Corpus: rituals of sending away and of purification → Hebrew (`טקסי-שילוח-וטיהור/`)

▼ Contents

Goal 1
The texts 2
Shared conventions 2
Status 2

Read `../translation-guidelines.md` first, then this file, then `renderings.md` here and the Hittite tables of
`../חוקים-ובריתות/renderings.md` (§7, §H2–§H9), the translator brief `../חוקים-ובריתות/translator-brief--hittite.md`,
and the project's `project.md`.

Goal

The rites that remove evil from a person, a camp, a house or a land by loading it on a carrier and sending it away, or
by purifying with blood, water and substitutes: the ancient world's answers to the question of Lev 14 and 16 (the goat
for Azazel, the released bird) and Lev 4, 8, 12, 15 (purification). Founded 2026-10-24 (Round 4 run 6) with the Hittite
elimination rituals; the place for the later dossier of world list §5E (`../curated-translation-candidates--world.md`:
Ebla ARET 11, KTU 1.40, the Kizzuwatna blood rites, the Norito Ōharae, the Iguvine Tables …) and for Muršili's Plague
Prayers if a later round wants them beside the rites.

The texts

#	Project folder	Text	Language, date	Relation to the Torah
1	`1--טקסי-השילוח-החתיים/`	The elimination rituals of **Ašḫella** (CTH 394), **Uḫḫamuwa** (CTH 410), **Puliša** (CTH 407), **Ambazzi** (CTH 391.1–2)	Hittite with Luwian words; Arzawa / Kizzuwatna traditions, NS copies (14th–13th c. BCE)	Lev 16:8–10, 20–22 (Azazel); Lev 14:4–7; 1 Sam 6; Zech 5:5–11

Shared conventions

- The Hittite language tables (names, gates, formulas, traps) are shared with the law corpus and read by `../tools/hittite_tools.py` from both renderings files; this folder's `renderings.md` adds the ritual terms (§R1) and the ritual names (§H2).
- The danger and the method: `renderings.md` (intro). The Lev 14 / 16 words are gated to their real Hittite counterparts or reserved; the comparison lives in the apparatus.
- Parallels index: each project's in its `project.md`, merged here in `parallels-index.md` by Bible verse.

Status

#	Project	Status
1	`1-טקסי-השילוח-החתיים/` (AS 109, UH 33, PU 56, AM 260, AM2 23 clauses)	**Complete** 2026-10-30 (Round 4 run 6 sub 4): drafted by one Opus translator in four parts, three review passes, intros, built (`translation.rtl.md`), 102 parallels rows, print stub `../הדפסה/טקסי-שילוח-וטיהור/1-טקסי-השילוח-החתיים.rtl.md`.

The corpus tool is `../tools/hittite_tools.py` (keys AS, UH, PU, AM, AM2); the parallels index is built by `build_parallels_index.py` here (it also writes each text's "Part <KEY>: parallels index" into the project's `project.md`).
