּבָה, יְאֹר, סוּף, אָחוּ, פַּרְעֹה, חַרְטֹם, שֵׁשׁ, קֶסֶת, טַבַּעַת, חוֹתָם, שִׁטָּה, קוֹף).
The verb יָצַר only for qmꜣ (and qd? no: qd = בָּנָה).

5.3 Always vocalized (the verifier's traps)

רַא (Re; and never רע for him) · בָּא · מֹף · אוֹן · אֵלָה / אֵלַי / אֵלִים · הַחַם · מִין · גֶּבּ · פְּתָח · כָּא · נוּן · נוּת · שׁוּ · סֵת · שַׂאי · מַאַת · שֵׁשׁ.

5.4 False friends and traps

- Egyptian r "mouth" ≠ Hebrew רֹאשׁ; ḥr "face" ≠ חֹר; jb "heart" ≠ אָב; mw "water" ~ מַיִם (an Afroasiatic cognate? say so only with a reference); sn "brother" ≠ שֵׁן.
- nfr "good, beautiful" ≠ the name נֶפֶ- in compounds (Wn-nfr).

- the Late Egyptian article `pꜣ` ≠ Hebrew `פּה`; `nꜣ` ≠ `נָא`.
- **AED's German is a rank-3 translation** (guidelines §3): hidden from `data`; read `tr` only after drafting.
- **Modern-Hebrew traps:** `מוּסָר` reads as "morality" (and is: the Egyptian sbꜣ.yt is both; a note at 1.1);
  `הַחַם` reads as "Ham"; `תְּמְסָח` is unfamiliar (a note at its first occurrence).

6. Formulas (fixed Hebrew; enforced by regex in `egypt_tools.py`)

1. **The chapter heading** `ḥw.t mḥ-N.t` "the N-th house": `הַבַּיִת הָאַחַד־עָשָׂר`, `הַבַּיִת הָעֶשְׂרִים` … `הַבַּיִת הַשֵּׁנִי` … `הַבַּיִת הַשְּׁלֹשִׁים` … (cardinals with the article above ten); 3.8 `ḏd=f ḥw.t tp.t` `אוֹמֵר הוּא: הַבַּיִת הָרִאשׁוֹן`. One line each, nothing added. 27.7 `tꜣj 30 n ḥw.t` `שְׁלֹשִׁים הַבָּתִּים הָאֵלֶּה`.
2. **The prohibitive** `m-jrỉ X` = `אַל` + future; `mtw=k Y` after it = `וְאַל` + future (or `וְ` + future when it states
   the consequence: the translator says which in the parse).
3. **"Better X than Y"** `ꜥḫ X r Y` = `מוּטָב X מִ־Y` (9.5–8, 16.11–14: 9.6–8 = 16.12–14 identical, §7; 9.5 "poverty in the god's hand" ≠ 16.11 "praise and the love of men": only the frame `מוטב … מ…` is shared).
4. **The two men:** `pꜣ šmm` = `הַחַם`; `gr mꜥ` = `הַשּׁוֹתֵק הָאֲמִתִּי`; `pꜣ gr` = `הַשּׁוֹתֵק`.
5. **The Pyramid Texts:** `ḏd-mdw` "words to be spoken" = `דְּבָרִים לֵאמֹר:`; `n ḫpr.t X` "before X came into being"
   = `X טֶרֶם נִהְיָה` / `X טֶרֶם נִהְיוּ` [equivalent Gen 2:5 `טֶרֶם יִהְיֶה בָאָרֶץ`].
6. `tꜣ bw.t n pꜣ nṯr` = `תּוֹעֲבַת הָאֵל` (15.21 ,13.16; with `ꜥꜣ.t` "great" 14.3: `תּוֹעֲבָתוֹ הַגְּדוֹלָה`).
7. **The refrains of Amenemope** (§7): 3.17 = 5.18 = 17.15 (`jr jrỉ.y=k hꜣw=k jw nn m jb=k`); 4.2 = 7.10 (`wḏꜣ ḥꜥ.t=k ḥr-tp tꜣ`); 9.6–8 = 16.12–14 (9.5 / 16.11 differ); 22.5–8 = 23.8–11 (22.1–4 does not repeat); 5.8 = 5.13? (only the shared half); 6.4 = 6.12 except the last word.
8. The king's blessing `ꜥnḫ-(w)ḏꜣ-s(nb)` = `חַיִּים, שָׁלוֹם, בְּרִיאוּת`.

7. Fixed lines (enforced character by character, niqqud and marks ignored)

The refrains are fixed by their **first** drafted occurrence: the translator of AM drafts the first copy, and the
later copies copy it byte for byte (guidelines §5.2 "a fixed passage's plene form is fixed once"). The coordinator
writes them here after the first part, so that the verifier enforces them.

8. Amenemope ↔ Proverbs 22:17–24:22 and the Torah: the shared sayings (fixed before drafting)

The literature's pairings, **to be checked against the transliteration** (guidelines §5.2: a brief says "look for",
never "translate as"). The Hebrew of Amenemope renders the Egyptian; the Proverbs wording goes into the apparatus with
its tag, and the reserved words of §5 keep the translation from borrowing it. Each pair gets a row in the project's
parallels table.

10. Changes and proposals merged (by run and translator)

10.1 Round 4 run 3, sub 1 – Amenemope part 1 (1.1–7.10), merged 2026-10-23

1. **Fixed lines (§7)** from the first drafted copies: 3.17 = 5.18 = 17.15; 4.2 = 7.10; 5.19 = 17.16. The two trees 6.4 קצו מובא במטע / 6.12 קצו מובא אל מגרש־העצים; and 6.2 / 6.8 / הוא כעץ הצומח בפנים: בפרדס...: stay parallel (the Egyptian differs in the place word and the preposition).

2. **Verbs:** ḫn "return (a report, an answer)" = הֵשִׁיב (5.17 ,4.11 ,1.6; Prov 22:21 לְהָשִׁיב [equivalent]); ḫsf (+ wšb.t) "reply" = הֶחֱזִיר (תְּשׁוּבָה), ḫsf "ward off" = הָדַף (MK E135); wšb(.t) = תְּשׁוּבָה; ḥꜣḥ = עָזַב; jmm "give!" = תֵּן, rḏj "put" = שָׂם; jnj = הֵבִיא (passive מוּבָא); gmj = מָצָא; sꜣj = שָׂבַע; ṯm "be ashamed" = נִכְלַם; wsfꜣ = הִתְאַפֵּק; mdwj = (הַדִּבּוּר) דִּבֵּר; thꜣ = פּוֹגֵעַ / פָּגַע; ḥtp = (4.4§) נָח; zꜣw tw r "beware of" = הִשָּׁמֵר לְךָ מִ־.
3. **Nouns:** wḏꜣ (verb / noun) = שָׁלוֹם / שָׁלֵם, swḏꜣ = הֶחֱזִיק שָׁלֵם; wḏꜣ "storehouse" = אוֹצָר (the pun noted, 4.1); hꜣw "time, lifetime" = עֵת; kꜣrj "shrine" = מְקֻדָּשׁ (the dossier), ḥw.t-nṯr = בֵּית הָאֵל; the storm words ḏḥ ʿ סְעָרָה, pḫpḫ סוּפָה, qrjw רַעַם; fire ḫ.t אֵשׁ, stꜣ לֶהָבָה; tꜣ-rʾ "hot-mouthed" = לוֹהֵט־הַפֶּה (not חַם־הַפֶּה: the hot man's הַחַם is šmm's alone); jꜣw זָקֵן, ʿꜣ and wr גָּדוֹל; nb "lord" / "owner of" בַּעַל; smḥr "courtier" = רַע (הַמֶּלֶךְ) (1.4; also 27.17: 1 Kgs 4:5 רֵעֶה הַמֶּלֶךְ [equivalent]); sšꜣ "skilled" בָּקִי, jꜣw.t "office" מִשְׁרָה; jmj-rʾ X הַמְמֻנֶּה עַל X; nfr.y "grain" = בָּר ★ (always vocalized); ḥzw.t "favour" = חֵן; mḥy.t "north wind" = הַצָּפוֹן (Song 4:16; רוּחַ is ṯꜣw's).
4. **Animals:** msḥ (4.2§) תְּמְסָח; dby "hippopotamus" = סוּס־הַנָּהָר (יְאוֹר is jtrw's); wnš "jackal" = תַּן (vocalized תַּנִּים: unvocalized it is close to the reserved תנין).
5. **Semitic loanwords in Late Egyptian** take their Hebrew cognate, tagged [cognate]: ʿšq = (6.14) עָשַׁק, mkmr.t = מִכְמוֹרֶת (7.6; = the cross-corpus מִכְמוֹרֶת of *kamāru*: the same Semitic word).
6. **The topicalizer** jr X = הִנֵּה X (§3a's אֲשֶׁר לְ־ becomes לַחַם "bread" before הַחַם): §3a amended accordingly.
7. **Names:** Jʿḥ (the moon god) יָעֵחַ ★; Mnw-kꜣ-mw.t=f מִין־כָּמוּתָף; the §3 forms of Wn-nfr, Tnj, Ṯꜣ-wr, ꜣbḏw, Snw.t confirmed.
8. **Ruling (the coordinator):** the Akkadian corpora's cognate reservations (עָבַר only for *ebēru*, עָזַב for *ezēbu*, חָלַף for *etēqu* …) bind **Akkadian** source words; an Egyptian word with no Semitic cognate takes the Hebrew word of its meaning (one Hebrew per Egyptian lemma), so ḥꜣḥ = עָזַב stands. A Semitic loanword in Egyptian takes its cognate (item 5).
9. **Gate fix (egypt_tools.py):** the חם gate no longer reads לחם "bread" (with prefixes: בלחם, ולחם …) as the hot man (5.5 had been passed by [היתר שער]). The hot man after ל is licensed by šmm anyway, and the unvocalized trap still checks it.

10.2 Round 4 run 3, sub 1 – Amenemope part 2 (7.11–13.9), merged 2026-10-23

1. **Fixed lines (§7):** 9.6–9.8 = 16.12–16.14 and 8.10 = 13.9. **Correction of §6.3/§6.7 and §8:** the "better" saying is not a four-line refrain: 9.5 ꜣḫ pꜣ nmḥ m-ḏr.t pꜣ nṯr (מוטב הדלות ביד האל) and 16.11 ꜣḫ ḥs.wt m mr.wt n rmṯ differ; only 9.6–8 = 16.12–14.
2. **House 6:** rmnị = הֵזִיז, wḏ = אֶבֶן־גְּבוּל, hꜣd = פָּלַשׁ, ḫꜣr.t = אַלְמָנָה (as §4.3); 7.12 copies 1.19's Hebrew.
3. **Words:** jmꜣḫ "revered (dead)" = נִכְבָּד (3.5 bw-wꜣy moved to רָם־מַעֲלָה to keep it free); ḏbꜣ.t = (11.4) תֵּבָה, jp.t = (8.19) אֵיפָה [cognate: loanwords]; ʿḥʿw "lifetime" = מָשָׁךְ הַיָּמִים; snk "be greedy" = הִתְאַוָּה (never חָמַד); sḫṯ "trap" = צָד; sphị "lasso" = לָכַד בְּלוּלָאָה; nḥp "potter" = קַדָּר (יוֹצֵר stays qmꜣ's); ḥry.t "terror" = אֵימָה; ḫr.t "needs" = מְחְיָה.

4. **8.1** j:jrỉ=k sjꜣ r with an object = תַּכִּיר אֶת (recognize); §3a's הֶזָּהֵר stays for sjꜣ without an object.
5. **Ruling (ḫꜣꜥ):** עָזַב "leave, abandon" stays the rendering; ḫꜣꜥ "throw" (11.17, words thrown like a lasso) = הִשְׁלִיךְ – a split by sense of one Egyptian lemma whose two senses Hebrew must separate; noted at the line.
6. **Formula fix (egypt_tools.py):** the "better" formula no longer fires on the r inside ḥr-r-ỉ (8.16 had a [סטייה מן הנוסחה]).

10.3 Round 4 run 3, sub 1 – Amenemope part 3 (13.10–19.9), merged 2026-10-23 (the second translator)

1. **Verbs and nouns** (one Hebrew per lemma): shꜣ "pervert, cheat" = עִוֵּת (Lam 3:36, Amos 8:5 וּלְעַוֵּת מֹאזְנֵי מִרְמָה [equivalent]); sᶜḏꜣ = זָיַף; msḏj = שָׂנֵא, ḫbd = מְגֹאָה, bᶜꜣ = מָאַס; wšd = בֵּרַךְ, the greeting jꜣw.tw=k = "!יהלל לך"; gꜣnjsꜣ = כְּפָיָה; dns = (כְּבַד־מִשְׁקָל) כָּבֵד; wḥm = שָׁנָה; mj.t = דֶּרֶךְ, wꜣ.t = אֹרַח; rʾ "part (of a measure)" = פִּיּוֹת (rʾ stays פֶּה); ḏbᶜ "to seal" = טָבַע (חָתַם stays ḫtm's); ḥjy = פָּקִיד; ꜣ.tj "have-not" = חֲסַר־כֹּל (the poverty words now: nmḥ דַּל, twꜣ עָנִי, jꜣd אֶמְלָל, zꜣw-ᶜ חֲלַשׁ־זְרוֹעַ, ꜣ.tj חֲסַר־כֹּל); swꜣ "pass by" = חָלַף (snj has עָבַר); ḫꜣj = מָדַד, ḫꜣ.y = הַמּוֹדֵד; pr-ḥḏ = בֵּית־הַכֶּסֶף; dḥj = מִשְׁקֹלֶת; ḏnw "threshing floor" = מְדוּשָׁה (ḫtjw keeps 8.18 ,גֹּרֶן); jᶜnᶜ = בַּבּוּן, Hbj = הָאִיבִיס, Pr-Ḫmnw = בֵּית־חָמְנוּ; rwḏ.w = סוֹכֵן; ᶜḥwtj "tenant" = חוֹכֵר (item 2).
2. **Collisions settled (the coordinator):** ᶜḥwtj אָרִיס :(19.4) חוֹכֵר → אָרִיס is the Hebrew loan of Akkadian *errēšu* (the law corpus), and a cognate keeps its word (guidelines §5.2; this refines §10.1.8: an Egyptian word takes the Hebrew of its meaning, **but not a Hebrew word that is the cognate or loan of another corpus's source word**). rwḏ.w סוֹכֵן stays: in Gudea (*aĝrig*) and the Advice (*šatammu*) it is a sense rendering too.
3. **Loanword:** ktm.t "fine gold" = כֶּתֶם ★ [cognate: loanword] (§4.2, gated and always vocalized).
4. **ḫpr in the future** = יִהְיֶה (§4.4 amended: נִהְיָה has no living future).
5. **Open for part 5:** twr – 15.7 הֶנָּזֵר מִן (with r); the sense "respect" (25.7, 25.9, 26.14, 27.12) is settled by the part-5 translator, one Hebrew if the Egyptian sense allows.
6. Fixed lines 16.12–14, 17.15–16 copied byte for byte; 13.16 = 15.21 תועבתו 14.3 ;תועבת האל. הגדולה.

10.4 Round 4 run 3, sub 1 – Amenemope part 4 (19.10–24.20), merged 2026-10-23 (the second translator)

1. **Fixed lines (§7):** 22.5–22.8 = 23.8–23.11 (the refrain is these four lines; 22.1–4 does not repeat, §8 corrected in spirit).
2. **The court:** qnb.t = מוֹעֲצַת־הַשּׁוֹפְטִים (not בֵּית דִּין :דִּין is the Hebrew cognate of Akkadian *dīnu*, §10.3.2; not שַׁעַר, which would manufacture Prov 22:22); smtr חֲקִירָה, mtr עֵד; mᶜbꜣ.yt "the (court of) Thirty" = הַשְּׁלֹשִׁים (gated by the number); wḥm.w "herald" = מַזְכִּיר [equivalent 2 Sam 8:16].

3. **Words:** fqꜣ (4.3§) שָׂכָר, fꜣ.t "gift" מַשְׂאֵת, jnw מַתָּנָה; ḫtm (4.2§) חָתַם; stꜣ "protector" = מָגוֹן (TLA "Erlöser"; גֹּאֵל never, מָגֵן avoided); mnḫ (noun) מַעֲלָה, whꜣ כִּשָּׁלוֹן; rwj … rwj לָחוּד … לָחוּד; ḥrj "fear" פָּחַד, snḏ חָשַׁשׁ, mkḥꜣ הִתְעַלֵּם; šww הֵרִיק, ḫꜥꜣ רוֹקֵן (18.20 changed to מרוקנת); mꜣꜣ חָזָה, ptr רָאָה, nw הִבִּיט; sḏr יָשַׁן, qdd נָם; šfj.t יָקָר ★, nrw מוֹרָא; ꜥqw פַּת, tꜣ לֶחֶם; wꜣḥ שָׁת; sbj "laugh at" לָעַג (Prov 17:5 צָחַק; לעג is *ṣiāḥu*'s cognate), pjṯꜣ הִתֵּל; qs עֲצָמוֹת; kꜣmn / nmw / qbqb, ꜥmꜥ.t / dḥꜣ, qd as §4.3.
4. **Settled by the coordinator (the translator's open points):** mnḫ מַעֲלָה beside 3.2 מעלות (stairs) and 3.5 רם־מעלה (rank) – three senses of one Hebrew noun, kept: each is the natural word and no line confuses them (noted, not a collision of one sense); 21.13 bjꜣ.t "oracle, wonder" = מוֹפֵת? stays (נְבוּאָה and אוֹת would import a reserved theme; the TLA's "Orakel" in the apparatus); 22.1 by its own sense, Prov 23:11 in the apparatus.

10.5 Round 4 run 3, sub 1 – Amenemope part 5 (24.21–28.1), merged 2026-10-23 (the second translator)

1. **twr, split by construction** (settled by the coordinator: no Hebrew verb holds all three senses): with r "keep apart from" = (15.7) הִנָּזֵר מִן; with a direct object "respect" = הוֹקִיר (26.14 ,25.9 ,25.7); without an object "become pure" = (27.12) נִטְהַר; noted at the lines. wꜣš "honour" = כִּבֵּד (26.13; ↔ Prov 14:31 וּמְכַבְּדוֹ).
2. **The ship words, one Hebrew each** (the translator found and fixed a collision of part 4's jmw with part 2's sk.tj): sk.tj סְפִינָה, kꜣr סִירָה, jmw (20.5) כְּלִי־שַׁיִט, dp.t אֳנִיָּה; ḥmw "steering oar" מָשׁוֹט, ḥp.t מְשׁוֹט־חֲתִירָה, mḫn.t 20.6–20.5 ;מַעְבֹּרֶת changed accordingly.
3. **Words:** ḏrḏr "stranger" = נָכְרִי (גֵּר never); ḥnq.t = שֵׂכָר ★ always vocalized (unvocalized it reads fqꜣ's שָׂכָר); šrj זוּטָר, kd קָטָן, nḏs "young, lesser" צָעִיר (in the age sense; §4.1's אִישׁ פָּשׁוּט for the commoner), ḫrd נַעַר; ꜣ.t "back" גֵּו; ḫm (noun) בַּעַר; šfd "book, scroll" סֵפֶר; splits by sense noted at their lines: wꜣḥ חָדַל (26.10, beside 23.14 שָׁת), bꜥꜣ "waive (a fare)" פָּטַר (27.5), šdj "extract" (27.4) חִלֵּץ.
4. **27.7** ראה לך את שלושים הבתים האלה: (ptr n=k = 6.1§ ;רְאֵה לְךָ's שְׁלֹשִׁים הַבָּתִּים הָאֵלֶּה kept inside it); **27.16–17** (המלך) רַע ראוי להיות ראוי שעצמו את ימצא / – שהוא בקי במשרתו סופר הנה […]. (מָהִיר, מְלָאכָה only in the apparatus).
5. **Gate fix:** the יאור licence now includes the spelling jwtwr (26.16; the same TLA lemma tla33370 as 27.2).

10.6 Review pass (a), fidelity, the whole text (2026-10-23)

1. **A converter bug found by the reviewer:** `egypt_tools.py` `_alt_gaps` printed AED's `<gap/>` between two **multi-word** analyses as `[...]`, so the drafts showed eight false lacunae and translated both analyses side by side (14.7, 16.8, 18.12, 22.2, 22.4, 23.16, 25.15, 27.8; the notes at 22.2, 22.4, 25.15 called it a scribal doubling). Fixed: every single gap inside an AM line is now `/` (14.10 too: the TLA's German marks no loss); each line is translated once, with the other analysis in the 22.4 / 22.2 פירוק. read "he injured me" (`פגע בי`), not the TLA's first "I injured": the man seeking a patron is the victim, and 22.8's "them" are those who harmed him.
2. Fidelity fixes: 8.4 `נלקחו` (passive sḏm=f, past), 8.19 `שנתן` (jw + sḏm=f, past circumstantial), 10.6 `אל תשמח לך` (n=k restored), 13.5 `שהוא נצמד אליו` (the relative form's subject), 16.16 `(את עצמך)` (not written). No negation or tense misread in the whole text.
3. The §9 gate sample of 18.21 aligned with the drafted line (`הנוטלת שתיים`).

10.7 Review pass (b), consistency (2026-10-23)

1. **Throw / leave:** ḫꜣʿ = `עָזַב` in all its lines; ḫꜣʿ "throw (words)" 11.17 = `הֵטִיל` (not `הִשְׁלִיךְ`, which is qmꜣm's, 9.10; qmꜣm "rush" 22.18 `הִסְתָּעֵר` by sense). Supersedes §10.2.5.
2. **wꜣḥ, split by sense:** `שָׁת` "set" (2.3, 23.14), `הִשְׁאִיר` "leave behind" (10.9), `הִרְפָּה מִן` "leave off" (26.10); `חָדַל` is jꜣb's alone (17.1). Supersedes §10.4.3 / §10.5.3 on wꜣḥ. rḏj "let" = `אַל` `הִנִּיחַ` (`תַּנִּיחַ`.
3. ḫꜣb "bow" = (25.11 ,5.12) `הִרְכִּין`; bgꜣ "be slack?" = `הִתְרַשֵּׁל` (4.10; qbb and ṯnj keep `חָלַשׁ`); 11.19 (9.2) `הַשֵּׁכָר`; `איש כשיעורך` 25.4 = and (18.2) `אֵל` vocalized.
4. **The cognate rule of §10.3.2, narrowed (the coordinator):** it applies to **loanwords and rare technical words** whose very presence would suggest a lexical contact with another language (`אָרִיס` < *errēšu*), not to the **common Semitic vocabulary** that every corpus uses for its own word: `אַלְמָנָה` (Akk. *almattu*), `שֵׁכָר` (*šikaru*), `מִדָּה` (*maddattu*), `טִיט` (*ṭiṭṭu*), `תֶּבֶן` (*tibnu*), `כָּבֵד` (*kabtu*) are shared words: in an Akkadian line they carry [cognate], in an Egyptian line [equivalent] (Egyptian has no cognate), and the comparisons with Prov 23:10, Lev 19:35, Job 33:6, Ex 5:7 stand.

10.8 Round 4 run 3, sub 2 – Merikare E130–138 and the Pyramid Texts 571, 486, 527, 600, merged 2026-10-23 (translator 1)

1. **Names:** Nfr-kꜣ-Rʿ `נֶפְרְכָּרֶע`, Mry-Rʿ `מְרִירַא`, Nmtj-m-zꜣ=f `נֶמְתִּי־אֶם־סָאֶף`, Srq.t `סֶרְקֶת`, Atum-Khepri `אָתוּם־חֶפְרִי`; Ḥw.t-bnw `בֵּית־הַבָּנוּ`, sḫ.t-ḥtp `שְׂדֵה־הַקוֹרְבָּנוֹת` (plene), nn.t `שְׁמֵי־הַמַּטָּה`.
2. **The Heliopolitan words:** psḏ.t (the Ennead) = `התשיעייה` (plene), psḏ.t ʿꜣ.t = `התשיעייה הגדולה`, the dual `שתי התשיעיות`; bnbn = `הַבָּנְבָּן`; qꜣꜣ "the high hill" = `גִּבְעָה` and qꜣj = `גָּבֵהּ` (the sound-pun `גבהת כגבעה`; qꜣj of nails, PT486 59, `ארך` – a split by sense); kꜣ = `כָּא`, ʿ kꜣ = `זרוע־כָּא`; mḥr = `פירמידה` (as AM 2.9).

3. **Verbs:** wdj "put" = שָׂם (sharing rḏj's "put"; rḏj "give" = נָתַן, rḏj "let" = הִנִּיחַ); dr "drive away" = הִרְחִיק (MK E130; הָדַף stays ḫsf's); ḥḏj = הִזִּיק לְ־ (MK E132, as AM); ṯs "join, tie" = קָשַׁר (MK E133; ṯsj "raise" = הֵקִים); mꜣꜣ = חָזָה (MK E133, as AM); dnḫnḫ = סוֹכֵךְ; nḏ "protect" = שָׁמַר (nḏ ḥr, the greeting, = שָׁלוֹם לִפְנֵיכֶם: a split by construction); ḫwj + ḫpr = הֵגֵן לְבַל יִהְיֶה; ḏꜣj "ferry across" = צָלַח (2 Sam 19:18). The Akkadian corpora's reservation of the root שמר (for *naṣāru* = נָצַר) binds Akkadian words only (§10.1.8).
4. **Nouns and particles:** ḫnnw = מְרִיבָה; snḏ (noun) = יִרְאָה; j.ḫm-sk = בִּלְתִּי־כָלָה; n-ḏ.t-ḏ.t = עֲדֵי עַד; hꜣ = הוֹי; the particle m "behold" = הִנֵּה; sꜣ-ʿ / zꜣw-ʿ = חֲלַשׁ־הַזְּרוֹעַ in MK too.
5. **The rubric** ḏd-mdw zp N = דְּבָרִים לֵאמֹר, N פְּעָמִים: (a variant of §6.5).
6. **Ruling (the coordinator) – kꜣ.t "work" (tla163020) = מְלָאכָה**, not translator 1's מפעל (Modern "factory"): מְלָאכָה is the natural Hebrew for a god's or a builder's work (Ex 36 of the Tabernacle's building), and the Memphite Theology's "work" beside "Ptah rested" then shows Gen 2:2 מְלַאכְתּוֹ as an [equivalent] (as Akkadian *šipru*, guidelines §6.7). kꜣ.t "thought" (tla162980) keeps (4.4§) מַחֲשָׁבָה. PT600's lines are aligned by translator 1 in its next part.
7. **The Merikare dossier aligned:** E130, E132–E136 of ../מיתוסים-אוגריתיים/3-תיק-היום-החמישי/annotated-MK.rtl.md now carry this project's Hebrew (dr הרחיק, ḥḏj הזיק ל־, mꜣꜣ חזה, ṯs קשר, sꜣ-ʿ חלש־הזרוע, the base's brackets, plene המאורעות / תאוות); its notes adjusted; dossier_tools.py verify --strict 0 problems.

10.9 Round 4 run 3, sub 2 – the Memphite Theology (1a–64), merged 2026-10-23 (translator 1)

1. **ḥtp = נָח in every verbal use** (MT 9, 15c, 29b, 59, 60, 61): Ptah's rest (59) is the same word as the reconciliation of Horus and Seth; the noun of the heart's content (60) נַחַת; ḥtp / ḥtp.t "offering" = קָרְבָּן. The root שבת only in the apparatus.
2. **The theology's words:** kꜣ.t = (10.8.6§ ;57 כל מלאכה וכל חרושת) מְלָאכָה; ḥmw.t "craft" = חָרֹשֶׁת (אָמָּנוּת would bring the loan אָמָּן < *ummânu*); kꜣꜣ.t "thought" = מַחֲשָׁבָה; wḏ.t-mdw = צִוּוּי־דְּבָרִים; md.t-nṯr = דְּבַר־אֵל; pr.t m ns = מוֹצָא הַלָּשׁוֹן; ʿrqj.t = הֲבָנָה; mꜣṯ "devise (a name)" = הָגָה; the theology's heart is Ḥꜣ.tj לֵבָב throughout (jb לֵב in 60–61).
3. **Verbs and nouns:** swt = הוּא (the independent pronoun, with El Hawary); jʿb = אָסַף; dmḏ = צֵרֵף (smꜣ = אִחֵד); snsn = הִתְחַבֵּר; ḫnm = דָּבַק; wpj-ḫ.t "first-born" = פֶּטֶר־בֶּטֶן (Ex 13:2 פֶּטֶר רֶחֶם [equivalent]); jwʿ.t / jwʿw = יוֹרֵשׁ / יֵרֵשָׁה; msḫn.t = אָבְנַיִם (Ex 1:16 [equivalent]); ḫm "shrine" = דְּבִיר; ḏ.t "body" = גְּוִיָּה.
4. **Names and titles:** Zkr סוֹכַּר ★ (always vocalized: "sugar"); Nn.t נוּנֶת; Nfr-tm נֶפְרְתֵּם; Wpj-wꜣ.wt וָפְוָאוֹת; Ḥw.t-kꜣ-Pṯḥ בֵּית־כָּא־פְּתָח; njsw.t-bjtj מֶלֶךְ־הַדְּרוֹם־וְהַצָּפוֹן, bjtj מֶלֶךְ־הַצָּפוֹן; tꜣ-šmʿw / tꜣ-mḥw אֶרֶץ־הַדְּרוֹם / אֶרֶץ־הַצָּפוֹן.
5. **Rubrics:** ḏd-mdw X ḫft Y = דְּבָרִים לֵאמֹר, X אֶל Y:; the scene labels חוֹרוּס: הַצָּפוֹן.; the stone's empty space (Spatium) ( ) = (רווח ריק).
6. **Gates widened (the coordinator):** the גבול licence now includes El Hawary's spelling ṯꜣš (MT 9), the דמות licence ṯj.t (MT 53); the two [היתר שער] notes removed.

7. The transcription (TSV) checked against the page images at the flagged points (30b [Stš], 61 šnw.t, 59 Ḏḥwtj): no error found.

10.10 Round 4 run 3, sub 2 – the Heavenly Cow, columns 1–48, merged 2026-10-23 (translator 2)

1. **The Cow's formulas:** ḏd.jn ḥm n X = אָז אָמַר הוֹד מַלְכוּת X; ḏd.jn=sn ḫft ḥm=f = אָז אָמְרוּ נֹכַח הוֹד מַלְכוּתוֹ; nṯr.t tn = הָאֱלָה הַזֹּאת; the aetiologies ḫpr X pw = כָּךְ נִהְיָה X (gender and number); jy.wj m-ḥtp = בּוֹאִי בְּנַחַת (the ḥtp family stays in נוח).
2. **Names:** ꜣbw (Elephantine) יֵב ★ (the name of the Aramaic papyri's colony; not a biblical name); Nn-nsw (Herakleopolis) חָנֵס [equivalent Isa 30:4]; Jmꜣw אִימָאוּ; Ḥḥ.w אֱלֵי־חַח ★; ḫnsktj בַּעַל־הַצַּמָּה.
3. **Words:** md.t "plot" = דָּבָר (the same lemma as AM's "word"); smꜣ הָרַג, šʿ.t "slaughter" טֶבַח; mkj "protect" נָצַר (Egyptian: the Akkadian *naṣāru* reservation binds Akkadian only, §10.1.8); šbb.t "mash" בְּלִיל (Sekhmet "the mash of the night", 15; the beer mash, 18); sḏr.t "sleeping-draught" מַשְׁקֵה־שֵׁנָה; wꜣj "plot" (רָעָה) חָרַשׁ; wrd "be weary" עָיֵף; jḥ.t / jd.t עָגְלָה / פָּרָה; ḥr.t "the upper sky" מָרוֹם; mnʿ / mnʿ.t אוֹמָנֶת / אָמָן; ḥḥ "millions" אַלְפֵי אֲלָפִים; wjꜣ (the sun's bark) צִי ★ (Isa 33:21; every other ship word is taken, §10.5.2); ḥmy.t "rudder" הָגָה ★.
4. **Collision settled (the coordinator):** fꜣj "lift, carry" = נָשָׂא (35 ,21 and later; fꜣj ḥr = נָשָׂא פָּנִים, the Hebrew idiom); rmnị "carry (on the shoulders)" in PT486 59–60 moves from נשא to סָבַל (יסבלו), a split by sense from AM's rmnị "remove" הֵזִיז (noted at the lines).
5. **Kept, recorded:** psḏ (MK E135) and sꜣ (the cow's back, HC) both גַּב – two Egyptian words for the same body part, never in one line; AM's ꜣ.t keeps גֵּו.
6. **Echo control held:** Re's change of heart is rendered only in the Egyptian's words (15 "Do not diminish them!", 20 "I will protect mankind from her", 27 "my heart is very weary of being with them"); the beer "fills" the fields (mḥ מָלֵא); the flood only in the notes. The Tutankhamun shrine has nothing of 1–48 (Hornung p. 33: only his verses 202–234, 306–312 and the cow's picture); its differences in the cow drawing (44–48) are noted from Hornung's notes 114–120.

10.11 Round 4 run 3, sub 2 – the Heavenly Cow, columns 49–95, merged 2026-10-23 (translator 2)

1. **The ba:** bꜣ בָּא ★, plural bꜣ.w בָּאִים ★ (בָּאוֹת rejected); הַבָּא and its prefixed forms always vocalized; אֱלֹו "his god" vocalized.
2. **Serpents and magic:** ḥfꜣw / ḥfꜣ.t = נָחָשׁ (the dossier's comparison word for every culture's serpent; תַּנִּין never); msḥ.w תַּמְסָחִים; ḥkꜣ.w "magic" = קְסָמִים; the TLA's "magician" lemma = the god חָקָא where it is one being (60, 87–90), קוֹסְמִים in the plural (95) – a split by number, recorded; ꜣḫ.w "spells, efficacy" = סְגֻלּוֹת.

3. **Thoth and the court:** s.tj "deputy" = מְמַלֵּא־מָקוֹם (keeps the pun on s.t מָקוֹם); ʯꜣtj = וְזִיר (the cross-corpus word of *sukkallu*: [equivalent] here); the second ibis word and the baboon word transliterated (בַּבּוּן ;עַנְעַן ,תְּחֶנִי is AM's jʿnʿ).
4. **Purity:** wʿb = טָהוֹר (AM 27.12's twr "become pure" נִטְהַר shares the root: kept, two Egyptian words of purity, never in one line); bd "natron" = בּוֹרִית (Jer 2:22; נֶתֶר kept free); j-gr.t "the silent land" = הַשּׁוֹתֶקֶת (the root of AM's gr הַשּׁוֹתֵק); ḥr.t-nṯr = נַחֲלַת־הָאֵל.
5. **Eternity:** nḥḥ / ḏ.t = עַד / נֶצַח; as two divine names נֶצַח וָעֶד. Column 49 jw=j jm=j "I am there (as) I" = אֲנִי (הוּא) אֲנִי (Hornung's "Ich bin, der ich bin" has a verb and a relative the Egyptian lacks; Ex 3:14 in the apparatus).
6. **Gate widened (the coordinator):** השיג (Hifil of נשג "reach") is no longer caught by the סוג / נסג gate; it is licensed by pḥ "reach" (MK E138, HC 29, 94) in its own gate.
7. Part 1 aligned by the translator: 26 שולט 28 ,**המצב?** (שַׁלִּיט is ḥqꜣ's word).

10.12 Review pass (b), consistency, projects 2–3 (2026-10-24)

1. **New fixed words** (each the earlier text's word where one existed): šꜣs "hasten" שׁוּט (HC 17, 57; רוּץ stays sjn's); wḏꜣ "go, proceed" נָסַע (MT 28b, HC 33; הָלַךְ is šm's); ʿḥ "palace" אַרְמוֹן (MT 64, HC 34), stp-sꜣ בֵּית־הַמֶּלֶךְ, šny.t חָצֵר; wpj "judge between" פָּסַק (בֵּין) (MT 7, 12a; AM 8.12); swḏ "hand over" מָסַר (MT 53; AM 21.17); smn קָבַע (HC 85; AM, PT486); ḥꜣw "abundance" שָׂפַע (HC 81; AM); jḫ.t "property" רְכוּשׁ (HC 83; AM); ꜣḫ.w (HC 57) גְּבוּרוֹת סְגֻלָּה is the law corpus's cognate of *sikiltu*: §10.11.2's סְגֻלּוֹת withdrawn); ḫw "deeds" מַעֲלָלִים (HC 35; the root זמם is MK E136's ḫꜣk.w-jb); njsw.t paired with bjtj = מֶלֶךְ־הַדָּרוֹם (MT 4, 8; the title njsw.t-bjtj מֶלֶךְ־הַדָּרוֹם־וְהַצָּפוֹן as §10.9.4); sꜣ-Rʿ בֶּן רַא (MT, HC 95); mꜣꜣ חָזָה (HC 74, as §10.8.3).
2. **Splits by sense, recorded at the lines:** njs הִכְרִיז / קָרָא; šdj חִלֵּץ / קָרָא; qmꜣ הִשְׁלִיךְ / יָצַר (qmꜣm, AM 9.10); ḫpš כָּתֵף / שׁוֹק; spr הִתְיַצֵּב / הִגִּיעַ; pḥ הִשִּׂיג / הִגִּיעַ; ḥꜣ מֵאֲחוֹרֵי / סָבִיב.
3. **Two lemmas in one Hebrew word, kept (never in one line):** wꜣj / ḥrj רָחוֹק; zꜣw / nḏ שָׁמַר; šww (AM 13.3) / sšp אוֹר; bw / s.t מָקוֹם; md.t / jḫ.t דָּבָר (besides §10.10.5, §10.11.4).
4. **Spelling:** the formula of §6.5 keeps the fixed spelling דברים לאמר: (the verifier's form, the biblical spelling of the infinitive); elsewhere the plene לאמור (AM, HC) – both accepted. Plene in vocalized words: אמיתי ,אוֹדָם ,קורבן ,שְׂדֵה־הַקּוֹרְבָּנוֹת (§4.1's אֲמִתִּי strips to the plene אמיתי in drafted lines).
5. **Changed (2026-10-30 harmonization, row 8):** ḥr.t-nṯr = חֶלְקַת־הָאֵל (HC 93; was נַחֲלַת־הָאֵל, kept here earlier by the coordinator): *ḥr.t* is "portion, possession"; נַחֲלָה is the Ugaritic *nḥlt*'s cognate (Mot's land, KTU 1.4 VIII), and נַחֲלַת ה' would read as the biblical inheritance (a false echo). **Kept (the coordinator, §10.7.4):** MT's פֶּטֶר־בֶּטֶן (common Hebrew, not a loan or rare technical word).

10.13 The fifth-day dossier's Egyptian additions (WC: pWestcar, the wax crocodile; AP: pBremner-Rhind, Apophis), 2026-10-24

In ../מיתוסים-אוגריתיים/3-תיק-היום-החמישי/ (KEYs WC, AP), following this corpus: msḥ תִּמְסָח, ḥf / ḥfꜣw נָחָשׁ, Re רַא ★, ḥry-tp חַרְטֹם [cognate: loanword] (the full title הַכֹּהֵן־הַקּוֹרֵא הַחַרְטֹם), ḫꜣꜥ "throw" (10.7.1§) הֵטִיל, ḫpr m נִהְיָה לְ־, šꜣs שׁוּט (§10.12.1; its past שָׁט shares the letters of MK E133's sqdj שָׁט "sails" – two verbs, never in one line), sḏ.t שַׁלְהֶבֶת, ḫ.t אֵשׁ, sḫr "overthrow" הִכְרִיעַ, mḏꜣ.t "book" מְגִלָּה; new: mnḥ "wax" שַׁעֲוָה, š "lake" אֲגַם, ḏꜣ.t "depth" עֹמֶק, ḥry-pr "steward" סוֹכֵן הַבַּיִת, hbnj הָבְנִים [cognate: loanword, Ezek 27:15]. The dossier's own gates check them.

- **2026-10-30 harmonization** (../harmonization--2026-10-30.md, row 8): ḫr.t-nṯr = חָלְקַת־הָאֵל (was 10.12§ ;נַחֲלַת־הָאֵל item 5). Changed line: HC 93 חי בחלקת־האל → חי בנחלת־האל (gloss and note; the parallels indexes rebuilt).

11. The tales and Book of the Dead 125 (Round 5 run 6, 2026-10-31; fixed by the coordinator before the first line)

Why here, not a new corpus. The tales share this corpus's language (Middle Egyptian: Sinuhe, the Shipwrecked Sailor,
Westcar, BD 125; Late Egyptian: the Two Brothers, as Amenemope), its base (AED-TEI), its tool and its renderings; BD 125's
forty-two denials are the other face of Amenemope's ethics ("no one is sinless"), and Westcar's wax crocodile is
already in the fifth-day dossier from this corpus's words. A new corpus would have duplicated the renderings and
opened splits for the lead to harmonize; the folder name stays (renaming breaks the print stubs), corpus.md says
that it now holds the tales too.

11.1 The texts (KEYs)

KEY	Text	Base (AED-TEI)	Lines (labels)	Project
TB	The Tale of the Two Brothers, pD'Orbiney (pBM EA 10183) recto, Late Egyptian, c. 1200 BCE (Seti II)	`AED-TEI/Two-Brothers--pDOrbiney-BM-EA-10183/`	185 (page,line `1,1`–`19,10`, the colophon `20,1`)	`4--מעשה בשני-האחים/`

Sinuhe: R 24 = B 1 (`njs.n=tw n wꜥ jm …`); B's Amherst fragments (`Am.`, `An.` …: its lost start, parallel to R)
and AOS (the Ramesside ostracon, nearly the whole text) are witnesses for the apparatus.
pWestcar 2,21–4,7 (the
wax crocodile, 27 lines) is the fifth-day dossier's excerpt WC: the WE file copies the dossier's `>` lines byte for
byte (`verify WE` checks it); the dossier is **not** edited from here: a revision is written in the WE entry as
`[סטייה מן התיק: <reason>]` and listed for the lead.

1. BD 125 B (21–62): j X prj̓.m Y n jrj̓=j Z = הוֹ X, מִ֫ן־הַיּוֹצֵא Y: לֹא עָשִׂיתִי Z. (the vocative j = 3§ , הוֹ a; prj̓.m = מִ֫ן־הַיּוֹצֵא; the denial's verb by its own Egyptian verb). Fixed by its first line (21); checked by the
verifier's formula (הוֹ … היוצא).
2. BD 125: jw=j wʿb.kw (×4) = טָהוֹר אֲנִי (the zp-4 "four times" as (אַרְבַּע פְּעָמִים)).
