Scope

Passages of Mesopotamian literature that **mention** the flood or its survivor without narrating it. One section per text, in the same order in `annotated.rtl.md` and `translation.rtl.md`:

§	Text	Language	Extent translated	Base edition
1	**Sumerian King List** (SKL), ETCSL 2.1.1	Sumerian	ll. 1–47 (kingship descends; Eridu … Šuruppag; "the flood swept over"; kingship descends again to Kiš; Ĝušur, Kullassina-bēl). WB 62 variant: in a note (from Jacobsen 1939)	ETCSL composite (= ORACC Q000371 lemmatisation)
2	**Instructions of Šuruppag**, ETCSL 5.6.1	Sumerian	ll. 1–13 (prologue)	ETCSL (= ORACC Q000782)
3	**Death of Bilgameš**, ETCSL 1.8.1.3, Me-Turan version, Segment F	Sumerian	F 3–41 (the dream: the gods' verdict; Ziusudra; the rites; Enki on the flood; the oath) + the variant lines F 123–128 of the repetition	ETCSL (= ORACC Q000363)
4	**Rulers of Lagaš**, ETCSL 2.1.2	Sumerian	ll. 1–31 (after the flood: mankind without tools or irrigation) and 99–108, 117–124 (the first named rulers); 32–98 summarised (broken)	ETCSL (= ORACC Q000372)
5	**Poem/Ballad of Early Rulers**, ETCSL 5.2.5	Sumerian (OB Sippar)	ll. 6–21 (the whole preserved composite)	ETCSL (= ORACC Q000789)
6	**Gilgameš SB I 1–28**	Akkadian	ll. 1–28 (prologue: "he brought back a report from before the flood", l. 8; the Seven Sages laid Uruk's foundations, l. 21)	eBL (George, rev. Rozzi, Jiménez)
7	**Erra and Išum I 126–162**	Akkadian	ll. 126–162 (Erra's question; Marduk's account of "the" flood, its aftermath, the sages sent down to the Apsû); ll. 170–172 in a note	eBL (Jiménez et al.)

§	Text	Language	Extent translated	Base edition
8	**Dynastic Chronicle** (ABC 18 / Glassner 1)	Sumerian–Akkadian bilingual	BM 35572 1′–18′ (opening) and K 11261+ 1′–19′ (antediluvian section to the flood)	**new source:** eBL Fragmentarium transliterations
9	**Uruk List of Kings and Sages** (W 20030/7)	Akkadian	the whole tablet, o 1–r 9	**new source:** ORACC cams/gkab P363353 (Robson)

Not found in an open edition (recorded in `../../sources/_records-only--paid-and-restricted/README.md`): the Akkadian (Middle Assyrian) version of the Instructions of Šuruppak (Lambert, BWL 92ff.); the bilingual Emar/Ugarit Ballad of Early Rulers (Alster 2005; Arnaud, Emar 6/4 767; Ugaritica 5 164).

Base texts and line numbering

- Sumerian (§1–5): ETCSL composites, `../../sources/ETCSL/<n>/transliteration.md`; per-word glosses from ORACC ePSD2 (`../../sources/ORACC/_bulk/epsd2-literary.zip`, converted with `tools/cdl2md.py` into the session scratchpad). ETCSL composite line numbers; Death of Bilgameš: "Me-Turan F n".
- Akkadian (§6–7): eBL reading editions, `../../sources/eBL/Gilgamesh-SB-I/`, `../../sources/eBL/Erra-SB-I/`. eBL line numbers.
- §8: eBL fragment line numbers (`K 11261 5′`, `BM 35572 7′`); `../../sources/eBL-fragmentarium/Dynastic-Chronicle--ABC-18/`.
- §9: ORACC labels (`o 1` … `r 9`); `../../sources/ORACC/cams-gkab--P363353--Uruk-List-of-Kings-and-Sages/`.

Sources consulted

- Rank 1: ETCSL composites; ORACC Q000371, Q000782, Q000363, Q000372, Q000789 (ePSD2 lemmatisation); eBL Gilg. SB I and Erra SB I (normalisation, lemmas, notes, manuscripts); eBL Fragmentarium K.11261+, BM.35572; ORACC cams/gkab P363353.
- Rank 2: ePSD2 (via the ORACC lemmatisation); eBL dictionary/glossary files (`glossary.md` of each eBL folder); `/api/words` per word.
- Rank 3 (consulted after drafting): the ETCSL English translations; George's eBL translation of Gilg. I; Jiménez's eBL translation of Erra I; Robson's ORACC translation of P363353.
- Rank 4: eBL notes (Cagni 1969, Foster, CAD, AHw as quoted there); Jacobsen 1939 (`../../sources/Comparative-studies/Jacobsen-1939--Sumerian-King-List-AS11/`), for WB 62 and K 11624; Wasserman 2020 §3.8 (Erra IV 50 and Sippar; the Uruk list).
- Bible: `/Users/giladben-dor/dev/perush/תנך-מנוקד/` (every quotation checked against it).

Decisions

1. **One section per text**; each opens with a short Hebrew introduction (what, date, why it matters for the flood).
2. **Sumerian a-ma-ru = מַבּוּל** (shared table) and **a-ma-ru ba-ur₃ = הַמַּבּוּל שָׁטַף** (ur₃ "to drag, sweep over, level"). שָׁטַף is not a Genesis word, so it creates no false echo.
3. **eĝer a-ma-ru ba-ur₃-ra-ta = אחרי ששטף המבול**, identical in SKL 40 and Rulers of Lagaš 1 (and, without eĝer, in Death of Bilgameš F 30, 123). Tagged [equivalent] with אַחַר הַמַּבּוּל (בראשית ט:כח; י:א; י:לב; יא:י).
4. **mu N i₃-ak** (SKL, Lagaš) = שָׁנָה N עָשָׂה (literal: "he did N years"), explained once in a note. It keeps the formula visible and avoids מָלַךְ, which the Sumerian does not say (contrast lugal-am₃ = הָיָה מֶלֶךְ).
5. **Numbers** in Arabic digits as in the edition; the sexagesimal value (e.g. 28,800 = 8 šar) in the apparatus only.
6. **apkallu = חָכָם** (pl. חֲכָמִים), first occurrence noted as *apkallu*. **ummânu = אֻמָּן** (pl. אֻמָּנִים), noted as the cognate of (שיר השירים ז:ב) אָמָּן / (משלי ח:ל) אָמוֹן [cognate]: in Akkadian a learned expert, not a craftsman.
7. **ṭēmu in Gilg. I 8 = דַּעַת**, with a note: ṭēmu here is "report, information"; the shared table's טַעַם would be misread as "taste". Cf. Aramaic (עזרא ד:ח) בְּעֵל טְעֵם, a calque of Akkadian *bēl ṭēmi*. Proposed below for the shared table.
8. **nagbu = הַמַּעֲמַקִּים** (Gilg. I 1, 3; Erra I 136): the subterranean water-source. Not תְּהוֹם (false echo; cf. *tâmtu*).
9. **Akkadian šukuttu (Erra) = עֲדִי**; **šiknu = תֹּאַר**; *šīr ilī* = בְּשַׂר הָאֵלִים.
10. **Sumerian zi "life" / nam-til₃ "life"** = חַיִּים; **Ziusudra** = זִיּוּסוּדְרָה (shared). The name's meaning ("life of distant days") goes in a note, where it is compared with Ūta-napišti ("I found life").
11. **Bilingual lines** (Dynastic Chronicle): each tablet line (Sumerian or Akkadian) is translated separately, so the line remains the unit. Identical content gets identical Hebrew.

Open questions

- K 11261 17′–18′ (Dynastic Chronicle): Sum. *mu₇-mu₇* / Akk. *hu-bur*. eBL lemmatises *hubur* as the underworld river Ḫubur. The context (Enlil, just before the flood) and Jacobsen's reading ("the [their?] noise") favour *hubūru* "din", the Atra-ḫasīs motif. Translated הֲמֻלָּה with ? and both options in the apparatus.
- SKL 39 "a-ma-ru ba-ur₃-«ra-ta»": ETCSL marks the subordinating suffix as superfluous. We translate it as a main clause ("then the flood swept over").

Progress log

- 2026-10-16: project created; sources checked; two new sources saved (`ORACC/cams-gkab--P363353--...`, `eBL-fragmentarium/Dynastic-Chronicle--ABC-18/`); records added to `_records-only--paid-and-restricted/`.
- 2026-10-16: §1–§6 drafted (annotated + translation). Coordinator note received: partial niqqud. §1–§2 were drafted fully vocalized; to be fixed in the review pass.
- 2026-10-16: §7–§9 drafted. Review passes done: (a) fidelity – every line checked against the edition; brackets per edition; (b) consistency – SKL 40 = Lagaš 1 = Death F 30/123 (`אחרי ששטף המבול`), SKL 1 = 41, §2 1–3 vs Death F 27–29 (differ only where the case ending differs); (c) Hebrew – niqqud reduced to names at first occurrence per section and ambiguous words (script in the session scratchpad; plene spelling restored by hand in §1–2). eBL notes re-checked after the coordinator regenerated the reading editions: one new note (Erra I 146, Cagni/Deller) added to the apparatus. **Status: all nine sections drafted and reviewed.**
- 2026-10-17 (Gilgameš corpus coordinator): §6 Gilg. I 7 and 26 harmonized with XI 9 and the creation corpus: *niširtu* = `נְצוּרָה` (was `סוֹד`, which is reserved for *pirištu*): I 7 `את הנְּצוּרָה ראה`, I 26 `את פתח נצורתה [פתח]`. I 1–28 are now also line 1–28 of `../../-הנוסח-הבבלי/1-אפוס-גילגמש` `התקני/annotated-I.rtl.md`, which copies them verbatim (checked by `../../אפוס-גילגמש/verify.py`).
- 2026-10-21: cross-corpus harmonization (the lead's decisions, settled): (1) *uqnû* / ZA.GIN$_3$ = `סַפִּיר` [equivalent] instead of `לָזוּרִיט` in §6 Gilg. I 27, §7 Erra I 154 and §9 Uruk List o 10, each with the [equivalent] note (Exod 24:10, Ezek 1:26, Job 28:6). Gilg. I 27 is copied in the Gilgameš corpus (I 1–28): its copy must read `את לוח הַסַּפִּיר, וקרא בקול`. (8) *me* = `הַ־מָה` in §3 Death F 16 (and its footnote), instead of `מָה`.

Proposals for the shared renderings

Akkadian / Sumerian	Proposed Hebrew	Reason	Lines
Sum. *a-ma-ru ba-ur₃*	הַמַּבּוּל שָׁטַף	ur₃ "sweep over, level"; שָׁטַף is not a Genesis word, so no false echo.	SKL 39
Sum. *eĝer a-ma-ru ba-ur₃-ra-ta*	אַחֲרֵי שְׁשָׁטַף הַמַּבּוּל	Fixed formula, shared by SKL 40 and Lagaš 1; should be identical in project 3 (Sumerian Flood Story) if it occurs there.	SKL 40; Lagaš 1; Death F 30, 123
lām abūbi	לִפְנֵי הַמַּבּוּל	Counterpart of the above.	Gilg. I 8
ṭēmu (sense "report, information")	דַּעַת (note: טַעַם)	טַעַם in modern Hebrew reads "taste"; the shared entry already allows דַּעַת "by context". Add the sense "report" explicitly, with בְּעֵל טָעַם (עזרא ד:ח) as evidence.	Gilg. I 8
apkallu (Sum. abgal)	חָכָם, pl. חֲכָמִים	Needed by projects 2 (XI 183 *apkal ilī*), 1 and 5 (Berossus' sages). Not גִּבּוֹר/נְפִילִים (false echo of Gen 6:4).	Erra 162; Uruk list o 1–8
ummânu	אֻמָּן, pl. אֻמָּנִים	[cognate] אָמָּן/אָמוֹן; distinct from *apkallu*. Gilg. XI 86 (*mārī ummânī* "craftsmen") would then read בְּנֵי הָאֻמָּנִים.	Erra 147; Uruk list o 12–r 3
nagbu	הַמַּעֲמַקִּים	Not תְּהוֹם (reserved as the note-cognate of *tâmtu*).	Gilg. I 1, 3; Erra 136
ḫasīsu / Sum. ĝeštug₂ (tuku)	תְּבוּנָה / נָבוֹן	So that the meaning of Atra-ḫasīs ("exceedingly wise") is rendered with the same root wherever it is explained.	Šuruppag 4–5; Gilg. I 2, 4
Sum. *numun nam-lu₂-ulu₃*	זֶרַע הָאֱנוֹשׁוּת	Matches *awīlūtu* = הָאֱנוֹשׁוּת; [equivalent] with זֶרַע ז:ג. Also in the Sumerian Flood Story (C 23 per the ETCSL README).	Death F 31; Lagaš 4
Sum. *gidim*	אֵט	Same as *eṭemmu* in the shared table.	Death F 38–39
libittu	לְבֵנָה	[cognate]; for Atra-ḫasīs (the brick of the birth goddess) and Gilg. XI 325.	Gilg. I 19–20

Akkadian / Sumerian	Proposed Hebrew	Reason	Lines
puḫrum (as a Sumerian loanword)	אֲסֵפָה	Confirms the shared entry for Sumerian contexts too.	Death F 7, 30

Lessons for the guidelines

- **eBL Fragmentarium genre query** finds whole text families: `GET /api/fragments/query?genre=CANONICAL:Historiography:Chronicles` (URL-encode the colon path) lists every chronicle fragment, with genre sub-tags (e.g. "Dynastic Chronicle"). Worth adding to §4.6.
- **ORACC CAMS/GKAB** (`cams-gkab.zip`) contains Seleucid Uruk scholarly tablets with CC0 data, among them the Uruk List of Kings and Sages (P363353) and an Uruk King List (P363352); and Neo-Assyrian Huzirina tablets of Erra I (STT 1 16). The per-text HTML view (`https://oracc.museum.upenn.edu/<project>/<P>/html`) **does** work and gives the project's translation (the JSON zips have none).
- **eBL lemmatisation can be wrong in fragments**: K 11261 18′ *hu-bur* is lemmatised as the river Ḫubur where the context needs *ḫubūru* "din"; Gilg. I 18 *elī-ma* is lemmatised as the preposition *eli*. Always check the lemma against the normalisation and the context.
- **Niqqud**: drafting fully vocalized and stripping afterwards produces defective spelling (`הדבור`, `תלקח`). Draft directly in plene spelling, and vocalize only names and ambiguous words.
- **Maqaf is inside the Unicode niqqud block** (U+05BE). A niqqud-stripping regex `[־]` deletes the maqaf; use `[־]`.
- **Jacobsen 1939** (open, ISAC) transcribes and translates W-B 62 and K 11624 in its notes (pp. 58–60, 69–77). Useful wherever the antediluvian king tradition matters (projects 3 and 5).
- 2026-10-24 (Round 4 run 5, the netherworld corpus's coordinator): §7 (Erra I 126–162) aligned with `../../העולם-התחתון/5-ארה-ואישום/`, which shares the 37 lines (its renderings §12.6 lists every change and its reason): 28 `>` lines revised in `annotated.rtl.md` and `translation.rtl.md` (the speech formula `דבר דיבר` / `שָׂח`; *simtu* `ההולם`; *leqû* `לקח טינופת`; *agāgu* `קצפתי`; Irkalla `אִירְכַּלָּה`; *šiknāt napišti* `בעלי הנפש`; *ṣabātu* `אחזתי`; *epēšu* `עשיתי`; *zīmu* `זיו`; Girra `גִּירָה`; *kakkū* `כלי־נשקי`; *qabû* `אמרתי`; *elmēšu* `עִנְבָּר`; *ebbu* `צח`; *kânu* D `מכוננים`; *bānû* `בונה`; *binûtu* `צאצאי`; the reserved strings `שבים`, `תחתית`, `עולם`); kept the formula `וחוללתי מבול` and `האֱמָנִים`. The parallels rows of 138 and 137 and the corpus `parallels-index.md` updated; `verify ER --strict` (netherworld corpus) checks that the two copies stay identical.
