Important finding

CDLI has no transliterations (ATF) for any of these Atra-ḫasīs tablets — only catalogue data and (for some) photos / line art (hand copies). For text use SEAL, Wasserman 2020, and eBL.

Files

One sub-folder per artifact: `P######.catalogue.json` (raw CDLI catalogue export) + whatever images exist: `P######.jpg` photo, `_d` detail photo, `_l` line art (hand copy), `_ld` line-art detail.
