Created 2026-10-30 by Round 5 run 2 (`curated-translation-candidates.md`, "Round 5 plan", run 2; world list Tier 2 #9).
The myths of the Hittite archives of Ḫattuša (17th–13th c. BCE), all in Hittite: the songs translated from Hurrian (the
Kumarbi cycle, Ḫedammu, the Song of Release – its Hittite side), the Old Anatolian myths told for a festival or a ritual
(Illuyanka, Telipinu), and three tales (Zalpa, Appu, Elkunirša – the last from Canaan). The corpus's tool is the Hittite
tool of the folder, `tools/hittite_tools.py` (keys below); its tables: `renderings.md` (§H2–§H9, the myth keys only) and
the law and ritual corpora's Hittite tables (every Hittite text).

Projects and texts

Project	KEY	Text	Base	Lines
1--אילויאנקה וחדמו/	IL	The Illuyanka myth (CTH 321), both versions, with the priest Kella's frame; IL 8–17 = the fifth-day dossier's excerpt (KBo 3.7 i 9–20), kept identical by `verify IL`	HPM, Rieken et al. (CC BY-SA)	128
	HE	The Song of Ḫedammu (CTH 348.I.1–29: the 29 fragments as HPM edits them, in its order); HE 6:13–19, 21:12–16, 2:5–22, 4:10–39 (60 lines) = the fifth-day dossier's excerpt HD (`../מיתוסים-אוגריתיים/3-תיק-היום-החמישי/annotated-HD.rtl.md`, copied 2026-11-02), kept identical by `verify HE`	HPM	698
2--מחזור קומרבי/	KU	The Song of Emergence ("Kingship in Heaven", CTH 344)	HPM	296
	UL	The Song of Ullikummi (CTH 345.I.1–3.2 = tablets 1–3, and the fragments 345.I.4–10)	HPM	812
3--שירת השחרור/	SR	The Song of Release (CTH 789), **the Hittite side only** (the Hurrian lines of the bilingual are out of scope): the main tablets KBo 32.13 (Allani's banquet), 32.14–16 (the parables), 32.19 (the assembly of Ebla), and the fragments 32.10, 32.17	our composite from TLHdig 0.3 (CC BY 4.0), `composite-SR.tsv`	422
4--זלפה-אפו ואלקונירשה/	ZA	The Tale of Zalpa (CTH 3.1), the Old Script tablet KBo 22.2 (its New Script duplicate KBo 3.38 is not in TLHdig)	our composite from TLHdig, `composite-ZA.tsv`	36
	AP	Appu and his two sons (CTH 360.1–4)	HPM	204
	EL	Elkunirša and Ašertu (CTH 342.1.1–2.5: two versions in eight fragments)	HPM	301
5-טליפינו/	TE	The Telipinu myth, first version (CTH 324.1)	HPM	267

Left for later (recorded, not translated): the other Telipinu versions (CTH 324.2–9) and the related vanishing-god
myths (CTH 322–335); the Kumarbi fragments (CTH 346.1–21; fetched to `sources/HPM/`); the 67 small Hittite fragments of

the Song of Release outside the main tablets (≈ 490 lines in TLHdig `CTH-789/`); the Hurrian side of the Song of Release;
the Hittite Gilgameš (CTH 341.III), Kešši, Gurparanzaḫ, the Sun-god and the fisherman, the Song of Silver, LAMMA (all in
HPM, not in this run's plan).

Labels

- An HPM text with one edition (IL, KU, TE): the edition's clause numbers ("kola"), the HPM citation form "CTH 321 §2,
  kolon 8".
- An HPM text in several editions (HE, UL, AP, EL): `<fragment>:<clause>`, the fragment as the last part of the CTH
  number (HE `6:3` = CTH 348.I.6 kolon 3; UL `3.1:45` = CTH 345.I.3.1 kolon 45; EL `2.1:18` = CTH 342.2.1 kolon 18).
- Our composites: SR `<tablet>.<§>.<n>` (KBo 32.14 → `14.3.5` = the 5th Hittite line of its 3rd paragraph); ZA `<§>.<n>`.
  The manuscript line is in the TSV and printed by `data`.

Reading order

IL → HE (the serpents; the dossier) → KU → UL (the Kumarbi cycle: kingship in heaven, then the stone that reaches heaven)
→ SR → ZA, AP, EL (the tales) → TE.

Status

First draft complete (2026-10-31, Round 5 run 2): all nine texts, 3,164 lines – drafted by four translators, three
review passes (fidelity, consistency, Hebrew), intros, built clean translations (`translation.rtl.md` per project), print
stubs in `../הדפסה/מיתוסים-חתיים-וחוריים/`, the parallels index (216 rows, key findings at its top). Not yet reviewed by
the user. Pending for the lead: the splits of `renderings.md` M3. Done at the Round 5 finalization (2026-11-02): the four dossier
revisions of `renderings.md` §H8 applied to the dossier's IL (the table is empty now); Ḫedammu in the dossier (key HD:
60 lines of HE, copied byte for byte; `hittite_tools.py verify HE` keeps them identical, as `verify IL` does for IL 8–17). Details per text: each `project.md`.
