CDLI P480696 – Laws of Eshnunna, composite (RIME 4.05.19.add03), with the exemplars A, B, C

- **Text:** the Laws of Eshnunna (LE): a short date-and-occasion prologue (Daduša's accession) and laws §1–§60. Old Babylonian Akkadian (with many Sumerograms), Eshnunna, 19th c. BCE (Daduša, before Hammurabi's conquest of Eshnunna). Two main tablets from Tell Harmal (Šaduppûm): **A = IM 51059**, **B = IM 52614**; a small third piece **C** (CDLI ex. 03, P480695, §44–§47a).
- **Edition:** CDLI composite **P480696** = Q006412, "RIME 4.05.19.add03 (Laws of Eshnunna) composite" (CDLI cites RIME 4, 1990). Transliteration, a **normalization on every line** (`#tr.ts`) and an **English translation on every line** (`#tr.en`; translator not named). The standard modern editions (Goetze 1956; **Yaron 1988²**; Roth 1997) are not owned.
- **Exemplars: P480693** (ex. 01 = A, IM 51059, 441 ATF lines), **P480694** (ex. 02 = B, IM 52614), **P480695** (ex. 03 = C); their ATF is embedded in the composite's JSON export and saved here. Every exemplar line carries a link `>>Q006412 NNN` to its composite line, so the alignment is exact (`laws_config.py`). One link is wrong in CDLI: A obv. ii 13.b (= composite 70, §21) is linked to "07".
- **URLs:** https://cdli.earth/artifacts/480696 · JSON export `https://cdli.earth/artifacts/480696/json` (`[0]['inscription']['atf']`; witnesses `[0]['witnesses'][i]['witness']['inscription']['atf']`); also /artifacts/480693/json, /480694/json.
- **Retrieved:** 2026-10-18.
- **Licence:** CDLI Terms of Use: transliterations and translations "may be freely copied, aggregated and re-used according to common and fair academic practice", with attribution (CDLI). Committed.

Files

File	What
`P480696.json`, `P480693.json`, `P480694.json`	Raw CDLI JSON exports.
`P480696.atf`	The composite ATF (from the JSON, CRLF → LF).
`P480693.atf`, `P480694.atf`, `P480695.atf`	The exemplars A, B, C (from the composite's JSON).
`P480696--composite-with-exemplars.md`	Clean extraction: per composite line the transliteration, `ts:`, `en:`, notes, and each exemplar's own line (`W A obv. 1 8: …`).

Numbering

- **Composite lines 1–195** (CDLI): prologue 1–7; laws 8–195.
- **Laws** `@law N` = the standard numbering of Goetze / **Yaron 1988** / Roth 1997: §1–§60 with **§9a, §18a, §47a** (Yaron's §9A, §18A, §47A; 63 sections in all). Cite as "LE §53 (168–170)".
- Exemplar A: obverse columns 1–4, reverse columns 1–4 (CDLI refs `obv. 2 13.b`; half-lines `a`/`b` where A's line holds parts of two composite lines).

Notes on the composite (found while preparing the data, 2026-10-18)

- The CDLI normalization has slips (as in LH): e.g. 4–5 (the Sumerian prologue is "normalized" as *uṣima … ibūrma*); 67 *uštepil* for the written *i-te-pu!-usz*; 181 (§57) the composite and A write *ik-ki-im-ma* "gored" for the dog's bite (a scribal slip carried from §55), while `ts` silently reads *iššukma*. Translate the transliteration and note the difference.

Usefulness

Base text of `חוקים-ובריתות/3-חוקי-אשנונה/`. Only 7 lines have `[]`. CDLI's English is a plain line-by-line rendering (rank 3).
