Concordance: RIME / Edzard 1997 labels ↔ ETCSL composite numbers ↔ ORACC Q000377

Generated by `../temple_tools.py conc GU`. Label = cylinder.column.line (Edzard 1997, RIME 3/1.1.7 CylA, CylB; = ETCSL **`A1.1`** = ORACC `A i 1`). ETCSL no. = ETCSL's running composite number (1–1363); its gaps are lines that are lost on the cylinders (counted by ETCSL, not given a RIME label). Sim. = similarity of the ETCSL and ORACC transliterations (low values are broken lines, written differently: `...` vs `…`).
