- **N:** inūma | ilū | awīlum
- **T:** When gods were man,
- **L:** *inūma* ← inūma I “when Bab.”; *ilū* ← ilu I “pl. *ilū*, *ilānu* god, deity a or the god, also du.”; *awīlum* ← awīlu I “man human being (also coll.)”

- **Note:** The interpretation of the first line of *Atramḫasīs* gave rise to a famous controversy between the two most prominent Assyriologists of the second half of the 20th century, W. G. Lambert and W. von Soden. The former interpreted the ending *-um* in *awīlum* as a locative-adverbial case with comparative value, “When the gods like men bore the work” ([RN435: 146]). The second claimed that the locative-adverbial with comparative value is unknown in Akkadian, and therefore the two lines must be taken independently, the first one as a nominal sentence: “Als die Götter (auch noch) Mensch waren, trugen sie die Mühsal” ([RN7444: 416–417], [soden1978erste: 76]; see also [RN235: 127 with fn. 2]) — an interpretation rejected by Lambert as theologically impossible, since in Mesopotamian mythology the gods are never portrayed as having once been men. The discovery of the incipit of the Neo-Assyrian version (*enūma ilū kī amēli*, by [RN2709: 534–535]) seemed to confirm Lambert’s interpretation, but von Soden’s solution, which he justified in detail in [RN7456: 312–313], has been followed by many interpreters (cf. the title of Bottéro’s monograph, *Lorsque les dieux faisaient l’homme*). See in general [matous1967neuern: 5 fn. 29], [RN630: 23–25], and [ziegler2016aqba] for a summary of older and more recent discussions on this line. Interpreters in subsequent years have mostly aligned with one or the other solution. In Lambert’s camp, [loesov2004inuma: 197-98] interpreted the case marker *-um* in *awīlum* as a locative with functional (not comparative) meaning and offered the translation: “When gods –in place of man–” (similarly already [oberhuber1982versuch: 279–281]). On the basis of a passage in the Old Babylonian letter A.1246, [ziegler2016aqba: 115–17] shows that the comparative locative is already attested in literary Old Babylonian and could therefore also be used in this line. Supporting von Soden’s interpretation, [moran1971atrahasis: 59 fn. 2] chose to translate “When (some) gods were mankind”; [groneberg1978terminativ: 20] stated the form *awīlum* should be interpreted as nominative singular with an intended comparison (“als die Götter wie Menschen waren”); and [seux1981notes] supported Groneberg’s interpretation by pointing out the passages I 93 *bēlī bīnu būnūka* and I 95 *ellil bīnu būnūka* (q.v., following [RN1445: 158]), where the same construction can be found ([RN600: 38] rejected this interpretation of Groneberg and Seux). In Jacobsen’s idiosyncratic interpretation ([jacobsen1977inuma: 114–115]: “When Ilu was the boss”), *ilu* is a singular that refers to the god Enlil and *awīlum* denotes a person of authority. [Kilmer1996: 134] (see also [kilmer2000: 97]) associates *awīlum* with the Semitic root for labor (* *ʾwl*/*ml*); similarly, [RN344: 308 with fn. 32] interprets *awīlum* here as a metonymy for “slave.” A different interpretation, which seems to bring a synthesis to both lines of thought, is that of [LS25: 652], who interprets *awīlum* as a predicative complement, and therefore simply a nominative: “When gods, being human, carried out the labour…” This is the interpretation followed here. Note that the variant with the preposition *kī*(*ma*) is now attested in an Old Babylonian tablet (*i-nu-ma i-lu ki-ma a-wi-li* in [RN2979: 162 No. 55 l. 15]). For the metric analysis of the passage in lines I 1-6 see further [RN3041: 182–83]; for the relationship between the beginning of *Atramḫasīs* and *Enki and Ninmaḫ* see [RN838: 18–37].

- **N:** rabûtum | anunnakū | sebettam
- **T:** The great Anunna-gods, the seven, were burdening
- **L:** *rabûtum* ← rabû I “big”; *anunnakū* ← Anunnakkū I “(the) gods”; *sebettam* ← sebettu I “group of seven, heptad”

- **Note:** The interpretation of the line has been the subject of much discussion. On the one hand, the accusative case of the number “seven” is unusual: for this reason, [RN7444: 420–421] (and already [soden1966igigu: 142]) interpreted the line as enjambement and thus connected “seven” with Igigu in the next line, which appears in the accusative case. Other interpretations are, however, possible: [lambert1980line: 84-85] interprets it as accusative of relation. Similarly, [RN1445: 157] compares the line with *Etana* @url{/corpus/L/1/9/OB/Morgan#10}{OB Morgan 10} (*sebetta bābū*) and *Anzû* @url{/corpus/L/1/10/OB/II#38}{OB II 38//40} (*sebettam qablī*, cp. @url{/corpus/L/1/10/SB/II#30}{SB II 30//150} *sebet qablī*). [RN2009: 161] and [RN1196: 75] interprets it as an adverbial phrase. A radically different interpretation is offered by [RN344: 509–510 with note 713 and 715], according to whom “seven” means “seven times” (referring to *dullum*), so “sevenfold (work).” Metzler also discusses other possible interpretations.

- **L:** *mātam* ← mātu I “f. land, country”; *īhuzū* ← ahāzu I “to take”; *lētīša* ← lētu I “f. cheek”
- **Note:** [RN435: 42-43] read the line as *qātam īhuzū qātīša* and translated “The gods had clasped hands together.” von Soden read the first sign as *[k]u-* (cf. *kūtum* “jug”), and interpreted *qātum* as the handle of a vessel: “Sie fassten die (Los-)Flasche an ihrem Henkel” (see [RN7444: 421-422]). According to von Soden, this line describes part of the process of decision by casting lots described in the next line. After collation of the tablet (a collation confirmed by A. Shaffer’s examination *apud* [RN7457: 100] and later by the first-millennium version), von Soden corrected his reading to *[k]u!-tam i-hu-zu le-ti-ša* “die (Los-)Flasche fassten sie an ihrer ‘Wange’ (= Flaschenhals?)” ([RN7456: 314]; see also [vonsoden1994atram: 618]). The reading of the first sign as *ku-* was considered unlikely by [RN1447: 97] (drawing in [RN1447: 98 A]) and [RN118: 184]; the latter consider *šu-* more likely. Collation of the passage in the Standard Babylonian version (q.v.) suggests the reading adopted here, which is also compatible with the traces. The “cheeks” of the land appear also in @url{/fragmentarium/IM.67692}{IM.67692} l. 15.

- **Note:** The recovery of the Standard Babylonian version has made von Soden’s reading of the line (e.g. [soden1978erste: 77]: *er-ṣe-tam-ma pa-la-[t]u?-uš-šu*; see [RN630: 29]). [RN435: 43] translated the last word as “... his subjects”, Wilcke ([RN2009: 160 with fn. 12–14]) “Herrschafts-, Verfügungsbereich,” since according to him *baʾūlātu*(*m*) represent the word *beʾūlātu*(*m*), “Verfügungs, Betriebskapital,” known from economic documents. The restoration of the beginning is given by [RN118: 184]: “The OB text is probably to be read *[{d*en-lil i]-hu#-uz#} (coll.)” (see also the previous collation in [RN435: pl. 11]).

- **Note:** The correct reading and interpretation of the number given in this line has been discussed several times. [RN435: 44-45] translated “forty years”; similarly, [RN305: 178 note 2] read “forty years,” interpreting them as divine years: according to Tablet II 1 (*nēr* (*u*) *nēr*), one divine year equals 600 (and) 600 (or perhaps 600×600) human years. [RN7444: 422] interpreted it as 2.500 (years of work), i.e. 4×600+60+40, adding that this number should refer to the god Enlil, because 2.500 is the square of Enlil’s divine number 50 (see [soden1978erste: 78]; [vonsoden1991urmensch: 47]). [RN216: 10] translates 3.600 years without further explanation (60×60?).

Lambert’s collation ([RN1447: 97–98 C]) showed that both *-še-x-* and *-te-* are possible; von Soden’s first collation revealed *še-[...]* ([RN7456: 314]); he later ([RN7457: 100]) considered both *še-I[B]* and *še-I[G]* possible, and read accordingly *u₂-še-e[p?-hi?]* ([vonsoden1994atram: 623]: “Es merkte auf Kalkal, ließ ver[schließen]”; see also [RN39: 532] [“Mais Kalkal, s’en étant avisé, fit fermer”], [RN216: 10] [“Yet Kalkal was attentive, and had it closed,”], and [RN2720: 853a and 1582b]). [RN305: 186] takes a different approach by restoring *u₂-te-eq-qi₂* at the end and understanding the repeated verb as *waqû*(*m*) Dt (“Kalkal hielt Wache, (er) hielt Wache”). [RN344: 445, with fn. 500] agrees with von Soden in reading *ŠE*, and suggests reading the Š-stem form of (*edēlum*, *u₂#-še-d[i-il]*). The same verb is indeed used a few lines further in the text (OB I 87 and 89), a fact which makes Metzler’s reconstruction highly likely.

[RN600: 98] points out that the *tertium comparationis* between “face” and *bīnu* “tamarisk” is the color yellow/green, signifying stress. Some have taken *bu-nu-ka* to mean “son”, e.g. [Cazelles1970: 179] (“Le *bunu* au sens de fils ... se retrouve à Ugarit pour El sous la forme *bny bnwt*” (same interpretation in [RN447: 27], [RN235: 140]). The existence of the otherwise unattested verb *nabāku*, postulated by von Soden ([RN7444: 422 fn. 1], [soden1978erste: 79], [RN2720: 694b], *apud* [roemer1967studien: 194]; also in [RN2721: N/1 8b]) for this passage, is very doubtful. In the present line, the Old Babylonian version *libbikūnim* may be interpreted as the D stem of the verb, attested in Mari ([RN2720: 2b]), rather than the irregular */i/* vocalization suggested by Lambert; however that parsing requires correcting l. 100 to *ub!#(IB)-bi-ku-nim*.

The spelling in OB 47 *we-e-i-la* is probably not indicative of a single name but rather of two separate words: the name *{d*we-e} followed by *ila* in apposition. Moran’s interpretation is followed by [alster2002iluawilum: 38] who notes that there is insufficient space for *{d*we-e-i-la} in OB 144, thus corroborating a name *{d*we-e}. Moreover, [alster2002iluawilum: 38] points out the pun in the phrase *{d*we-e i-la}, which resembles *awīlum ilu* in the opening line of the composition. Cp. below OB 223.

- **Note:** Several proposals as for the reading of the signs before *itti ellil* have been made. Thus, [pettinato1970review: 78] read *qa-ab#-la#-am* (but */qa/* is normally written *qá*). [RN7444: 424] suggested "wohl *da!-ba!-ba-am it-ti {d*en-lil$_2$}, 'mit Enlil zu reden'"; and added: "*na-ba-ba-am* (vgl. [RN2720: 694a] zu *nabābu*) wäre aber auch nicht ganz undenkbar, wenn die Spuren zu *da-* nicht passen sollten" (see also [soden1978erste: 62]: *u[b-la] pi$_2$-i-ni na-ba-ba-am it-ti {d*en-lil$_2$}, "hat unser Mund [vorgebracht,] daß wir uns bei Enlil beklagen"). [RN2709: 537] rejected von Soden's first proposal, but thought the second to be possible ("Not *da!-ba-ba-am*, though *na-ba-ba-am* can be considered"; see also his collation in [RN435: pl. 11]). [westhuizen1986some: 92] read *na-ka#-ra#-am*? (as already suggested by [aro1971atram: 176]), so the meaning would be *ub-la pi-i-ni na-ka-ra-am it-ti {d*en-lil$_2$} "(Now, every single one of us gods) has spoken in favour of hostility against Enlil", but this reading does not fit the traces (see [RN118: 186]: "The alternative reading proposed by J. P. van der Westhuizen (...) is not supported by the traces (coll.)"; and [RN164: 279]: "The proposal of Westhuizen (...) is excluded by collation"). If the reading of the signs as *na#-ba?#-ba?#-am#* is correct, one may consider parsing it as N infinitive of the *naprās-* form (on which see [RN27201: §56h]; [BB07kk: 175]) of the verb *abābu*, "ravage" *vel sim.* (on which see [jimenez2021zweite: 289]). Though the lacuna between II. 181 and 188 is thereby eradicated, in the SB text at least, in the following we retain, for ease of reference, Lambert and Millard's numeration of the lines of OB Tablet I. - **Note:** Although [RN435: 152] consider the reading *li-il-la-a* epigraphically improbable, they nevertheless refer to the word *lillû* ([RN2720: 553a] *lillu*), which also appears in @url{/fragmentarium/VAT.10152}{KAR 162} r 4 (a MS of *Enūma eliš* I 143 that reads *ku-li-li* instead of *KU$_6$.LU$_2$.U$_{18}$.LU*). Finkelstein (apud [RN435: 152] suggested a reading *li-gim-ma-a*, from *ligimû* ([RN2720: 552a] "Keim, Sprößling"). Against the collation of [RN1447: 97–98] ("neither sign certainly identified. The first sign is not *ID*," drawing in [RN1447: 98 J]), von Soden read *li-id-di-a* "Der Mutterleib lasse fallen und erschaffe" (see [RN7456: 314], [RN7457: 100], [soden1978erste: 62], [vonsoden1994atram: 623]). Note also the emendation *lu!-ul!-la-a*) (*lullâ*) of [pettinato1971altorientalische: 57, 101]. After collation, [RN118: 187] notes that only *li* and *a* are certain and that the SB text's *lullâ* replaces the difficult word of this line. Collation by Zs. According to [kilmer1972concept: 163] and [RN3127: 129-130], the *uppu* refers to the “heartbeat” of the newly created man. Contrary, [RN435: 152], [moran1970creation] [tropper1989nekromantie: 53], and [gabbay2018drums: 38-40] understands the playing of the *uppu*-drum in a ritualistic context. - **Note:** Regarding the term *eṭemmum*, several interpretations have been proposed. [tropper1987seele] and [tropper1989nekromantie: 49-56] interprets *eṭemmum* as the human component in the creation of mankind, contrasting it with the flesh (*šīrum*) and blood (*dāmum*) of the slaughtered god. He advocates for translating *eṭemmum* as “Totengeist” (“dead ghost”), which opposes “living human being” (*balṭu*) in the subsequent line. [groneberg1990unterwelt: 252-53] also supports the translation “Totengeist,” explaining it as a representation of the living sign of the dead, someone who is preserved alive after death. Von Soden ([soden1979konflikte: 11, fn. 28]; [soden1978erste: 50-94]; [vonsoden1973mensch: 350-352]; [soden1989igigu: 344–348]; [vonsoden1991urmensch]) rejects the interpretation of *eṭemmum* as “Totengeist,” and instead reads the name of the primeval man in *Atramḫasīs* as Edimmu/Widimmu (based on SipOB2). This interpretation is followed by [cagnisangue: 79-80], who translates line 215 as “Dalla carne del dio (*šīrum*) sia fatto Edimmu”. [schramm1994review: 151], following this interpretation, suggests that the word (*w*)*eṭemmum* has a foreign etymology, and posits it as a possible origin for the name “Adam” in the Old Testament. Cagni, however, does not perceive a negative connotation in *eṭemmum* in this context ([RN1299: 21-22]). He emphasizes that the death of the god has a positive connotation. Contrary to the common scholarly view that *eṭemmum* always denotes a spirit or ghost with negative implications, Cagni suggests that in this context, *eṭemmum* has a vital meaning, linked to a living god whose blood and flesh are crucial for human creation. [RN1299: 22] notes that biblical passages on human creation (Gen. 1 and 2) omit any mention of death or death-related aspects. Further considerations on the reading and interpretation of *e-ṭe-em-mu* can be found in [RN1179: 68-69 with note 32]. [RN1780: 334-35] offers another interpretation, viewing the logographic writing of *eṭemmum*, *GIDIM* (a sign comprising the fraction ⅓ plus *IŠ*×*TAR*), as an unusual form of *ištar(u)*, meaning “goddess,” and posits that *eṭemmum* could be either one-third goddess or one-third of a goddess. The variant form with an initial /*w*/ in MS SipOB2 is attributed by [RN1196: 102 fn. 73] to a late Babylonian phenomenon of initial /*w*/ loss: in MS SipOB2, the /*w*/ in *we-ṭi-im-mu* was incorrectly restored in antiquity. [veenhof1990interpretatie] offers a different view, interpreting the variant as an etymological wordplay between Wê – *ṭēmum* and the “spirit of the dead” (*w*)*eṭemmmu*. He also notes a connection between *GIDIM* and *geštug*, supported by an Old Babylonian text (@url{/fragmentarium/IM.74368}{IM.74368} ll. 35-36). A similar view is presented by [RN844: 29], associating *GIDIM* with Akk. *eṭemmu*(*m*) and attributing the SipOB2 variant to an originally palatal initial sound of the word.

- **Note:** The exact interpretation of the term *bal-ṭa* in this verse is debated. The original interpretation by [RN435] understood *balṭa* as a living human, as the sign (*ittu*) of the spirit (*eṭemmum*), implying that the living human being is the expression of the spirit. Saggs ([Saggsencounter: 166]) rejected this interpretation, arguing that *eṭemmum* cannot convey vitality or a vital spirit, as it is consistently associated with ghosts or images of dead people in the sources. He understands *bal-ṭa* not as “living man” but rather as “a living thing” more generally. Saggs argues that the verse likely means that the *eṭemmum* manifests itself in the form of a living thing, with the *eṭemmum*, the ghost, resembling a living human being. He translates the line as “May it [*scil.* the *eṭemmum*] make known its sign (in the form of) a living thing.” On the other hand, Abusch ([abusch1998]) considers *bal-ṭa* to refer to the living person, which he believes is a combination of *ṭēmum* (representing the blood) and *eṭemmum* (the flesh). He translates the line as “To the living creature, let it make known its sign.”

- **Note:** The passage in lines 223-230 has been frequently discussed in secondary literature, with an overview of the proposals provided in Winitzer ([winitzer2023atrahasis: 87–89]). One suggestion is that *we-e i-la* in this line plays with the opening words of the poem, *ilū awīlum* ([alster2002iluawilum]; see also [winitzer2023atrahasis: 89]). Alster further points out that *wē ilu*(*m*) in the nominative should be interpreted as a reference to *awīlum ilū*, which is the inversion of *ilū awīlum* in I i 1, thus establishing a connection with that line. [RN435: 59] read the name of the slaughtered deity here as *{d*we-e-i-la} “Wê-ila,” while von Soden ([RN7444: 424]) read it as Geštu(g)-e “Eine Hypostase der göttlichen Weisheit” (followed by [cancikkirschbaum2009reinigung: 146]). The name Ilawēla (< *ila-we-e-i-la*) has been suggested to involve etymological wordplay, as proposed by [Geller1993]; [abusch1998]; [kilmer2000]; [krebernik2002geschlachtet]; and [alster2002iluawilum]. [oberhuber1982versuch: 280] instead reads *ilam aw-e-i-la* “a god who is a man,” with the first sign *AN* as a logogram instead of a determinative. He suggests that the nameless deity is identical with Qingu. Both [alster2002iluawilum: 38] and [krebernik2002geschlachtet: 290] read *{d*we-e} and *i-la* as an apposition to the god’s name (see I 47). [krebernik2002geschlachtet: 296] also notes the suggested reading (*w*)*īla* from the merge of *{d*we-e} and *i-la* in connection to the divine names Illa and Alla in @url{/fragmentarium/VAT.9307}{KAR 4}. See also the note on SB II 103. For the chiasm in lines 223-226, see [tonder1990opbou: 104].

However, the use of the verb in the singular in the immediately following line makes von Soden's hypothesis unlikely, as it would represent a sudden and improbable change of subject. Compare ([RN344: 361 with fn. 198]), who also considers the use of the ventive here more probable.

- **Note:** [RN435: 63 and 154] read the first word as a hapax *[h]a-lu-up*, allegedly a substantive from *ḫalapu*(*m*) “to slip in” (on the reading of the first sign, see also the note on MS SipOB1). Since products of the *ḫaluppu*-tree play a central role in therapies for a woman who does not become pregnant ([boeck2009proverbs: 275–276]), it is possible that the line refer to it; perhaps as an epithet of the “womb” (“the tree of the dynasty,” i.e. the place of origin of a lineage?). [soden1978erste: 68] and [vonsoden1994atram: 625] read *[i]q-lu-up pa-le-e*, “da schälte sie die Stangen [cf. [RN7444: 426]: “*palûm* wäre dann hier eine Stange, die mit einer anderen zu einer Geburtszange (forceps) verbunden wäre.”] [jacobsen1973nintur: 230] (supported with reservations by [RN744: 115 fn. 30] and [RN1962: 167 no. 55]) understands this passage as a reference to the rupturing of the membranes by midwives and suggested restoring a construct state *hu#-lu#-up pa-le-e* “the insertion of the *palû*,” deriving *palû* from Sumerian *bala*, ‘spindle’, and understanding it as “a pointed implement” ([jacobsen1973nintur: 230 note 63]). [wilcke1985familiengruendung: 297 fn. 123], and *apud* [stol1983zwangerschap: 115, addenda to p. 56] (“sie zog (*iḫlup*) das Herrinengewand (*palû*) über,” see also [RN744: 115 fn. 30]) reads *[i]h!-lu-up pa-le-e* and assumes that it refers to some garment (*palû*) that is put on (*ḫalāpu*). [RN744: 115 fn. 30] follows Wilcke in reading a verbal form *ih-lu-up* at the beginning, but admits that *iḫ-* is not certain. So [RN744: 115] translates: “she slipped into (?) the *palû*, opened the membranes.” Stol also points out that the word *silītum* normally means “afterbirth”.

- **Note:** See the collation of the first sign in [wilcke1985familiengruendung: 296], which seems incompatible with a reading *ih?#*. See also the drawing in [RN1447: 98] D (which suggests *[h]a* vel sim.); and [RN435: pl. 11] and [RN2709: 537] ("Neither *ih!-ṣu!-ub* nor *iq!-lu-up*" with von Soden's comment: "Die Lesung *[i]q-* erschien mir sicher (s. *AHw*. sub *qalāpu* G); *[h]a* ist sinnlos." [[RN7457: 100]], which he then thought confirmed by collation ([RN7456: 314]: "*[i]q!-lu-up* richtig!").

- **Note:** [RN435: 63] (“She girded her loins as she pronounced the blessing”) and [RN603: 60] (“Unter Segensworten gürtete sie ihre (der Mutter) Lenden”) take the sequence perfect (*ītezih*) → present (*ikarrab*) as a way of expressing a simultaneous action. [RN744: 116] relates this passage to other texts in which strings of stones are placed around the hips of a woman who does not give birth easily. He admits that the verb *rakāsu* would be more appropriate in this context than *ezēḫu*, but explains the choice of *ezēḫu* because of the poetic language of the text. The suffix *ša* in *qablīša* has been taken by some scholars to refer to Mami; [RN164: 237] interprets that it refers to the mother (“She girded (the mother’s) middle as she pronounced a blessing.”).

- **L:** *anākū-mi* ← anāku I “I”; *abni* ← banû IV “to create”; *īpušā* ← epēšu II “to do”; *qātāya* ← qātu I “f.”

- **Note:** See [moran1971atrahasis: 58–59 fn. 3]: “On lines 289 ff. we would follow the suggestion (private communication) of Thorkild Jacobsen that in line 290 the *qadištum* is the mother after childbirth – [RN435], without comment: “Let the midwife rejoice in the prostitute’s house” – and that the whole passage deals, first, with a nine day celebration after childbirth in honor of the mother-goddess, then (299 ff.) with the resumption of sexual relations. On this basis we would propose that in line 299 the date of the latter is given (*ina UD x.KAM*, “on the X day”) and that in line 300 we restore *li-ih-ti-[pu*, “let the woman and her husband purify each other (themselves?)”. The [RN435] reading has been rightly criticized by [RN7444: 425-426 fn. 2], but his own proposal, *liḫtī*[*da*], “let them speak with one another”, yields, in our opinion, a meaning much too unspecific for the context. The purification we propose could refer to rites freeing the woman of her taboo and the man of any pollution through contact with her. The use of the G stative of *ḫiāpum* in connection with love (@url{VAT.10101}{KAR 158} rev. ii 11) and sex appeal ([RN775: 122: 96, 120; 124: 125]) is certainly relevant, but a more general meaning, “fair, handsome”, seems to have developed; cf. *namrum*, “shining” > “perfect, in excellent condition”. However, attractive as Jacobsen’s suggestion on *qadištu* in line 290 may be – and note the late variant *ḫarištu*, woman in confinement ([RN435: 62: 15]) – , also to be noted are the Middle Assyrian evidence ([weidner1954hof: 268: 11]) associating the *qadištum* (*qadiltum*)-function with the midwife, and the Old Babylonian evidence for a *qadištum* serving as a nurse (see most recently, [soden1957hebamme: 121]).” According to [lambert1992prostitution: 143], the line “suggests that the *qadištu*’s house served as a small maternity hospital. The Late Assyrian version evidently did not acknowledge such an institution and substituted another word [*ina bīt ḫa-riš-ti*, “in the mother-to-be’s house”] according to which women had their babies at home.” See also [RN744: 173]: “A few scholars are of the opinion that *qadištu* here refers to the “mother after childbirth” who, for this reason, is “sacred” (the verb *qadāšu*) and, instead of the well-known title of a religious woman, they translate “tabooed (woman)” ([jacobsen1973nintur: 292 fn. 73]; [moran1971atrahasis: 58 fn. 3]). It is only this line from Atra-ḫasīs that is amenable to such an interpretation, but it should be noted that the lines from our literary text deal with the general context of taboo. The closing lines stress strict observance of divine rules. We will suggest below that the house of the *qadištu* may, perhaps, have been a nursery.”

[matous1967neuern: 14], on the other side, suggests to derive it from *ḫarûm* ([RN2720: 329a] *harû*(*um*) V “eingreifen”; [RN2721: Ḫ 118b]), not yet attested in D stem. [soden1978erste: 82] takes it as a D-stem of *erû*(*m*) “entblößen” with a specific sense of “ein Kind entbinden” (“Wo immer eine Gebärende gebiert, eine Mutter von Kindem selbst entbindet”; see [RN2720: 1433b] *urrûm* III; [RN2721: E 325a sub 2] “to conceive”), an interpretation rejected by [wilcke1985familiengruendung: 297 note 124] on the grounds that “hier von der Geburtshilfe die Rede ist.” Moreover, as noted by [RN164: 279], parsing the verb as derived from *erû*(*m*) seems incompatible with the writing *u₂-ha-[ar-ru-u₂]* of the SB version (SB III 60). [muses2: 202 on I 292] derives it from *ḫerû* D, “to hollow oneself” (“And the mother of the baby is delivered”); an interpretation abandoned in [RN164: 238 and 279] in favor of the one offered in [RN744: 116 fn. 35], viz. the verb (*w*)*urrû*(*m*), “to cut off” (“the mother separates herself from her child as if it were the branch of a tree (*ḫarû*). - **Note:** See the collation from photograph in [RN7444: 426 fn. 2] (confirmed by collation in [RN7456: 314]): “lies *i ta-ad-di! ki!-tam* (so E; A *-ta-am!*) “sie lege eine Matte hin!” *di* statt *ki* bieten alle drei Kopien von E und meine Lesung nach der Photographie; das etwas verdrückte *ki-tam* statt des bisher gelesenen *-ša* kann man auf der Photographie gut erkennen. Der in der Kopie gegebene senkrechte Keil nach *ki-ta-am* auf A ist gewiss nur von *ra*, das darüber steht, durchgezogen.” Compare also the collation in [RN2709: 537] (“E does not read *ki!-tam!*, and the *DIŠ* in A (despite “gewiss”, p. 425²) is not an overrun from the above *-ra*”) and [RN1447: 97–98] ([ki#/di#-ta#-am+DIŠ]), from which [RN7457: 100] (and [RN1763: 170]) concludes: “Auch L.s Zeichnung lässt meine Lesung *ki-ta-am* zu. Ein überzähliger senkrechter Keil am Ende bleibt unerklärlich; oder sollte er das Zahlzeichen ‘1’ (*ištēn*) sein?”. See, however, also [RN1447: 98]: “First sign can be *KI* or *DI*, but the following four wedges cannot form either of these signs, and the last three wedges are not *UD*, since in that sign the lower winkelhaken is bigger and precedes the smaller upper one.” See also [RN7457: 100] “Meine Lesung *i ta-ad-di ki-tam* ‘sie lege die Matte hin!’ wird auch durch L.s Kopie bestätigt.” A summary of different understandings of this line (e.g. *nadû* “to lay down” [[soden1978erste: 68 zu 298]] vs. *nâdu* “to praise” [[RN435: 64]] and *kītu* “reed mat” vs. *kitû* “linen cloth” vs. the city Keš) can be found in [RN744: 117–118 fn. 39], who defends the original interpretation of [RN435: 65] (“Without ceasing praise the birth-goddess, praise Kesh!”) because of parallelism. In view of the clear *ke-e-ša₂* of the SB version (III 64), Lambert’s interpretation seems inescapable. One can perhaps interpret the verb *ta-ad*, uncorrected, as *ta-ʾād*, a variant of the regular form of *nâdu*, “to praise” (*tanād*), which is attested in personal names of the type DN-*luʾād* (about which s. [RN617: 145 fn. 11], the derivation from *âdu*, “to take notice of” suggested there is difficult, since the preterite form of the verb is *iʾīd*, s. [RN27201: §107r*]). According to [RN744: 117 fn. 41] the sense of the praise is not the “resumption of sexual relations” (cf. [moran1971atrahasis: 58 fn. 3]) but the “mythical foundation of marriage”.

- **Note:** The reconstruction here follows [wilcke1985familiengruendung: 296], who translates: “In [ihren Häusern], indem sie Betten aufstellen”. On the basis of @url{/corpus/L/1/4/SB/II}{SB Gilgameš II} 111, [finkelstein1967ana: 133] restores: *i-na bi-[it e-mi li-in]-na-di-e e-er-ši* “In the [nuptial cham]ber let the bed be prepared.” [moran1971atrahasis: 58] assumes that the lacuna contains a date specifying the duration of the taboo on sexual relations following a birth, and translates: “on the X day” (*i-na UD.x.KAM*). This interpretation is rejected by ([RN744: 18 fn. 41]), who maintains that this passage pertains to marriage rites. See also [landsberger1968jungfraeulichkeit: 84], who compares the passage 299–304 with *Gilgameš* (@url{/corpus/L/1/4/OB/II#159}{OB 159–161}), in particular the occurrence of Išḫara in *Gilgameš* (@url{/corpus/L/1/4/OB/II#196-197}{OB 196–197}) and in *Atraḫasīs* OB I 304.

[RN435: 64-65] read *li-iʾ-ti-[lu]*, a form of *itūlu* “to lie down; sleep”, [RN7444: 426] reconstructed *li-ih-ti-[da]* “may they talk with each other”. [moran1971atrahasis: 58 fn. 3] reads *li#-ih#-ti-[pu]*, “let the woman and her husband purify each other (themselves)” (from *ḫiāpu*(*m*), “to cleanse”) According to Moran, this passage describes “ rites freeing the woman of her taboo and the man of any pollution through contact with her.”
